## FORD FALCON GL

If ever there was a car designed to set your spirits free—new Falcon GL is that car.

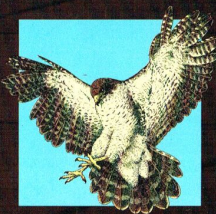

You can see for yourself how new Falcon catches the eye. Aerodynamically elegant body lines. A look of strength with grace, power with beauty...a major evolution for a car that's setting the pace in Australia.

Drive the new Ford Falcon and experience the spirit of freedom.

## THE LOOK OF FREEDOM

New Falcon GL is that rarest of birds—a combination of style and efficiency. The sleek lines that reflect the look of today—also cut the wind with ease. The design of the grille... the new integrated style of the quartz halogen head and driving lights, the profile of the high-strength, energy-absorbing polymer bumpers, which

wrap around the front and rear... and the front 'spoiler' shape all add to the aerodynamics and in turn help improve fuel economy.

The Falcon's lines are complemented by attractive new full wheel covers, and new left hand and right hand exterior rear view mirrors which

are designed to deflect forwards or backwards—a neat safety feature.

In fact, all the stylish features of the new Falcon GL are designed to work for a living. So that you're free to enjoy yourself, every time you slide behind the wheel. That's the spirit of freedom.

## FREEDOM TO CRUISE IN COMFORT

Falcon GL lets you stretch your wings in the roomiest interior in its class, and soothes your senses with new comfort. A new level of colour co-ordination throughout gives you a dash, steering wheel and moulded door panels in colours that blend with the plush fabrics of the seating and carpeting. The seats are foam padded and shaped to support driver and passengers in comfort.

A unique fold-down centre section in the rear seat provides

greater versatility in luggage capacity—plus a useful flat surface for the kids to play a game on long-distance trips.

A 4-speed fan-boosted heater warms the cabin in cold weather. In-dash ventilation (which can incorporate optional air conditioning) cools it in hot weather.

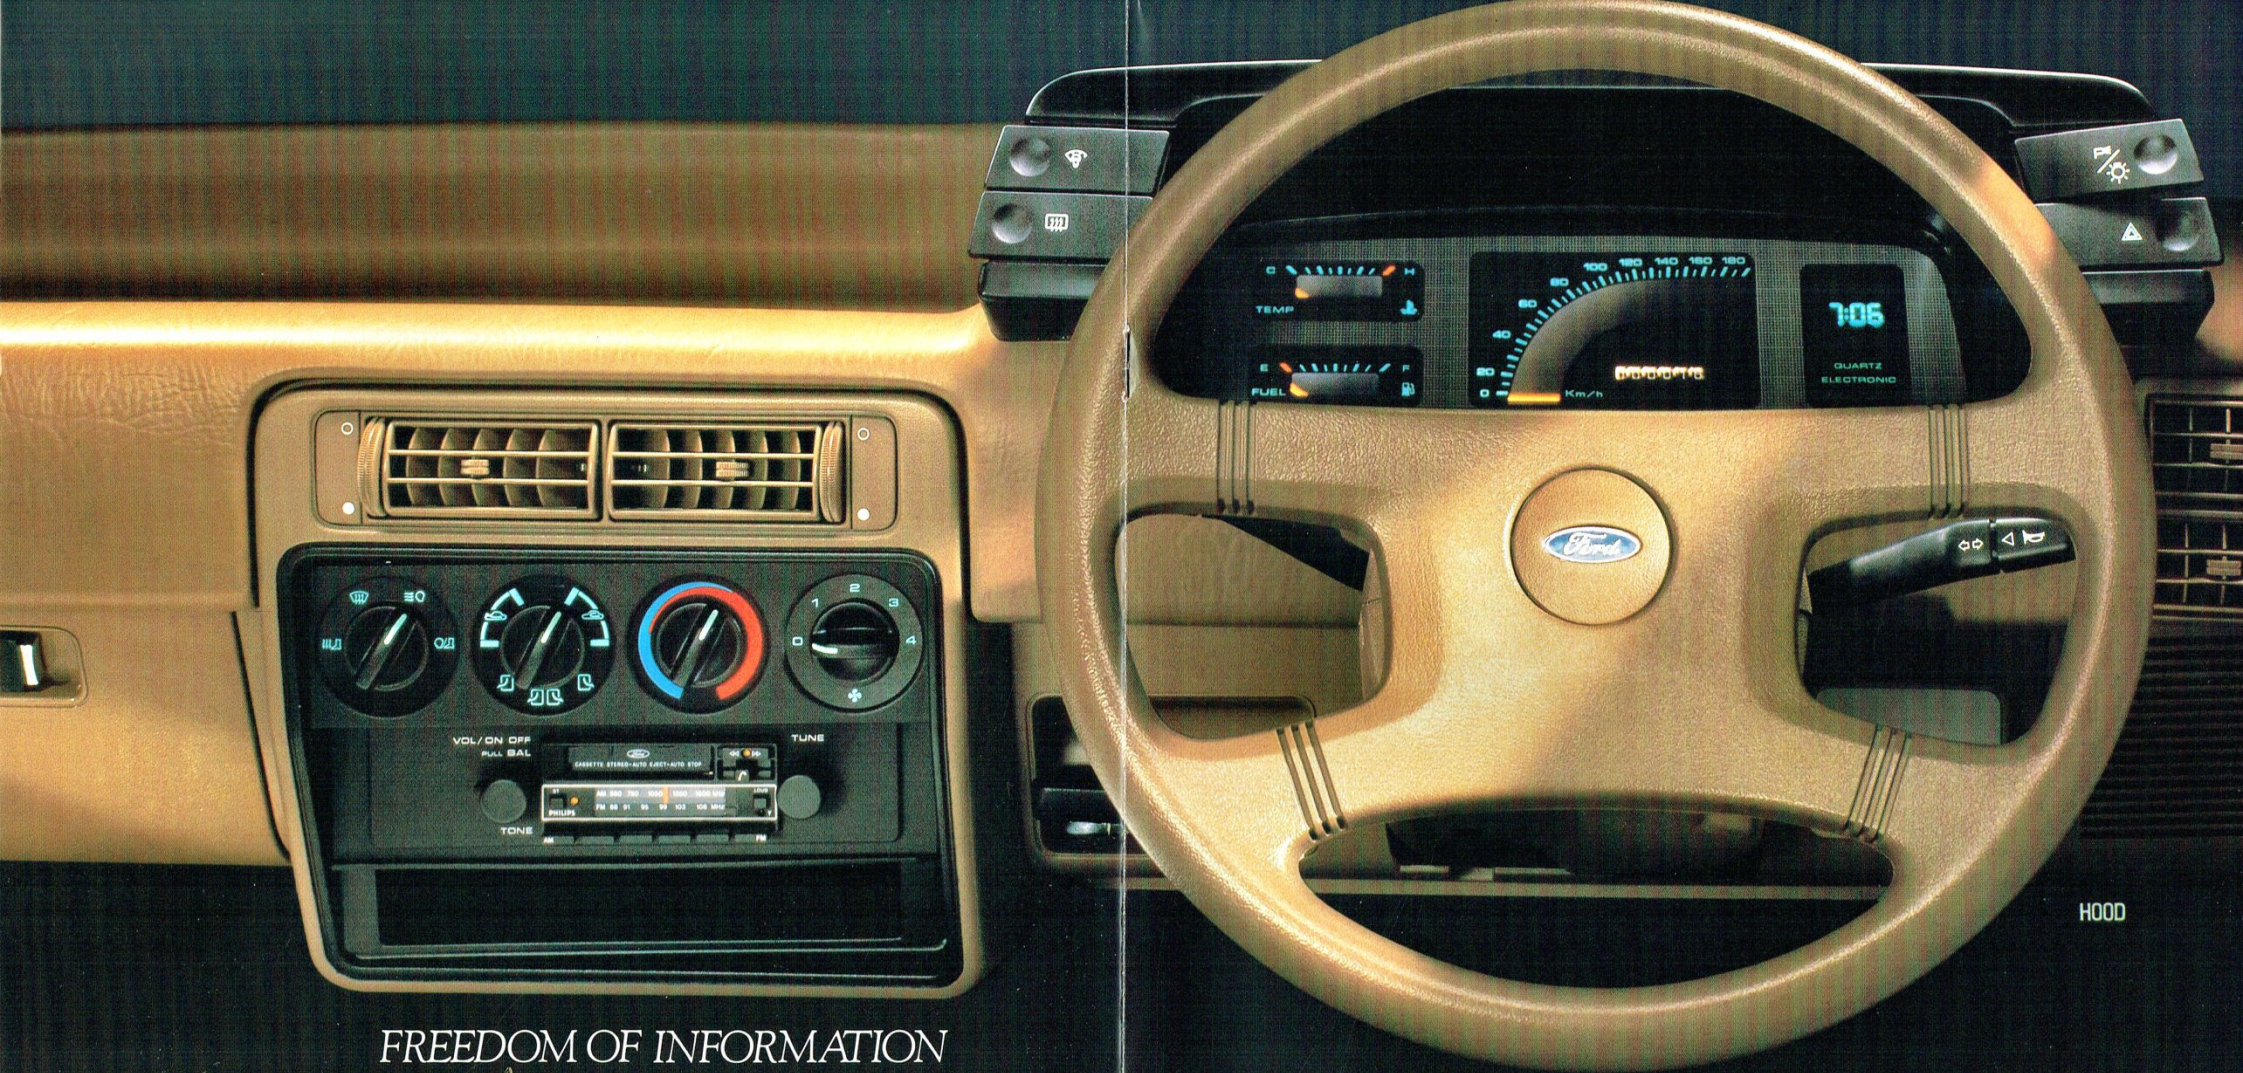

The large lockable glove box is wide enough and deep enough to be really useful.

And with the standard new push-button AM/FM radio cassette

player with twin speakers, you can envelop yourself in the sound of music with your favourite tapes or check what's going on in the outside world at the touch of a button. The central console has storage for coins, sunglasses, tape cassettes—another thoughtful touch.

It's an interior where the arrangement of the instruments and controls, the tinted glass all round and the comfortable seats contribute to relaxed, efficient and alert driving.

HOOD

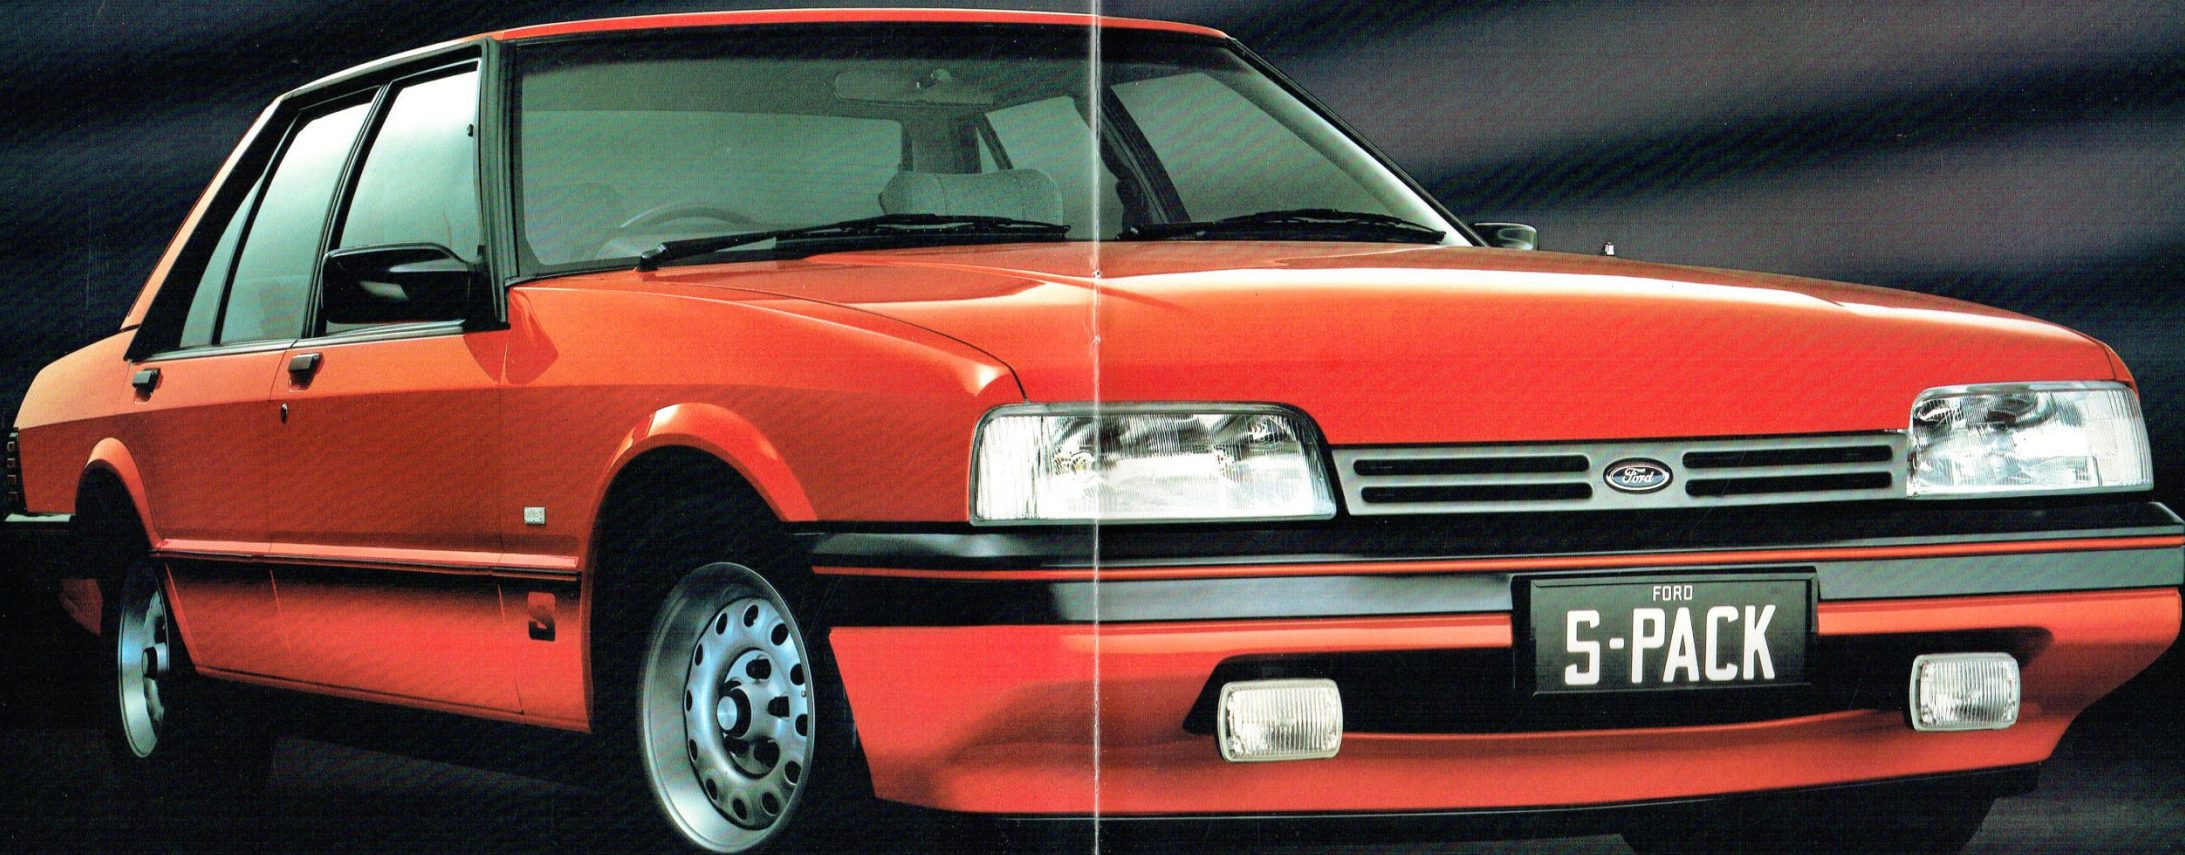

## FREEDOM OF INFORMATION

Information is yours at a glance with an instrument cluster featuring electronic speedometer, fuel and temperature gauges in easy to read scales. A digital clock is also standard. Surrounding the instrument cluster is a binnacle of switches within a finger's stretch of the steering wheel—another improvement in driver convenience.

All controls are within comfortable reach, easy to locate and operate in the dark, and precise in their action.

## FREEDOM OF THE INDIVIDUAL

The Falcon 'S' Pack gives you the freedom to be individualistic. For those who like to look a little different, the 'S' Pack features:

- Racey black body stripes.
- Fog lamps.
- Sports styled wheels and trim rings.
- Steering column rake adjustment.
- Adjustable lumbar support for the driver.
- Driver's seat tilt.
- Driver's footrest.
- Red 'Falcon' and 'S' badge at rear.
- Sporty tweed style fabric with check insets on the seats.
- A sports instrument cluster which

features an electronic vacuum fluorescent display incorporating a digital clock and dual bar graphs. These graphs display water temperature and fuel level or, at the press of a button, oil pressure and battery voltage. The display is controlled by a microprocessor which monitors, updates and indicates any malfunction in those systems.

## SPIRITED PERFORMANCE

There's more to new Falcon GL than good looks and great comfort. Under the bonnet you have a choice of three responsive six cylinder Alloy Head engines.

The 3.3 litre six has the reliability and economy that Falcon is famous for. Now greater performance and improved economy are achieved through the latest in lean-burn technology. Cleaner, faster combustion and reduced friction results in greater fuel efficiency. Similar improvements have been made to the popular and proven 4.1 litre engine.

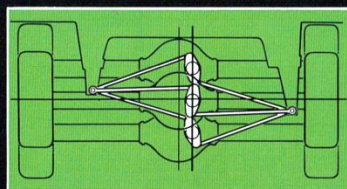

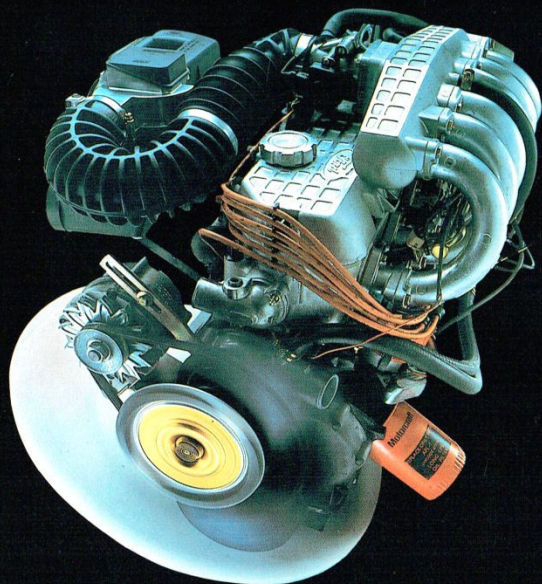

For those who need even more power, there is the option of the 4.1 EFI fuel injected engine, now controlled by the world's most advanced control system—EEC 4.

EEC 4 (Electronic Engine Control) is an onboard digital microcomputer which monitors or controls a number of vital engine functions including air flow, fuel flow and spark timing. It also provides an 'interactive spark strategy' in response to engine load, speed, temperature and time from start-up. The benefits of this highly advanced computer control system show up in better performance, smoother engine running, greater reliability and better fuel economy. And since the EEC 4 can interface with modern diagnostic servicing equipment, servicing becomes faster and more efficient.

### WATTS LINK REAR SUSPENSION SYSTEM

The proven Watts Link suspension system helps to provide excellent road holding and stability.

On uneven roads, during cornering and while towing, Falcon keeps firm contact with the road, while still providing a smooth comfortable ride.

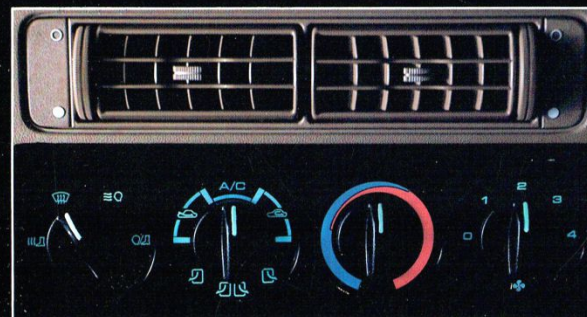

## FREEDOM OF CHOICE

Whichever way you wish to individualize your new Falcon, there's an exciting list of options for you to choose from. Two popular items are:

### AIR CONDITIONING

Who'd be without it these days...especially when it's as effective as Ford's exclusive, factory-fitted system. Easy-to-use controls and well-positioned outlets make total comfort a breeze. In models with console-mounted gearshifts, cool air outlets are provided for the rear seat passengers.

### CENTAFOLD

If you need seating for 6, you can specify the Centafold, instead of front bucket seats. The ingenious centre-armrest flips up to become the seat backrest and to provide comfortable seating for 3 in the front.

There are also other options for the performance minded including sports handling suspension and sure stopping 4 wheel disc brakes. Or you can choose the ease of power steering, smart alloy wheels and for caravanners there's a specially designed Falcon Tow Pack.

Ask your dealer for information about the other exciting options available.

About this brochure. This brochure is designed to provide you with a general introduction to the Ford Products (including available optional equipment) referred to, and should be read in conjunction with the latest specification sheets. Because of changes in conditions and circumstances Ford\* reserves the right, subject to all applicable laws, at any time, at their discretion, and without notice to discontinue or change the features, designs, materials, colours and other specifications and the prices of their products, and to either permanently or temporarily withdraw any such products from the market without incurring any liability to any prospective purchaser or purchaser.

The latest specification sheet should be referred to for information on the availability, ordering and use of optional equipment. Always consult an

Authorised Ford Dealer for the latest information with respect to features, specifications, prices, optional equipment and availability before deciding to place an order.
