

## Progressive automotive design has a new name.

Ka.

A seamless blend of funk and functional.

Where every curve and every surface is  
a pleasure to look at.

While every switch and every control is  
brilliantly ergonomic.

Complementing its bold styling, Ka also  
boasts outstanding handling via its dynamic  
European engine, precise gear shift and  
optimised suspension.

Split braking systems, dual airbags and a  
protective passenger cell provide safety  
features traditionally found in larger cars.

Ka also cares for the environment with  
approximately 75 per cent of its  
metallic components being recyclable.  
It's cleaner, has low emissions and is  
remarkably fuel efficient.

Truly a Ka of the new millennium.

Like its holistic design, Ka is a complete  
package. Power steering, air conditioning,  
CD player, airbags and electric sunroof  
are all standard. The only decision to  
make is the colour you prefer.

Experience the remarkably different Ka.
