

The Clipper Six Club Sedan

THE NEW PACKARD Clipper Six

Interior of the Clipper Six Club Sedan

LUXURIOUS NEW INTERIORS

that plus Clipper Styling

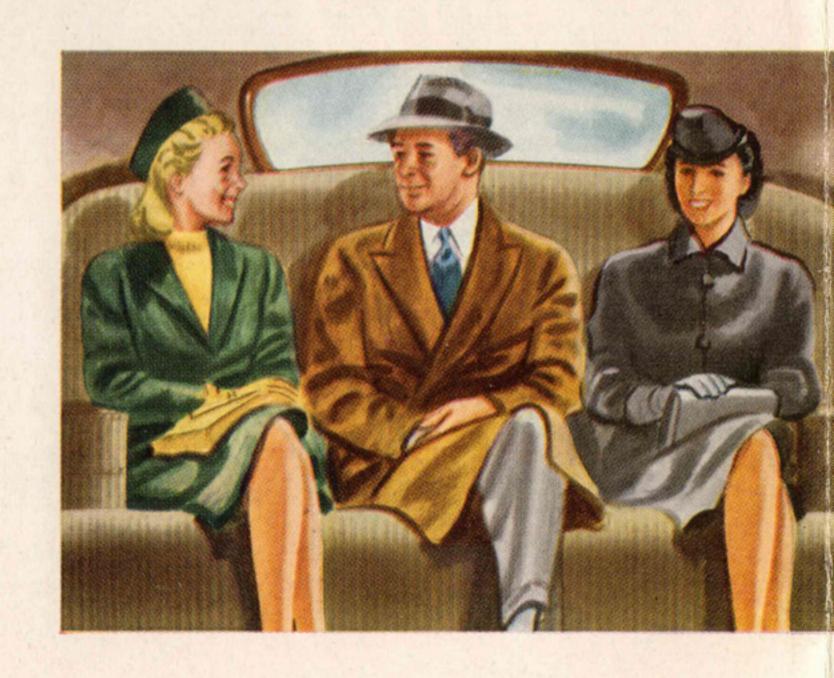

Here's all the roominess of Clipper styling . . . all the distinctive luxury of Packard coachwork . . . in a handsome new Six.

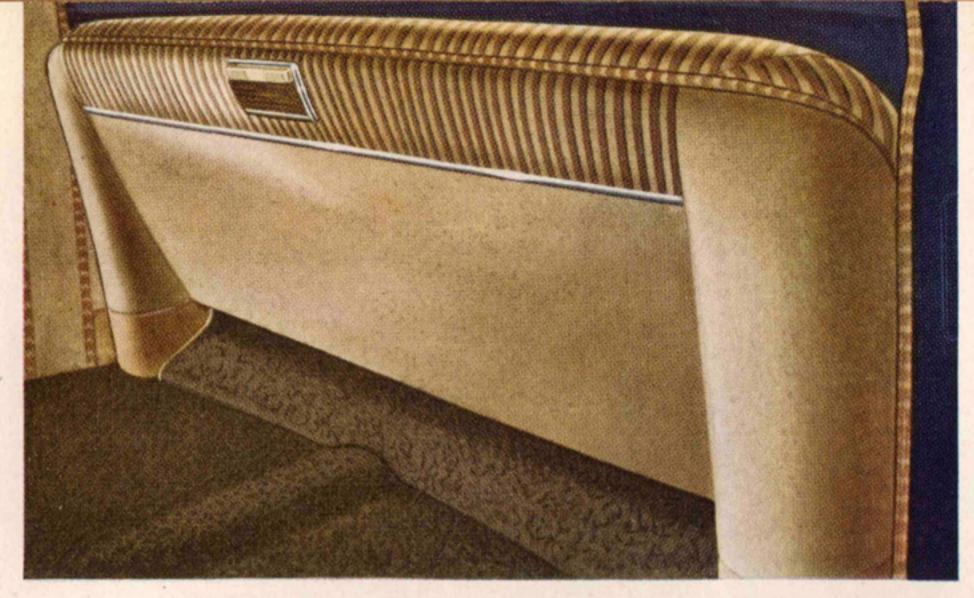

Thanks to *real* fade-away fenders, there's more than five feet of width between the front doors.

Thanks to streamlined styling that con-

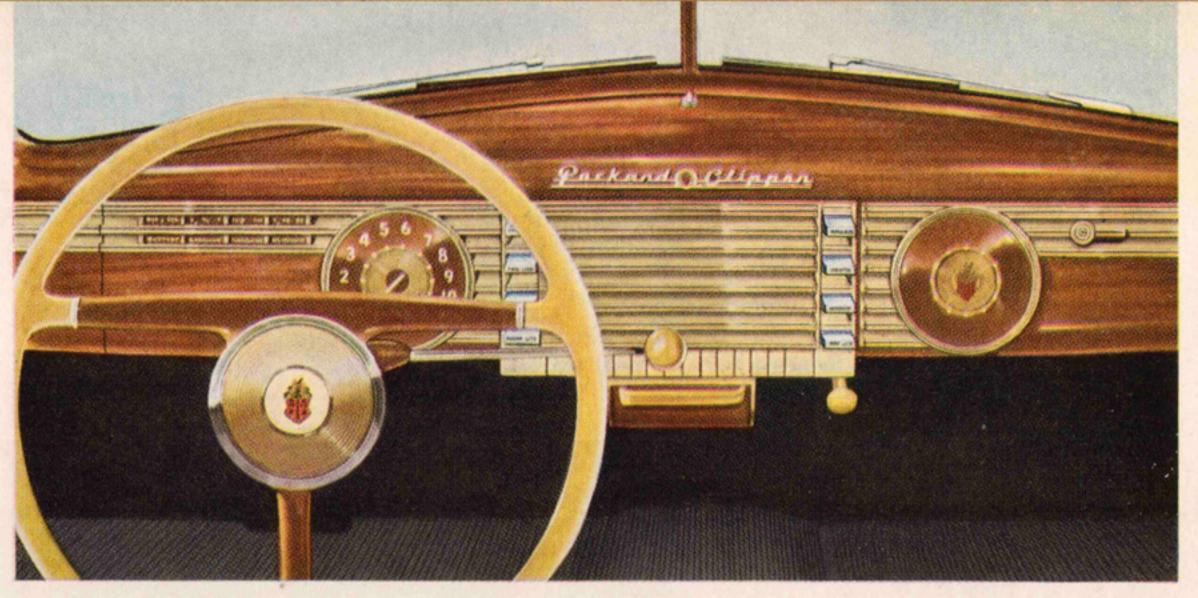

siders the passenger, there's full headroom not only in front, but in the rear, where it counts the most.

And then, to all this glorious roominess, Packard adds a new wealth of smart luxury touches—all the distinctive details that build an owner's lasting pride.

The uniquely recessed front seatback means additional leg-room for back seat passengers. The deep-cushioned upholstery is a rich worsted cord. The hardware has distinctive plastic trim.

Instruments are grouped for at-a-glance reading on the Clipper instrument panel—and there's a chatter-proof glove compartment door with rotary catch. The steering wheel is two-toned.

EYE CATCHING BEAUTY AND RICHNESS OF DETAIL

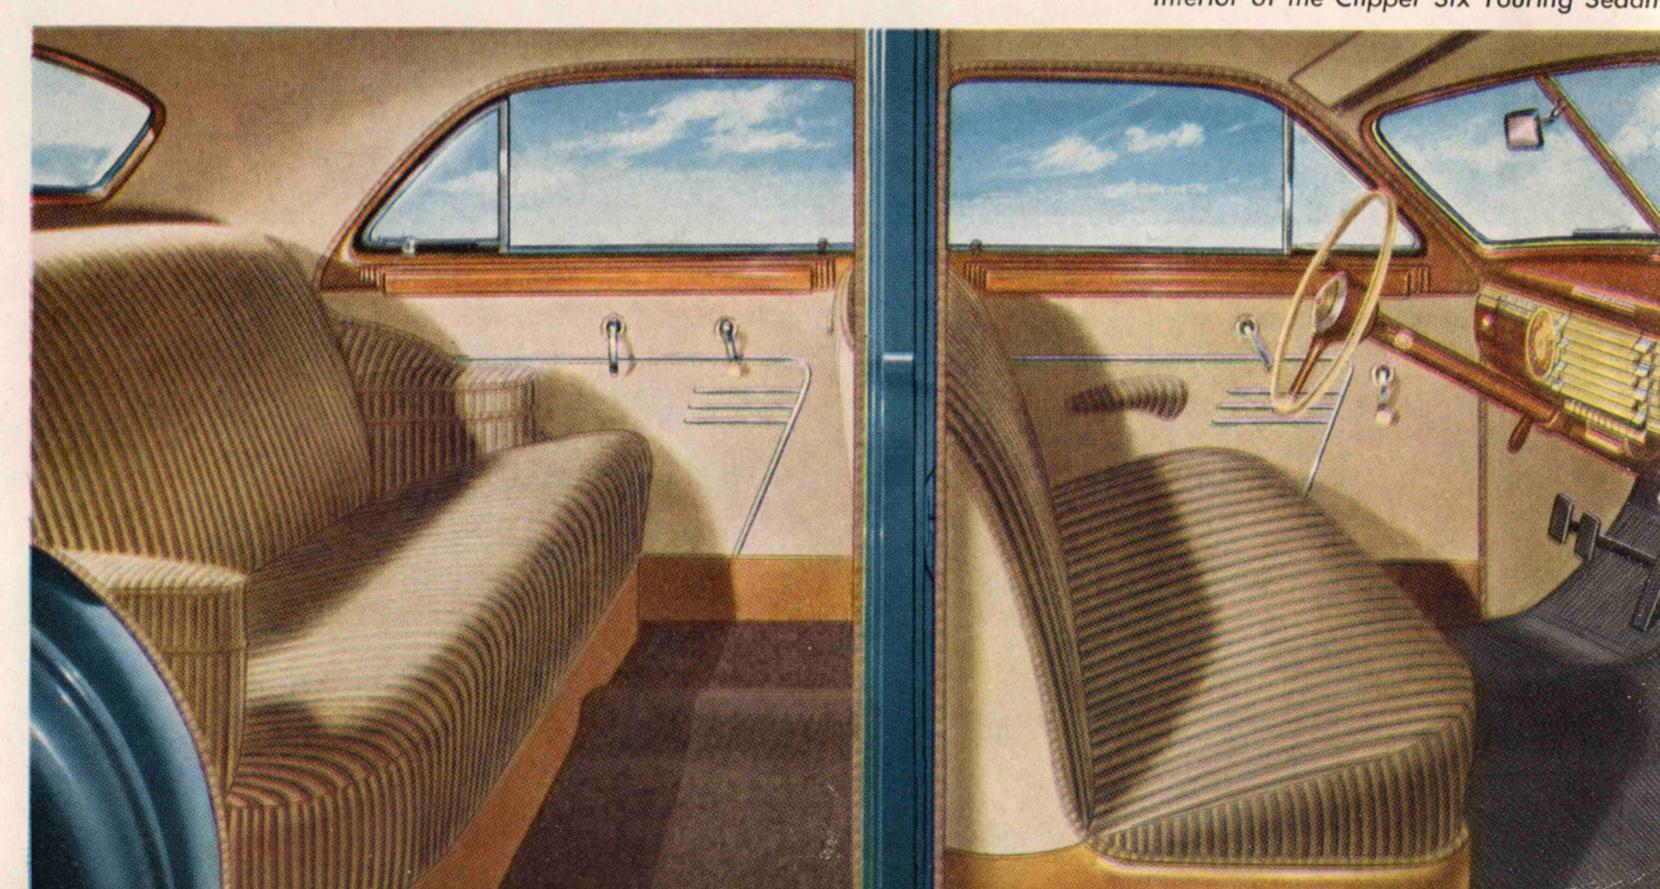

Picture yourself in this luxurious, wonderfully roomy Clipper touring sedan.

Surveying this gracious interior, you begin to admire not only the comfort but the lasting beauty of Packard design.

You know at once that every detail has profited from the careful attention so characteristic of Packard craftsmanship.

You can see the all-over value of a motorcar which now is 68 ways finer than its famous forerunner.

But your most pleasant experience is yet to come—the thrill of its smooth, fast, restfully quiet going on the open road.

Interior of the Clipper Six Touring Sedan

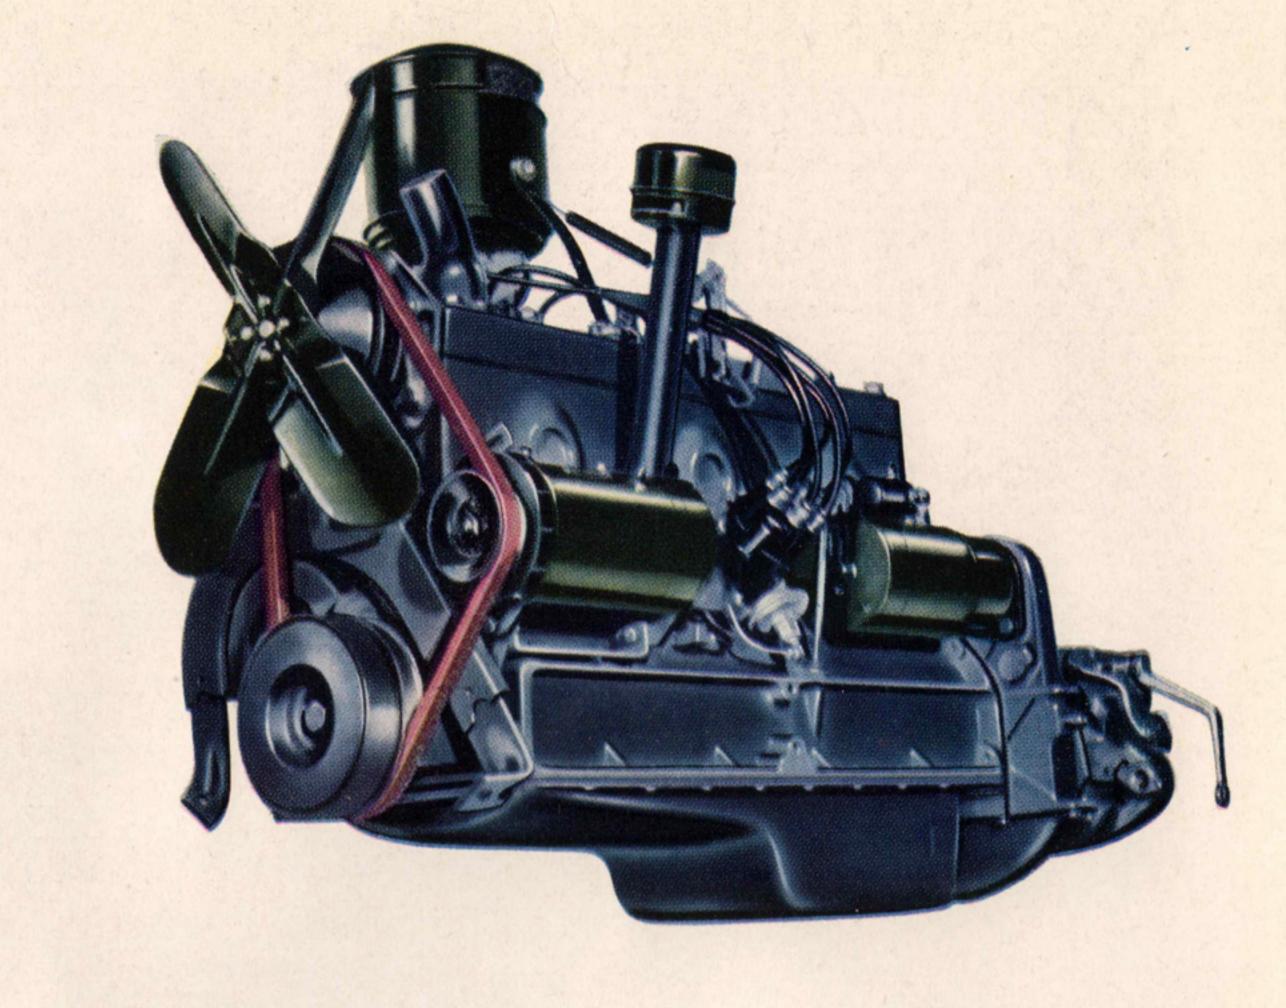

FAMED FOR PERFORMANCE

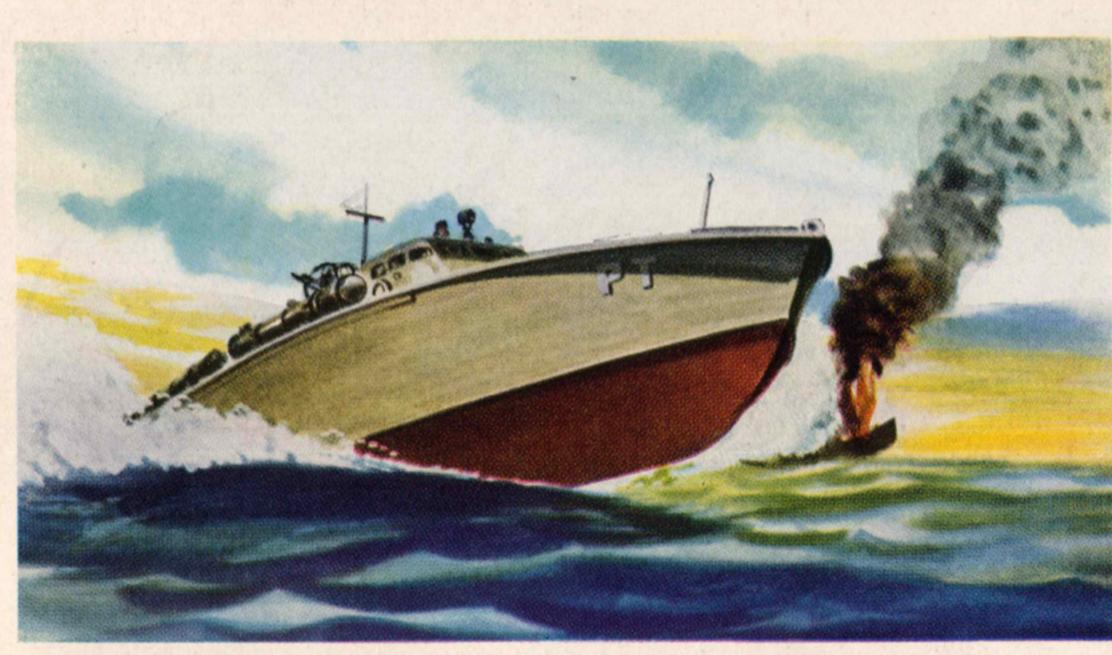

... cheered for its thrift

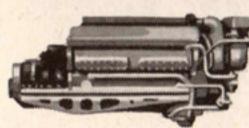

Here's the Six that's usually taken for an Eight. Precision-built for long and trouble-free life, it turns up a smooth and easy 105 H. P.

It can sink you back in the cushion with its take-off. It can ease you across a state without a murmur.

But the real secret of its popularity is a brand of pennypinching thrift that lets you sit back and *smile* when smallcar owners tell you how far they go on a gallon!

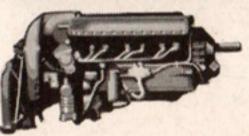

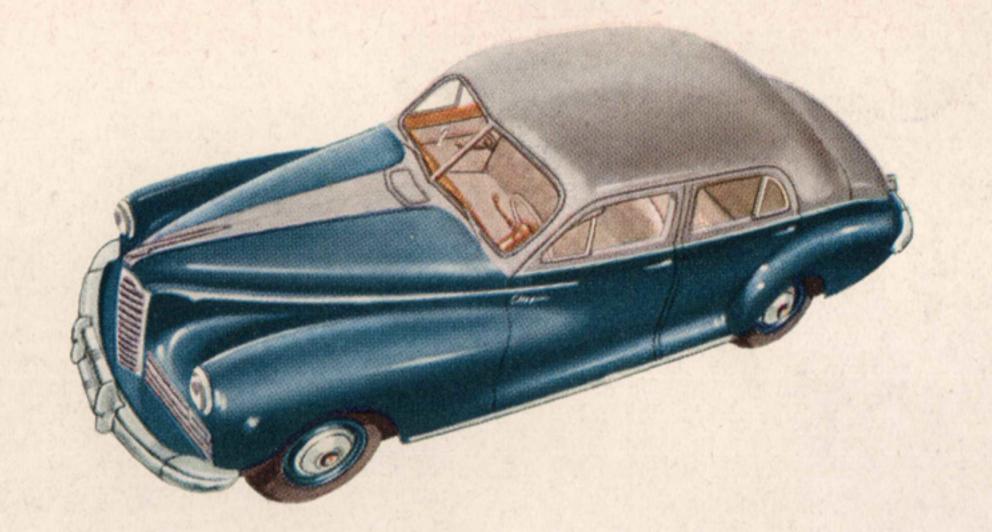

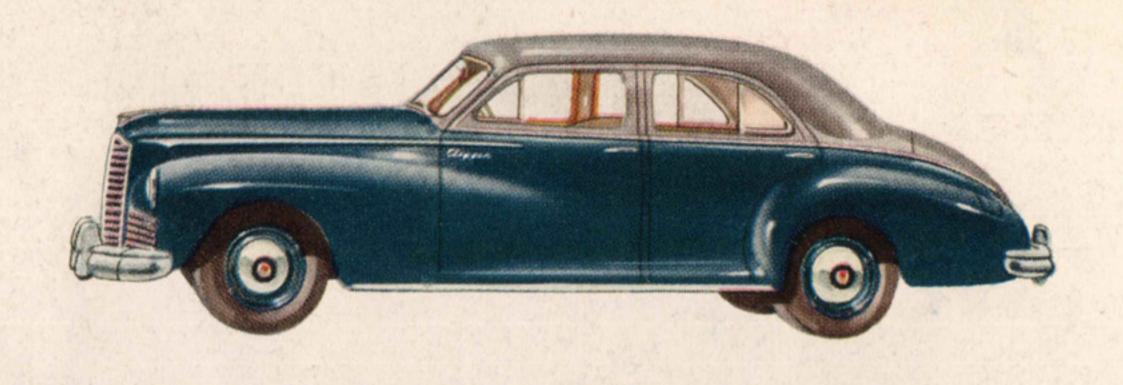

Sisters under the skin are the new Packard Six, and the Packard supermarine engines that powered every U. S. Navy PT Boat and many other types of Allied craft.

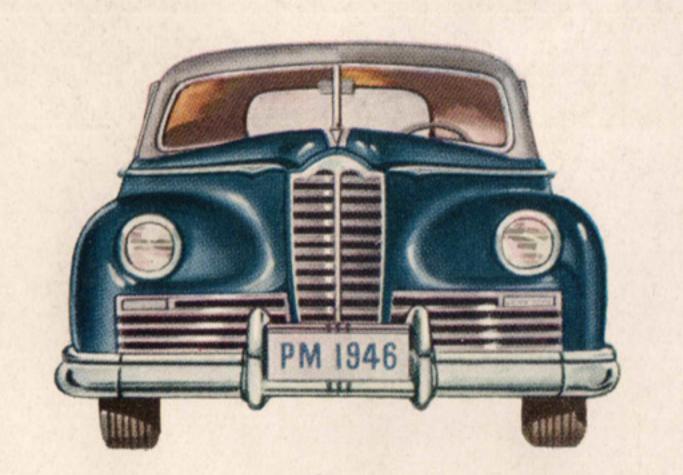

Packard added to its engine glory by mass-producing Rolls-Royce engines for Mustang fighters, Lancaster and Mosquito bombers, and other famous war planes.

CLIPPER STYLING...

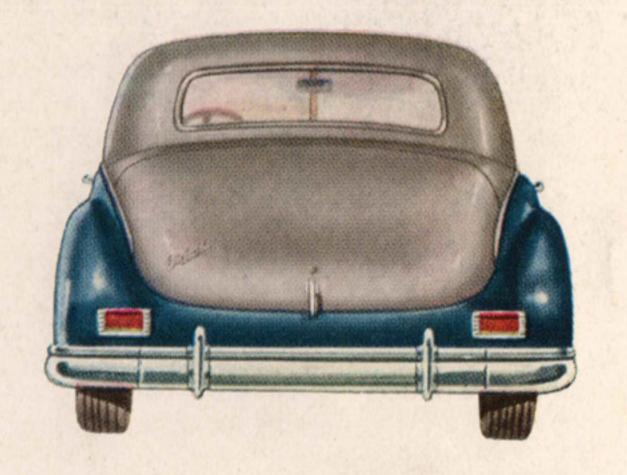

beautiful from every angle

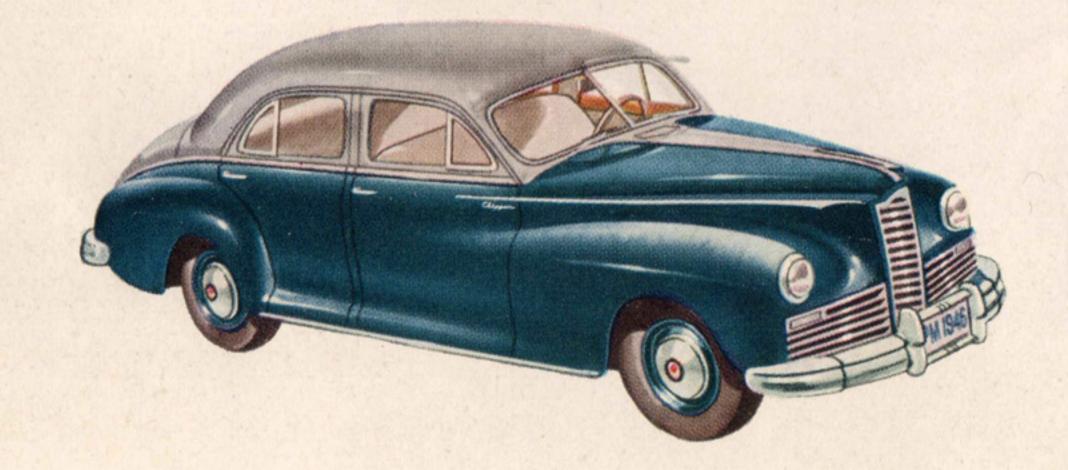

It's a miracle of metal-working, from the most modern plant in the automotive industry.

It's the only car on the road with real fade-away fenders which add to *inside* rather than outside width because they're not "tacked on"... they blend smoothly into the body.

From every angle it looks clean and smooth and fast . . . and every inch a Packard!

SPECIFICATIONS for PACKARD CLIPPER SIX

cially treated aluminum alloy, steel strut pistons with coil-spring-expanded oil control rings. Bore and stroke 3½ inches x 4¼ inches. Compression ratio 6.71 to 1. Brake horsepower 105 at 3600 r. p. m. Crankshaft weight 81½ pounds. Four main bearings. Removable precision type main and connecting rod bearings. Neutropoised, three point rubber engine mountings.

to all main, connecting rod, camshaft, and piston pin bearings, also to valve tappets. Floating oil screen.
