A NEW INTERNATIONAL
ULTRA-LUXURY TOURING COUPE

C A D I L L A C

S T Y L E

ELDORADO TOURING COUPE

Distinctive sail panel identification.

A new driver's coupe of international caliber.

The Eldorado Touring Coupe. Totally refined to enhance the driving experience.

More than five hand-selected cowhides of ultra-soft leather are bound to the seats of this five-place coupe. The front bucket seats with 10-way power-adjustment and hand-stitched,

leather-wrapped tilt steering wheel rim readily adapt to your optimal driving position. Birdseye maple wood, hand-finished to a reflective lustre, frames the instrument panel and console.

From the grille-mounted wreath and crest to the dual-outlet exhausts, the

driving mission of the Eldorado Touring Coupe is reinforced. Even the heated outside mirrors are tinted blue and the electrochromic inside rearview mirror dims automatically to reduce the glare of headlights from cars lagging behind the Eldorado Touring Coupe.

ELDORADO TOURING COUPE

The Eldorado Touring Coupe maintains the balance of power, refinement and safety.

A Cadillac-exclusive 4.5 liter V8 generates abundant horsepower and torque, yet is precision engineered to apply force smoothly and effortlessly. The 3.33:1 effective final drive ratio helps deliver responsive acceleration. The Eldorado Touring Coupe's fully independent touring suspension provides you with crisp cornering and a firm road feel, yet it isolates you from uneven road surfaces. And, of course, all Cadillacs are equipped with some of the most sophisticated safety technology—from the standard driver's-side Supplemental Inflatable Restraint system (air bag), to PASS Key®, the world's most sophisticated anti-theft system.

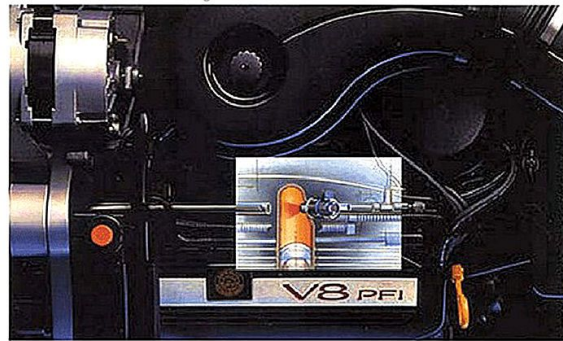

The added control of advanced anti-lock brakes—standard.

By reducing the chance of wheel lock-up during hard stops and when braking on slippery surfaces, anti-lock brakes help maintain steering control. The ABS computer modulates the brakes up to fifteen times per second when a wheel begins to lock.

A sophisticated V8 engine transports you with dispatch.

The precision of sequential port fuel injection controls fuel delivery to each cylinder, infinitely adapting for throttle angle, temperature and altitude. Premium materials—like chrome vanadium valve springs, cast magnesium rocker covers and Super Alloy X751 exhaust valves—are chosen for their abilities to meet exacting tolerances and durability standards.

Inspired performance.

A transverse fiberglass rear spring with Superlift shock absorbers and stabilizer bar helps deliver spirited handling without unwanted harshness.

More power to express yourself.

Sophisticated performance. Ultra-luxury amenities. Distinctive refinements. The new Eldorado Touring Coupe. Your Cadillac® dealer invites you to take a thorough test drive.

Standard 16" x 7"
Cadillac-exclusive
diamond-finish forged
aluminum alloy wheel.
