

The NEW HOLDEN
CALAIS SERIES II

HOLDEN CALAIS STANDS APART FROM THE CROWD.

The new Holden Calais Series II. In every area in which a luxury motor vehicle can be evaluated, it stands apart from the crowd.

Whether you're considering performance, style, luxury or the host of practical features, there is simply no other vehicle quite like a Calais.

Powering Calais is Holden's brilliant ECOTEC V6 or the legendary V8 option; for enthusiasts, a further option is the exciting, 165kW Supercharged V6, unique to its class.

Calais Series II stands apart from the run-of-the-mill Australian luxury car, with driver and front passenger airbags as standard equipment, Variatronic road speed sensitive power steering, as well as the Bosch Anti-lock Braking System (ABS) and Independent Rear Suspension (IRS).

So it handles the whole range of Australian road conditions with the kind of

control and driving satisfaction that can be achieved only by continuous development, testing and manufacturing for this country's unique driving conditions.

And the new Calais Series II

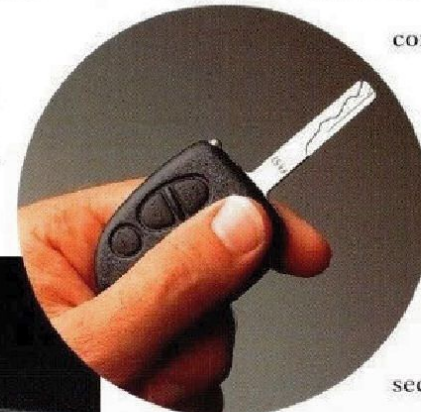

continues to impress with its distinctive accent styling. New 16" alloy wheels, integrated fog lamps and front fascia design enhances the high performance image.

Inside, Calais is just as impressive. Insulation hushes road noise. And the eight speaker sound system, featuring a 10 stack CD unit securely located in the boot, provides a superb

driving environment.

All this style sits comfortably in a spacious interior upholstered in Norfolk velour and leather, or the optional full Howe Leather. Rich, woodgrain style trim completes

remarkable for its range of intelligent electronic features: climate control, cruise control, a nine function trip computer, and even an auto adjustable aerial. Personal security is a priority

in the Calais as well. Holden's Power Key enables you to control the engine disabler and car alarm, lock and unlock all doors and open the boot, with ease.

If you're ready to stand apart and be judged on your performance and style, then your car has arrived: The new Holden Calais Series II.

For more information see your nearest Holden Dealer, or call 1800 035 464 for a brochure.
