

FORD FALCON S XR6

HAVE YOU DRIVEN A FORD...LATELY?

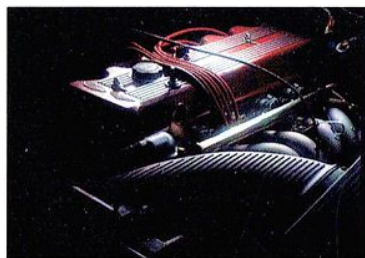

IT'S SMOOTH, QUICK, AGILE.
AND A SIX.

If you require first class accommodation for up to five people in a six cylinder sedan, Falcon offers several choices.

However, if you also wish to accommodate your enthusiasm for sports-style performance and handling, there is one exciting and extremely rewarding way to go: Falcon S XR6.

With a six cylinder engine straight from the hearts and minds of the engineers at Tickford Vehicle Engineering. It's a high output version of

the 4.0 litre Ford multipoint EFI six cylinder engine.

You'll have to drive one to believe what the Tickford people have done. This potent six develops 161kW of power and produces 365 Nm of

torque. That's performance of truly V8 proportions.

The performance is the result of a substantial engine redesign, including revisions to the cylinder head and camshaft design and new engine management programming.

The engine is also equipped with a 'twin bank' exhaust system which reduces gas velocity and improves performance.

Falcon S XR6 also takes to the road with quick-shifting 5-speed manual transmission, limited slip differential and four wheel power

disc brakes (with upgraded semi-metallic front pads and dual booster).

The sports suspension has been designed to deliver razor-sharp handling. With sports-tuned shock absorbers and bushes, front stabiliser bar, stiffened front and rear springs, lower ride height and special wheel alignment settings, Falcon S XR6 behaves impeccably.

The XR6 interior reflects the sporting nature of the car. The driver's seat has adjustable lumbar support and height control.

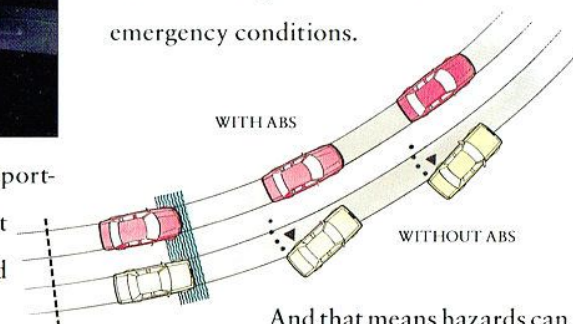

For optimum comfort and control, XR6 is equipped with a stylish leather MOMO steering wheel.

And for your enjoyment, XR6 has a deluxe stereo AM/FM radio and cassette player.

Street smart styling features include rear deck spoiler, body colour side mirrors and handsome bright-finish 15 inch alloy wheels.

And there are improved safety features including special seat-belt lockers, strengthened body pillars and Ford's sophisticated Anti-lock Braking System (ABS) fitted as standard equipment.

Not only does ABS mean shorter braking distances in most circumstances, more importantly it means you still have full steering control under emergency conditions.

And that means hazards can be more easily avoided by a combination of braking and steering.

So, for a 6-cylinder sedan that meets your need for room and satisfies your appetite for sports-style driving pleasure, come and test drive Falcon S XR6.

HAVE YOU DRIVEN A FORD...LATELY?
