DE VILLE

Cadillac. Changing the way you think about American automobiles.

PERFORMANCE AND TECHNOLOGY

Cadillac introduces change—the exclusive Northstar System, with the 32-valve Northstar V8, Road-Sensing Suspension and Speed-Sensitive Steering

in the 1993 Allanté, Seville STS, Eldorado Touring Coupe and Eldorado Sport Coupe. Further, all other front-drive Cadillacs employ both Speed-Sensitive Suspension and Speed-Sensitive

Steering. Together, they balance the seeming paradox of performance, comfort and tenacious traction.

SAFETY

Cadillac is the leading manufacturer of automobiles with V8 power, anti-lock braking (ABS), and a driver-side air bag, all standard. And now

Cadillac offers front passenger-side air bags on many models. Integrated active and defensive safety systems are designed into every Cadillac.

OWNERSHIP

Cadillac Owner Privileges. Our unmatched pledge to respond to your needs.

With 24-hour on-call assistance from the finest roadside service program of its kind, enhanced by a no-charge loaner car for warranted repair, plus a portfolio of other services. And backed by outstanding warranties, which make a Cadillac as pleasant to own as it is to drive.

THE INSTINCTIVE TECHNOLOGY OF CADILLAC PERFORMANCE

The 1993 Cadillacs offer a fine blend of instinctive technology and performance that help enhance your driving control. Refined V8 power, long a Cadillac hallmark, reaches new levels of sophistication with the Northstar System, offering as much as 295 horsepower; as much as 300 lbs.-ft. of torque. V8 power in Cadillacs lets you pass and merge with such confidence, it is changing the way people think about American automobiles.

ELEGANCE AND BALANCE

Cadillac achieves a special balance between power and your driving needs through advanced, electronically controlled transmissions. With anti-lock braking (ABS), standard on every Cadillac. With Traction Control, standard on more Cadillacs than ever. With Short/Long Arm (SLA) rear suspensions that optimize ride characteristics to balance high-speed requirements with a Cadillac ride.

Three refined drive chains operate the Northstar V8's four camshafts. Design goals: no replacement or adjustments for 100,000 miles, and uncompromised quiet.

Refer to individual car line sections for feature availability.

This 295-hp, 4.6L, DOHC 32-valve Northstar V8 requires its first scheduled tune-up at 100,000 miles, except for normal fluid and filter replacement. Its design created the need to refine every driving system to effectively apply this spirited power to the road.

ADAPTING TO CHANGING DRIVING CONDITIONS

Traction Control, standard on many Cadillacs, uses anti-lock braking technology to help limit acceleration wheel spin in the same manner that ABS limits braking wheel slip. The result is a feeling of increased control during changing road conditions.

Electronic control of every front-drive Cadillac automatic transmission delivers barely detectable shifts, enhancing your driving pleasure.

The advanced aerodynamics of each body help reduce fuel usage during highway travel.

ADAPTIVE TECHNOLOGY

Every 1993 front-drive Cadillac automatically adapts to changing road conditions to help give you the control you need during changing driving conditions.

BROAD RPM RANGE

Advanced engine design and materials contribute to expanded performance over a broad rpm range.

SHORT/LONG ARM

The Short/Long Arm rear suspension minimizes rear-wheel camber change for consistent tire patch contact.

1993 ALLANTE

Shown in new available Pearl Red.

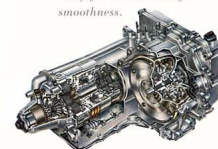

TRACTION CONTROL

Advanced electronic Traction Control helps limit wheel spin on both front- and rear-drive Cadillacs.

4T80-E TRANSMISSION

Bands and clutches within the 4T80-E automatic are applied and released progressively, rather than simultaneously, for enhanced shift smoothness.

INSTINCTIVE

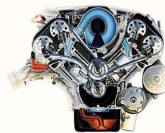

T E C H N O L O G Y

THE INSTINCTIVE TECHNOLOGY OF CADILLAC PERFORMANCE

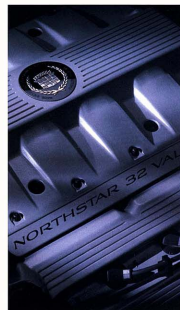

The 1993 Cadillacs offer a fine blend of instinctive technology and performance that help enhance your driving control. Refined V8 power, long a Cadillac hallmark, reaches new levels of sophistication with the Northstar System, offering as much as 295 horsepower; as much as 300 lbs.-ft. of torque. V8 power in Cadillacs lets you pass and merge with such confidence, it is changing the way people think about American automobiles.

ELEGANCE AND BALANCE

Cadillac achieves a special balance between power and your driving needs through advanced, electronically controlled transmissions. With anti-lock braking (ABS), standard on every Cadillac. With Traction Control, standard on more Cadillacs than ever. With Short/Long Arm (SLA) rear suspensions that optimize ride characteristics to balance high-speed requirements with a Cadillac ride.

Three refined drive chains operate the Northstar V8's four camshafts. Design goals: no replacement or adjustments for 100,000 miles, and uncompromised quiet.

This 295-hp, 3.6L, DOHC 32-valve Northstar V8 requires its first scheduled tune-up at 100,000 miles, except for normal fluid and filter replacement. Its design created the need to refine every driving system to effectively apply this spirited power to the road.

Refer to individual car line sections for feature availability.

ADAPTING TO CHANGING DRIVING CONDITIONS

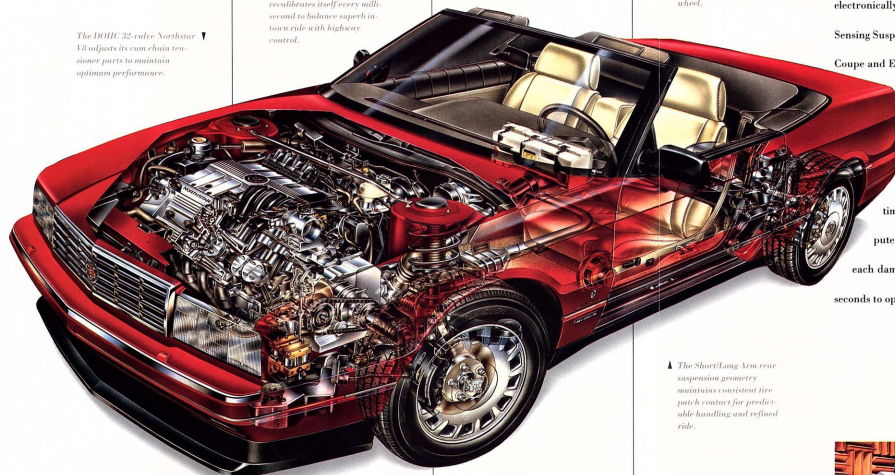

Traction Control, standard on many Cadillacs, uses anti-lock braking technology to help limit acceleration wheel spin in the same manner that ABS limits braking wheel slip. The result is a feeling of increased control during changing road conditions.

Electronic control of every front-drive Cadillac automatic transmission delivers barely detectable shifts, enhancing your driving pleasure.

The advanced aerodynamics of each body help reduce fuel usage during highway travel.

THE NORTHSTAR SYSTEM

The DOHC 32-valve Northstar V8 adjusts its cam chain tensioner parts to maintain optimum performance.

Road-Sensing Suspension recalibrates itself every millisecond to balance superb in-town ride with highway control.

Speed-Sensitive Steering adds a firm sense of control as speed increases.

Four-channel ABS detects impending wheel lock-up and applies braking at each wheel.

HANDLING REFINED-ELECTRONICALLY

What was on the drawing board a decade ago is today's reality: electronically controlled suspensions. From the exclusive Road-Sensing Suspension on Allanté, Seville STS, Eldorado Touring Coupe and Eldorado Sport Coupe to the sophisticated Speed-Sensitive Suspension on all other front-drive Cadillacs, you are in control. So in control, in fact, that at 60 mph, Road-Sensing Suspension (RSS) actually reads the road one inch at a time and adjusts each wheel accordingly. The RSS computer calculates and selects either soft or firm mode, and each damper unit responds within 10-15 milliseconds to optimize ride and handling.

Fleetwood's standard electronic variable-assist steering helps provide maximum assistance for parking.

Road-Sensing Suspension constantly adapts to changing driving conditions.

This road simulator dramatically shows how Road-Sensing Suspension isolates the Allanté from major road disturbances.

Electronically-controlled four-speed transmission applies upshifts and downshifts in an unintrusive manner.

Equal-length drive axles deliver power to both front wheels smoothly during acceleration.

Goodyear Eagle GA Z-rated tires are among the first to combine Z-rated speed capability with quiet tread design, mud-and-snow and all-season performance.

FINE WOODS, SUPPLE LEATHERS, INSTINCTIVE COMFORT

American walnut. Exotic Zebrano wood. Glove-soft, aromatic Nuance leathers. Lustrous clearcoat finishes. Chromed aluminum wheels. Elegance that rewards the senses when you drive. Beneath this elegance, protection befitting a Cadillac.

PRINT OVER PRINT ON TOP OF PRINT

Layer after layer of paint, each with a specific function, covers galvanized steel with an unsurpassed zinc coating thickness that protects both sides of every steel body panel needing protection from corrosion. This multi-step finishing begins with cleaning, phosphate coating, electrodeposition and primer-surfacers. Rich color coats and a final clearcoat top coat create Cadillac elegance. It is backed by a rust-through corrosion warranty that's 6 years/100,000 miles long. Allanté: 7 years/100,000 miles.

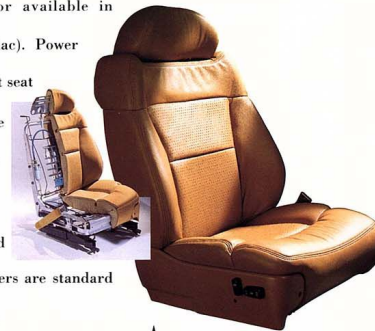

Solar control glass screens out 57% of the sun's rays to keep you cooler, reduce glare and prolong interior beauty.

The quality paint system, including a clearcoat top coat, produces a rich luster.

Refer to individual car line sections for feature availability.

INVITING COMFORT

Settle into sumptuous, hand-fitted leather seating areas (standard or available in every Cadillac). Power six-way front seat adjusters are standard on every 1993 Cadillac, and power recliners are standard or available.

THE PARTICULARS OF COMFORT
Cadillac offers front seats that permit independent back and seat cushion power adjustment. Cadillac also offers available heated front seating. Further, the Sixty Special Ultra seating package looks after your comfort with 22-way power adjustment.

Patented seat design (inset) cradles you securely while moving in unison with ride motions. Supple Nuance leather seating areas (above) are garment-soft yet instilled with longevity against abrasion and ultraviolet exposure.

Cadillac is the first manufacturer to offer these optional new, quality chrome-plated (over squeeze-cast aluminum) wheels. They meet all GM criteria for appearance and durability. (Sixty Special and DeVille wheel shown.)

Advanced acoustic research, highlighted by on-board digital recording, helps both locate and minimize noise.

A TOTAL SAFETY SYSTEMS APPROACH

Instinctive performance qualities contribute to your safety. Every Cadillac is V8-equipped for power to pass and merge. Every Cadillac has a standard anti-lock braking system (ABS) that enhances braking capability. Suspensions that offer superb control. Designs that help you avoid a collision in the first place.

THE POWER MANAGEMENT OF TRACTION CONTROL

Traction Control, now standard on most Cadillacs, uses anti-lock braking technology to monitor traction and help prevent wheel spin. Traction Control manages power (under 30 mph on De Ville and Sixty Special) and helps keep you in control.

VISIBILITY ENHANCEMENT

Large, easy-to-read instrumentation, Electrochromic automatic dimming rearview mirrors, electrically heated rear window and outside rearview mirrors, a superb heating and defrosting system, plus an available heated windshield help you see your environment more clearly.

Standard Traction Control (Fleetwood Brougham shown) helps minimize wheel spin on virtually any road surface.

The refined 200-hp, 4.9L V8 offers abundant power reserves to help you merge and pass with confidence.

In less than half a second, advanced electronics silently dim the Electrochromic inside and outside driver mirrors in response to headlights behind you.

Snap your fingers. In less time than that, ABS gives you active control over braking on slippery surfaces, affording you the ability to maintain steering control.

"READ-THI-ROAD" SUSPENSION

Road-Sensing Suspension on Allanté, Seville STS, Eldorado Touring Coupe and Eldorado Sport Coupe

monitors vehicle wheel position and body motion and, in milliseconds, alternates between soft and firm

to keep you in control when you accelerate, turn or brake. Further, every coupe and sedan features standard rear automatic level control that keeps your Cadillac riding smoothly and the headlights properly aligned to the road.

YEARS AHEAD OF THEIR TIME

You benefit from Cadillac's years of thorough commitment to defensive safety systems.

Every 1993 Allanté, Eldorado, Seville and Fleetwood exceeds federal dynamic side-impact standards required of all automobiles in 1997. It is one of many defensive mechanisms Cadillacs offer now for your security.

STRONG AS STEEL, SOFT AS AIR

A strong steel safety cage surrounds the passenger compartment. Energy-absorbing crush zones, front and rear, help absorb collision energy and deflect it away from seating areas. 1993 Cadillacs feature a standard driver-side air bag; Fleetwoods, Eldorados

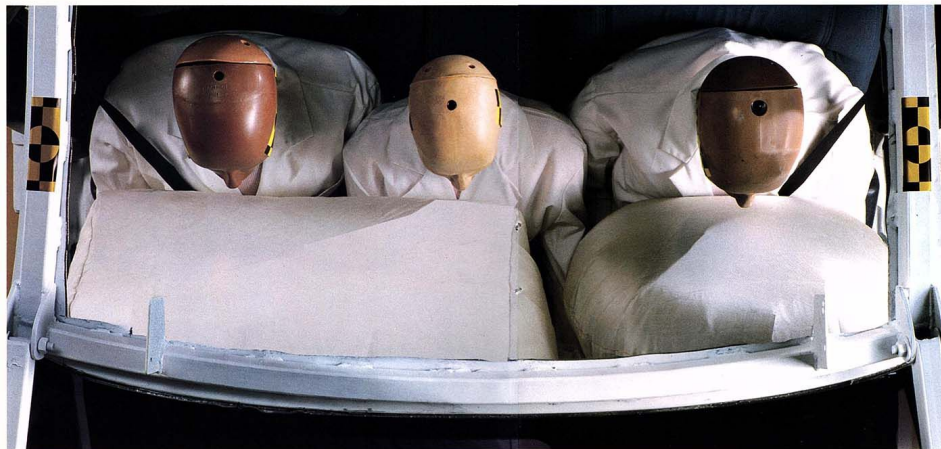

and Sevilles have the added protection of a standard front passenger-side air bag. Cadillac air bags contain self-diagnostics and require no annual inspection.

Gold, with its superior conductivity, is applied to air bag sensor contacts in every 1993 Cadillac.

Integrated defensive safety systems: reinforced doors, steel safety cages, smoothly rounded interior contours, lap/shoulder belts at all outboard seats and the latest air bag technology work in harmony to help protect you.

- Driver-side air bag on every Cadillac
- Rear-door child security lockout
- Mini-wedge door latch and striker
- Automatic door locks
- Gold-plated air bag sensor contacts

In conjunction with the safety belt system, the Fleetwood driver and passenger air bags provide some additional protection for up to three front-seat occupants.

Structural integrity enables all 1993 Allanté, Eldorado, Seville and Fleetwood models to pass 1997 federal side-impact standards.

Refer to individual car line sections for feature availability.

Dual-mode cinching front lap belt on all Cadillacs allows the passenger lap/shoulder belt to securely restrain a child seat (Allanté shown).

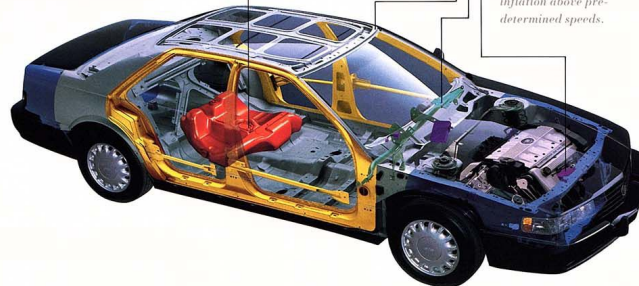

The fuel tank of the Seville is placed forward of the rear wheels and suspension for protection in a collision.

Rugged steel safety cage, with strong steel sections along the roof (except convertible), pillars and rocker panels, helps protect you and your family.

Rigid, reinforced instrument panel beams contribute to the passenger-surrounding steel safety cage.

Strategically placed air bag sensors trigger inflation above pre-determined speeds.

OCCUPANT PROTECTION

Manual lap/shoulder safety belts, driver and right-front passenger, plus Supplemental Inflatable Restraint (driver air bag, all Cadillacs; driver/front-passenger air bags, Eldorado Sport Coupe, Eldorado Touring Coupe, Eldorado, Seville, Seville STS, Fleetwood)

Manual lap safety belts, center seat positions

Manual lap/shoulder safety belts, outboard rear-seat positions

Energy-absorbing steering column

Energy-absorbing instrument panel

Interlocking door latches

Folding front seatback locks, inertia type, two-door models

Safety armrests

Breakaway inside rearview mirror

Security door locks and door retention components

Laminated windshield glass, urethane bonded

Head restraints, driver and right-front passenger (adjustable, all Cadillacs; rear seats (integral) Seville, Eldorado)

Side-guard door beams

Passenger-guard inside door lock handles (except Allanté)

Front and rear crush zones

Tempered safety glass, side and rear windows

Dual sun visors

Pressure-relief radiator cap

Automatic door locking system standard: De Ville, Touring Sedan, Sixty Special, Seville STS, Eldorado Touring Coupe, Seville, Fleetwood

Child security locks (all Cadillac sedans)

Starter safety switch

Dual-action hood latch

Low-glare finish-inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces

Illuminated heater and defroster controls

Illuminated windshield wiper and washer controls (Allanté)

Tires with built-in tread wear indicators

Safety road wheel rims

Audible disc brake lining wear indicators

Anti-lock brakes (all Cadillacs, standard)

Brake/transmission shift interlock (all Cadillacs, standard)

Pressure-relief fuel cap

Door warning lights: Allanté, Coupe de Ville, Sedan de Ville, Sixty Special Sedan, Door warning reflectors: Eldorado, Eldorado Touring Coupe, Seville, Seville STS, Fleetwood

Parking lamps

Four-way hazard warning flashers

Back-up lamps

Directional signal control

Windshield defrosters, washer and multi-speed wipers

Inside daytime rearview mirror

Outside left and right rearview mirrors

Brake system with dual master cylinder plus warning light

Center high-mounted stop lamp

Starter safety switch

Dual-action hood latch

Low-glare finish-inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces

Illuminated heater and defroster controls

Illuminated windshield wiper and washer controls (Allanté)

Tires with built-in tread wear indicators

Safety road wheel rims

Audible disc brake lining wear indicators

Anti-lock brakes (all Cadillacs, standard)

Brake/transmission shift interlock (all Cadillacs, standard)

Pressure-relief fuel cap

Door warning lights: Allanté, Coupe de Ville, Sedan de Ville, Sixty Special Sedan, Door warning reflectors: Eldorado, Eldorado Touring Coupe, Seville, Seville STS, Fleetwood

Child security locks (all Cadillac sedans)

Starter safety switch

Dual-action hood latch

Low-glare finish-inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces

Illuminated heater and defroster controls

Illuminated windshield wiper and washer controls (Allanté)

Tires with built-in tread wear indicators

Safety road wheel rims

Audible disc brake lining wear indicators

Anti-lock brakes (all Cadillacs, standard)

Brake/transmission shift interlock (all Cadillacs, standard)

Pressure-relief fuel cap

Door warning lights: Allanté, Coupe de Ville, Sedan de Ville, Sixty Special Sedan, Door warning reflectors: Eldorado, Eldorado Touring Coupe, Seville, Seville STS, Fleetwood

Child security locks (all Cadillac sedans)

Starter safety switch

Dual-action hood latch

Low-glare finish-inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces

Illuminated heater and defroster controls

Illuminated windshield wiper and washer controls (Allanté)

Tires with built-in tread wear indicators

Safety road wheel rims

Audible disc brake lining wear indicators

Anti-lock brakes (all Cadillacs, standard)

Brake/transmission shift interlock (all Cadillacs, standard)

Pressure-relief fuel cap

Door warning lights: Allanté, Coupe de Ville, Sedan de Ville, Sixty Special Sedan, Door warning reflectors: Eldorado, Eldorado Touring Coupe, Seville, Seville STS, Fleetwood

Child security locks (all Cadillac sedans)

Starter safety switch

Dual-action hood latch

Low-glare finish-inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces

Illuminated heater and defroster controls

Illuminated windshield wiper and washer controls (Allanté)

Tires with built-in tread wear indicators

Safety road wheel rims

Audible disc brake lining wear indicators

Anti-lock brakes (all Cadillacs, standard)

Brake/transmission shift interlock (all Cadillacs, standard)

Pressure-relief fuel cap

Door warning lights: Allanté, Coupe de Ville, Sedan de Ville, Sixty Special Sedan, Door warning reflectors: Eldorado, Eldorado Touring Coupe, Seville, Seville STS, Fleetwood

Child security locks (all Cadillac sedans)

Starter safety switch

Dual-action hood latch

Low-glare finish-inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces

Illuminated heater and defroster controls

Illuminated windshield wiper and washer controls (Allanté)

Tires with built-in tread wear indicators

Safety road wheel rims

Audible disc brake lining wear indicators

Anti-lock brakes (all Cadillacs, standard)

Brake

A L L A N T É

America's luxury performance roadster introduces the enhanced

control and responsiveness of the Northstar System. The instinctive technology within grants refinement and comfort without compromising performance. After a thorough test drive, the 1993 Allanté could change the way you think about American engineering.

Allanté shown in available Pearl Red with available chrome over squeeze-cast aluminum wheels.

The remarkable openness and order of the Allanté interior affirms Cadillac's reputation for luxurious comfort while never compromising the characteristics

▲ Digital instrumentation, featuring liquid crystal displays, is available on the Allanté.

of the definitive luxury roadster. New bucket seats, with leather seating areas, provide firm lateral support. Eight power and four lumbar power adjustments ensure the proper driving position and support for individuals of virtually any stature. And a memory feature readjusts the driver seat to your favorite pre-set position.

▲ Two high-frequency speakers, mounted on the side mirror interior panels, "lift" the sound image for realistic, orchestrated sound.

▲ Allanté interior shown with Natural Beige leather seating areas.

PRIMARY FEATURES

Northstar System:

- 295-hp 4.6L DOHC 32-valve V8

- Electronic 4T80-E Automatic Transmission

- Real-time Road-Sensing Suspension

- Four-channel ABS

- Second-generation Traction Control

- SLA: Short/Long Arm Rear Suspension

- Speed-Sensitive Steering

Cadillac understands: It's not simply horsepower...it's knowing how to use it. The Northstar System of the Allanté is a synchronized network of the powertrain: 32-valve dual overhead cam V8...the suspension: real-time

CONSTANT AS THE NORTHSTAR

Road-Sensing...and Traction Control:

it simultaneously applies

brake pressure and modu-

lates engine power for sure-

footedness on unstable

surfaces to help the driver sense and

react to changing driving conditions

with the precision of instinct itself. The

result is a wonder of automotive refine-

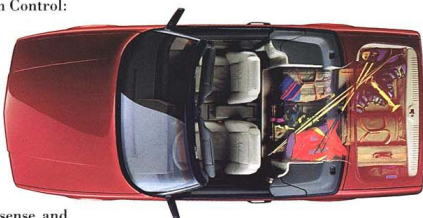

ment that blends spirited performance

with a skillful application of the finest

enamels and leathers to create a driver-

focused environment of optimum con-

trol and comfort.

The luggage compartment with its pass-through design has 16.3 cubic feet of storage space.

Dual overhead cam design allows intake and exhaust port location to maximize efficiency.

With Traction Control and four-wheel drive, Allanté applies its power all seasons.

The Northstar V8 requires its first scheduled tune-up at 100,000 miles, except for normal fluid and filter replacement.

From its powertrain calibrations to its suspension rates and tires, every 1993 Allanté is technologically identical to the Allanté chosen as the official pace car of the 76th Indianapolis 500. Only United States Auto Club required safety equipment was added.

ALLANTÉ CONVERTIBLE

EXCLUSIVE CADILLAC OWNER PRIVILEGES*

Allanté Assurance Plan—4-year/50,000-mile bumper to bumper warranty, 7 years/100,000 miles on powertrain, major components and rust-through protection* There is no deductible. Allanté Hotline: 1-800-ALLANTÉ

Cadillac Consumer Relations Center
Gold Key Delivery System
Cadillac Roadside Service

*For additional information, please see p. 72
*See your dealer for terms of these limited warranties

Standard analog instrument cluster.

Available LCD digital instrument cluster.

Standard Delco Electronics Premium Symphony Sound System: AM/FM stereo, compact disc and Dolby auto-reverse cassette tape players; "off-axial" eight-speaker system for a higher sound stage, greater sound pressure, increased clarity.

INTERIOR

Armrests and consoles

- Center storage armrest with French stitching and dual cupholder
- Console with leather-wrapped floor shift lever
- Fuel filler door release button
 - Power deck lid release button

- Door armrests, leather, with French stitching
- Door pull handles, leather

Convenience/controls

- Automatic parking brake release
- Central door unlocking from doors and luggage compartment
- Cruise control
- Driver information center
- Electrochromic automatic dimming inside rearview mirror
- Electronic climate control
 - With outside temperature display and top-down setting
- Multifunction turn signal lever
- Power door locks
- Power headlamp washers with independent control
- Power windows with driver express-down (plus passenger express-down)
- Retained accessory power
- Steering, Tilt-Wheel adjustable, leather-trimmed rim (comfort hand grips, sport design)
- Tinted glass
- Windshield wiper, controlled-cycle

Defoggers

- Electric rear window (convertible)
- Electric rear window (available hardtop)
- Front side windows

Instrument clusters

- Analog (7000-rpm tachometer)
- Digital (7000-rpm tachometer)

Instrument cluster indicators

- Engine oil life
- Low brake fluid, low coolant, low engine oil
- Low fuel
- Low windshield washer fluid

Lighting

- Illuminated entry system
- Overhead map/reading lamps
- Twilight Sentinel
- Underhood lamp

Luggage compartment

- Carpeted (plus mat)
- Compact spare tire
- Power deck lid pull-down

Mirrors

- Electrochromic automatic dimming inside rearview mirror
- Illuminated driver and passenger vanity mirrors with dimmers

Selected safety features

- Diagnostic Energy Reserve Module backs up car battery for air bag and informs driver of system readiness
- Driver knee bolster
- Driver Supplemental Inflatable Restraint System—air bag
- Manual lap/shoulder safety belts; passenger safety belt accommodates child seat
- Steel safety cage (except roof) and exceeds 1997 dynamic side-impact standards)

Seating

- Driver memory seat; two positions plus exit
- Manual articulating headrests
- Nuance leather seating areas
- Orthopedically designed bucket seats
- Power four-way lumbar control
- Power six-way seat adjusters
- Power two-way recliners
- Seatback pockets

• Feature standard on every 1993 Cadillac

Allanté's new P225/60ZR16 family-year Eagle GA tire is among the first all-season tires to carry a *E rating*, certifying their 155 mph closed-track speed potential, and a *W-S* rating for mud and snow. Precision squeeze-cast aluminum wheel.

New available 16" x 7" chrome-plated squeeze-cast aluminum wheel.

Dual polished stainless-steel exhaust outlets only hint at the Allanté V8's prodigious output.

ALLANTÉ CONVERTIBLE

EXTERIOR

Appearance

- 32V Northstar badging
- Clearcoat paint finish for a rich luster
- Chrome grille with flush-mounted colored wreath and crest
- Front air dam with lip spoiler
- Front license plate mounting—no charge
- One-piece aerodynamic wraparound front bumper fascia
- One-piece door glass for improved visibility
- Galvanized steel on every steel body panel needing protection
 - Aluminum on hood, deck lid and available hardtop

Lighting

- Center high-mounted stop lamp
- Composite tungsten-halogen headlamps
- Fog lamps
- Mirrors (left- and right-hand, all-nation design)
- Foldaway
 - Power
 - Heated, glare-resistant glass

- Power antenna, rear-mounted

Security

- Audible theft-deterrent system
- PASS Key II theft-deterrent system

Tops

- Convertible (with power latching)
- Hardtop

Open-car aerodynamics turn the wind into a whisper.

Soft-top has heated glass rear window and glass side windows.

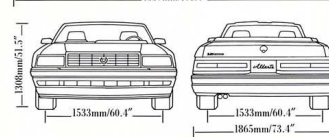

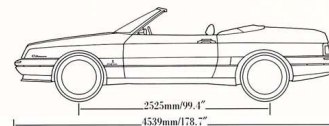

Optional aluminum hardtop weighs only 60.5 lbs.

POWERTRAIN/CHASSIS

- Brake/transmission shift interlock (apply brake pedal to shift)
- Computer diagnostics
- Delco Freedom III maintenance-free, grid-optimized battery
- 140-ampere alternator
- Computer-managed coolant-loss protection
- Dual-platinum-tipped spark plugs for 100,000-mile service intervals
- Hydromount engine mounts—isolates engine vibration
- Powertrain Control Module (PCM)—manages Northstar System
- Front-wheel drive with equal-length drive axles
- Fuel tank, high-strength polyethylene
- Integral body-frame
- Stainless-steel exhaust system (with dual polished stainless-steel outlets)
- Tires (see chart at right)
- Traction Control—ASRIU real-time engine power management

Engine	Northstar 4.6 liter high-output V8
Power	295 bhp @ 6000 rpm
Torque	290 lbs.-ft. @ 4400 rpm
Construction	Aluminum alloy block with cast iron cylinder liners; high-strength lower crankcase assembly with four bolts per main bearing
Cylinder heads	Modular-design aluminum alloy
Induction	Patented, eight thermoplastic converging area tuning inlet tubes
Fuel system	Sequential port fuel injection
Camshafts	Four overhead; two per cylinder head
Camshaft drive	Unique, staged speed-reduction chains, self-adjusting for 100,000-mile durability
Valves	Four per cylinder with direct-acting hydraulic valve lifters
Ignition	Four coils triggered by crankshaft-mounted reluctor wheel passing two magnetic sensors
Starter	Magna-quest, magnet design mounted internally in engine
Accessory drive	Single self-adjusting serpentine belt for 100,000-mile durability

Recommended fuel/tank capacity Premium unleaded/23 gallons

Transmission Unique 4T80-E binary pump four-speed automatic with electronic shift control, overdrive and pulse-width-modulated torque converter clutch

Final drive ratio 3.71:1

Suspension Electronic real-time Road-Sensing Suspension, fully independent; Short/Long Arm rear design with unique bushing configuration

Steering Electronically controlled Speed-Sensitive, power-assisted rack and pinion; 15.6:1 ratio

Brakes Bosch II four-channel anti-lock; power four-wheel disc

Wheels 16" x 7" squeeze-cast aluminum

Tires Goodyear Eagle GA all-season M+S Z-rated P225/60ZR16 steel-belted blackwall radials

Specifications as of 8-92

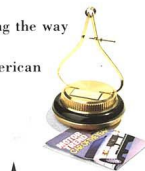

*A, B—Please see p. 59 for AM, AX, C—Quantum information.

SEVILLE STS

Motor Trend magazine's Car of the Year for 1992. The honors earned

19

last year were only the beginning for Seville STS. With the addition of the Northstar System, this luxury sports sedan helps integrate both the powertrain and suspension with the will of the driver. It means an even higher level of performance...further proof that Cadillac is changing the way you think about American automobiles.

Seville STS was the first automobile to win every leading automotive magazine award.

Seville STS shown in Black Sapphire with available chrome over squeeze-cast aluminum wheels.

INTEGRATED SOPHISTICATION

The Seville STS interior is the definitive application of Cadillac's ergonomic principles: to integrate the driver with the driving experience. It begins with the feel of a leather-wrapped steering wheel rim outfitted with purposeful side grips to afford the driver greater ease in maneuvering. It continues with premium materials throughout to reward the most discriminating driver, while providing the passengers with a remarkable amount of leg room, along with ventilation and fan controls that are adjustable from the spacious rear seats.

▲ A dual cupholder offers extra convenience and may be concealed in the center armrest.

► The power seats are biomechanically engineered to allow you to make precise adjustments of their power lumbar supports to lend back support exactly where you need it.

▲ The Nuance leather seating areas, shown here in Saddle, combine with linear-grain Zebrano wood to imbue the standard interior of the STS with a natural richness.

Automobile Magazine's
Automobile of the Year
for 1992

PRIMARY FEATURES

Northstar System:

- 32-valve DOHC 295-hp V8

- Electronic 4T80-E Automatic Transmission

- Real-time Road-Sensing Suspension

- Second-generation Traction Control

- Speed-Sensitive Steering

- Four-channel ABS

- SLA: Short/Long Arm Rear Suspension

and

- Dual Air Bags

The Seville STS is changing the way you think about American automobiles. The most persuasive evidence is called the Northstar System. The powerful 295-horsepower, 32-valve, dual overhead cam V8 provides the

REFINEMENT THAT WILL CARRY YOU A WAY

thrust—and doesn't require a scheduled tune-up until you've driven your first 100,000 miles.

Traction Control simultaneously applies anti-lock brake pressure and modulates engine power in real time on unstable surfaces for impressive performance.

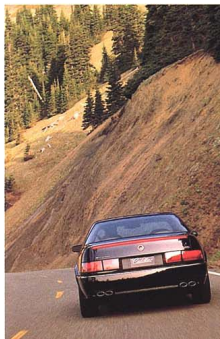

And at 60 mph, the Road-Sensing Suspension reads and reacts to the road one inch at a time to allow for optimal control over the circumstances at hand.

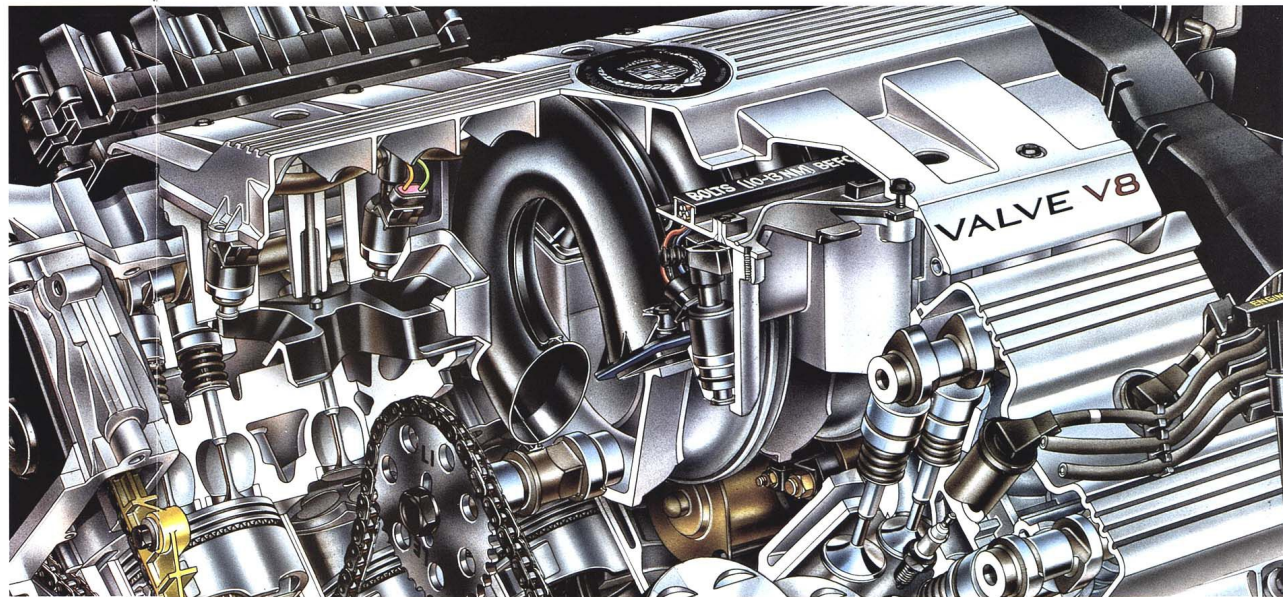

Designed to be used with the safety belt system, the driver- and passenger-side air bags increase your level of safety in less time than it takes to blink an eye.

Car and Driver's 10 Best of 1992.

The center high-mounted stop lamp illuminates before the other brake lights, giving the driver behind you the chance to react as much as 20 feet sooner at 60 mph.

The dual overhead cam 32-valve Northstar V8 sets off a chain reaction of refinement that extends to every driving system of the car.

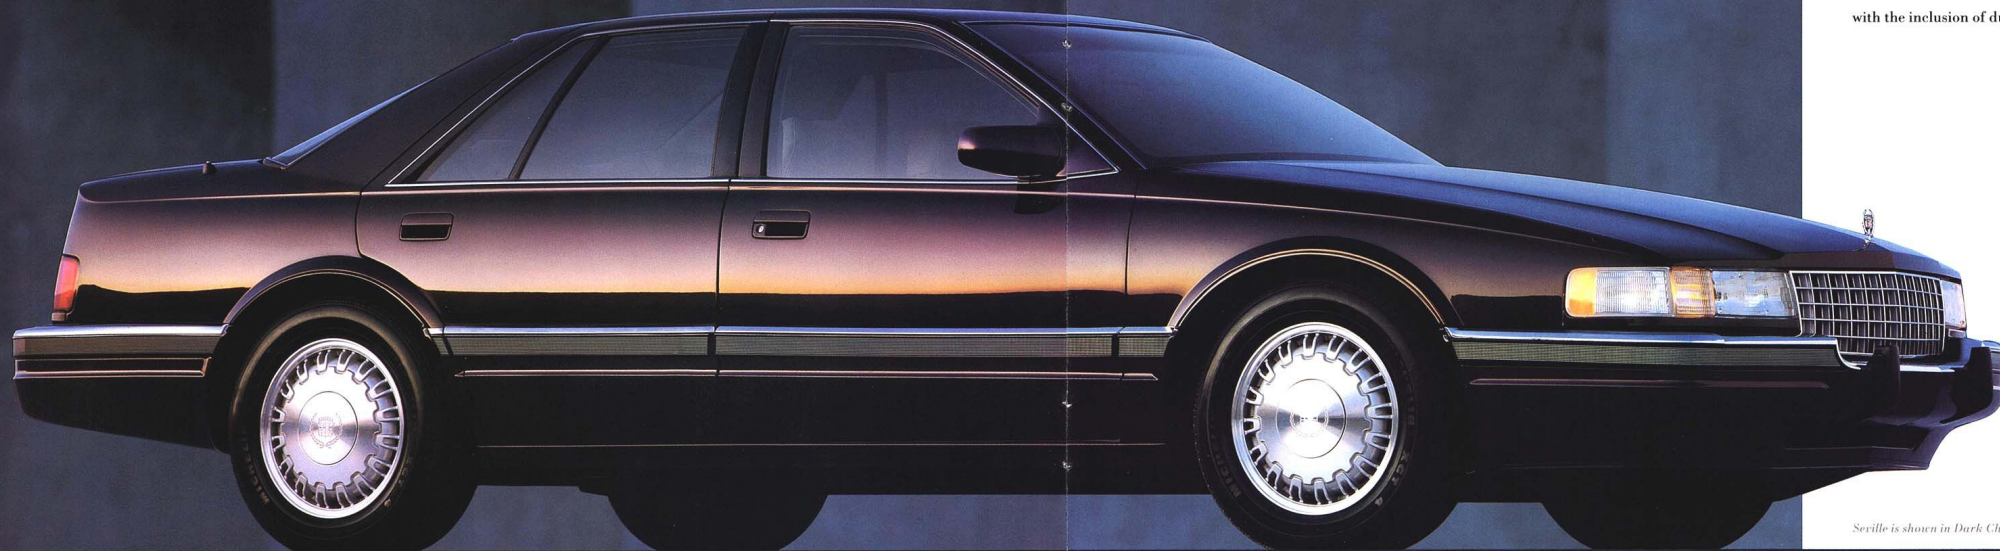

Backlit analog gauges clearly display the data from the speedometer and tachometer while soft-touch controls provide reassuring tactile feedback whenever you engage them.

S E V I L L E

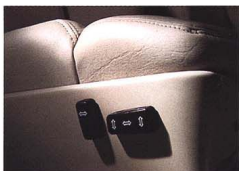

Proven technology, purposefully put to use. That's what distinguishes

the Seville for 1993. Performance is further refined with Speed-Sensitive Steering. A new independent rear suspension, SLA (Short/Long Arm), provides control for high-speed touring, while allowing a smooth, quiet ride during normal driving. Plus, driver and front-passenger safety is enhanced with the inclusion of dual air bags.

Seville is shown in Dark Cherry.

Premium materials throughout, and room for everything...except compromise. It's in the way the teardrop-shaped instrument panel flows with the horizon to orient you to the road. It's in the way the ergonomically clustered gauges inform at a glance. It's in the way extraneous noise is minimized via double-sealed doors, flush-mounted glass, and wind-cheating aerodynamics. Welcome to Seville...in this environment, driving conditions are clearly optimum.

▲ The "Metaphoric" power seat controls are so named because they "mimic" the seat movement...so the driver becomes, with one touch, familiar to their purpose.

► Seville offers rear-seat passengers the ability to "fine-tune" their environment with climate-control ventilation.

▲ Seville's available leather seating areas are shown in Neutral.

E L D O R A D O T O U R I N G C O U P E

Always negotiate from a position of strength. You can apply that rule to

any road you travel in the Eldorado Touring Coupe. Its technology defines high performance with the inclusion of Northstar: a system of integrated components, including a 295-hp V8, that unite in purpose to bring dynamic control to your driving experience. And its dramatic presence is enhanced by accents like the new monochromatic grille.

Eldorado Touring Coupe shown in Ebony (as shown) with available chrome trim options, optional suspension, wheels.

Once inside, you are treated to a sculpted interior that is driver-focused in both the visual and tactile sense. The aesthetics of a personal performance car are most pronounced, from the backlit analog gauges and hand-finished

Zebrano wood, to the safety of dual air bags. And your seating comfort is enhanced by dual-constant springs, one set that supports you, and another that constantly moves in unison with the highway's surface.

▲ The console on the Eldorado Touring Coupe houses lumbar support controls that let you adjust the support to the exact height and depth you require for optimum back support.

Gathered Nuance leather is hand-fitted specifically to the Eldorado Touring Coupe's seating areas. It is tanned naturally to minimize wear caused by abrasion and ultraviolet light.

▲ Eldorado Touring Coupe interior shown with Neutral leather seating areas.

E L D O R A D O S P O R T C O U P E

A seamless expression of the American driver's will...inside and out.

35

That's the goal Eldorado Sport Coupe strives for with uncompromising vigor. Its 270-hp Northstar V8 is specially tuned for a more American driving style. That means greater torque for quicker off-the-line acceleration, yet a more comfortable overall ride. Once more, dual elliptical outlets and grille-mounted wreath and crest allow you to fully appreciate Eldorado's fresh approach to grand touring.

Eldorado Sport Coupe shown in Carmine Red with available chrome over squeeze-cast aluminum wheels. Interior shown with available Naima leather seating areas.

PRIMARY FEATURES

Northstar System:

- 32-valve DOHC V8
- Electronic 4T80-E Automatic Transmission
- Real-time Road-Sensing Suspension
- Second-generation Traction Control
- Four-channel ABS
- SLA: Short/Long Arm Rear Suspension

- Speed-Sensitive Steering

and

- Dual Air Bags

The heart of the Northstar System is the dual overhead cam V8 engine. It is joined in purpose with Cadillac's exclusive Road-Sensing Suspension, which reads and reacts to the contours of the road one inch at a time...at 60 mph.

THE JOY OF DRIVING RETURNS

This, along with a second-generation

Traction Control system

and Bosch II anti-lock

brakes, is dedicated to

helping the driver main-

tain optimal control in

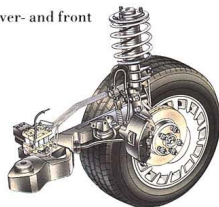

critical driving situations. And safety

refinements include a driver- and front

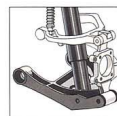

passenger-side air bag.

◀ The Northstar V8 powerplant is so consistent and durable its first scheduled tune-up is at 100,000 miles. Normal fluid and filter replacements are required.

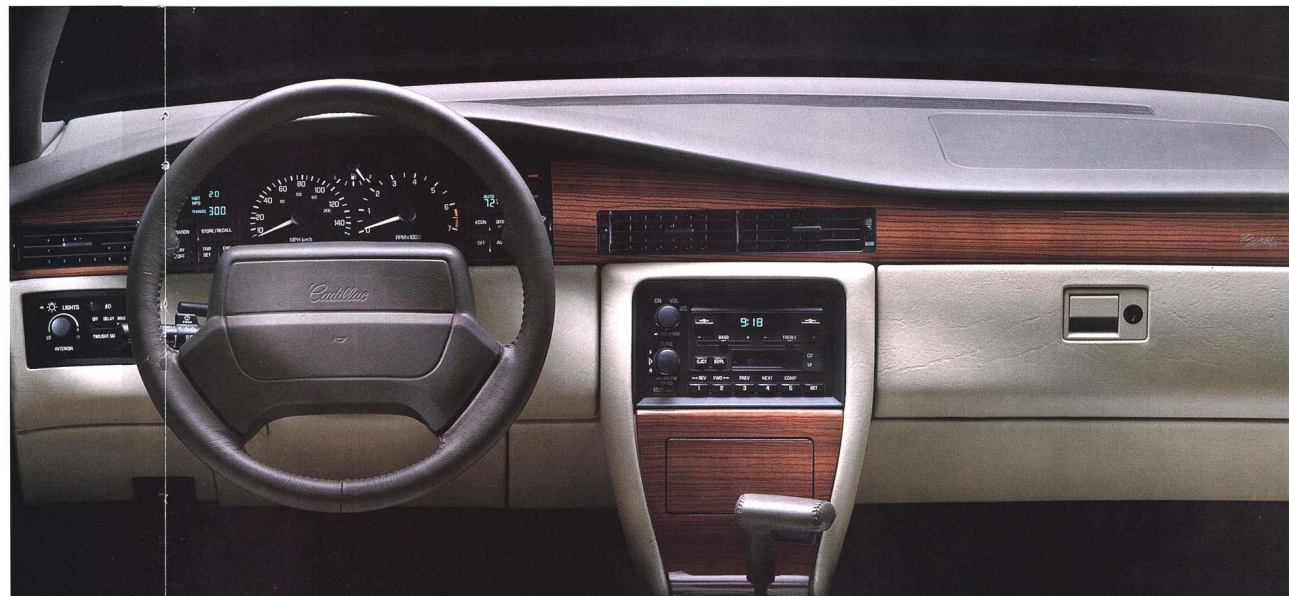

◀ Traction Control works with the ABS system to monitor wheel speed every ten to fifteen milliseconds. It modulates the brake and engine torque to help control wheel slippage during acceleration.

▲ The geometry of Short/Long Arm rear suspension allows for better contact between your tires and the road.

ELDORADO TOURING COUPE AND ELDORADO SPORT COUPE

37

▲ The thoughtful placement of the Eldorado Touring Coupe's instrument readouts is just one example of our philosophy of promoting an ergonomic union of the driver and driving.

◀ The predictability of Cadillac's exclusive Road-Sensing Suspension gives the driver a feeling of dynamic control.

E L D O R A D O

Eldorado employs sophisticated technology not for its own sake, but for

yours. Its 4.9 liter sequential port fuel injected V8 lets you own the road while both the Speed-Sensitive Suspension and Steering systems allow for enhanced agility when cornering and improved driver control. Your comfort is generously catered to as well with the roominess of a five-passenger interior more spacious than many luxury sedans.

The most substantial automotive story of the year is the new

Fleetwood. The quietest, roomiest, safest Fleetwood ever. While retaining its classic Cadillac elegance and style, the 1993 Fleetwood goes to new lengths to provide qualities you desire most in a luxury automobile, and change the way you think about full-size luxury.

Fleetwood Brougham shown in Black Sapphire.

WE'VE BROADENED YOUR WORLD OF L U X U R Y

45

The new more spacious, six-passenger Fleetwood is the roomiest sedan you can buy. Adding to the comfort of space is all-new front seating that features a patented split-frame design for enhanced positioning and optimum comfort. Thanks to its all-new aerodynamic design on the outside, Fleetwood is incredibly quiet from within.

Fleetwood Bringham's orthopedic front seats include triple-element lumbar supports, and are heated to relieve the chill of cold-weather driving.

The new rear-seat vanity mirrors in the Fleetwood Bringham are thoughtful amenities for passengers.

Fleetwood Bringham interior shown with available Dark Blue leather seating areas.

Some information just for safekeeping:

From now on, every journey you take

will not just be more comfortable, but

will provide more peace of mind as well.

That's because the Fleetwood offers

new state-of-the-art safety features like

standard driver- and front

passenger-side air bags. When

used properly with the safety

belt system, the Fleetwood driver and

Available Remote Keyless Entry system enables you to light the inside of the car, lock and unlock the doors, and open the trunk with the push of a button from 30 feet away.

Advanced acoustic research, including on-board binaural digital recording, helps isolate and minimize unwanted noise.

passenger air bags provide some additional protection for up to three front-seat occupants. Once more, there is the added protection of side-guard door beams, part of a vault-like door assembly, reinforcing the safety cage that surrounds the entire passenger compartment. Plus, energy-absorbing "crush zones" reduce front

and rear collision energy before it even reaches the passenger compartment. Other standard features include a powerful 5.7 liter 185 horsepower V8 engine

to allow for greater ease in merging and passing maneuvers. Traction Control and anti-lock brakes that help you maintain control when accelerating or stopping on slippery surfaces.

Electronic Variable Assist Steering to provide steering assistance proportionate to speed to further aid the driver. And the optional Electrochromic inside rearview mirror to automatically reduce glare from following headlights.

Standard Traction Control helps provide maximum traction on virtually any road surface.

Variable Assist Steering helps make parallel parking easy, while highway driving is firm and confident.

Cadillac's Sixty Special is everything you have come to expect from

America's premier full-size luxury automobile. Its six-passenger roominess is virtually unparalleled in service of your comfort. Its standard amenities are amply matched by a concentration of advanced technologies like Speed-Sensitive Steering and Suspension systems, along with the smooth power of a computer-controlled V8 to add panache to the pampering.

The Sixty Special is pictured in Slate Green with available chrome over squeeze-cast aluminum wheels.

A MOST CIVILIZED ENVIRONMENT

53

Luxury right down to the smallest detail. Beginning with a new interior seat trim, and made even more sumptuous by available leather seating areas. American walnut accents fur-

▶ The Sixty Special's digital instrument panel provides unmistakable clarity.

ther enhance and highlight the instrument panel; and, for safety's sake, there's a driver-side air bag in the leather-wrapped steering wheel. Sixty Special brings these elements together

to provide you with the highest standards of comfort.

▶ Estem cloth interior is standard on the Sixty Special.

▲ Sixty Special interior with available leather seating areas shown in Light Gray.

It is called the Sixty Special Ultra interior, and it means the ultimate in both sophistication and style. The comfort and spaciousness of this special interior is unsurpassed in size among all front-drive sedans. Acclaimed Italian designer Giorgio Giugiaro created the look of the hand-finished leather seating areas, which are trimmed with elegant French seams, and accented with genuine walnut on the doors and instrument panel.

▲ The 22-way power front seats optimize your comfort by their split-frame design, triple-element lumbar control, and internal heat source.

The electronic climate-control system is accessible to the rear-seat passengers through multi-directional vents and air volume controls.

▲ The Sixty Special Ultra interior is shown with standard leather seating areas in Dark Blue.

PRIMARY FEATURES

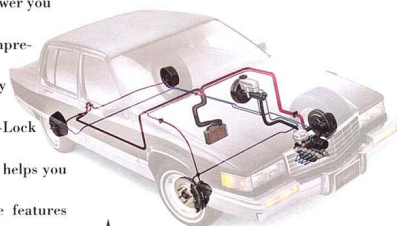

- Speed-Sensitive Steering
- Speed-Sensitive Suspension
- 4.9L V8
- Anti-Lock Brakes
- Traction Control

The sophisticated technology integral to the Sixty Special is made abundantly clear from the very first drive. The 4.9L V8 engine commands 200 horsepower working in tandem with an electronically controlled automatic

A HERITAGE OF L U X U R Y

transmission to deliver the power you need when you need it. A comprehensive array of active safety features consisting of Anti-Lock Brakes and Traction Control helps you drive with confidence, while features like the driver-side air bag give you added peace of mind. An advanced electronic climate-control system monitors the environment using a solar sensor that detects sunlight and adjusts accordingly.

▲ Standard Traction Control helps minimize wheel slippage under 30 mph as you accelerate on virtually any road surface.

◀ Electrochromic driver-side rearview mirror darkens automatically to reduce glare.

◀ The Sixty Special's immense trunk capacity is complemented by a handy new convenience net for smaller parcels.

S I X T Y S P E C I A L

▲ Speed-Sensitive Suspension adapts the vehicle's handling characteristics for responsiveness at higher speeds; then adjusts accordingly to cushion your ride, compensating for bumps and rough spots on roads traveled at slower speeds.

D E V I L L E

The more people know about De Ville, the more they recognize it as

a powerful investment. No wonder

De Ville is America's most preferred

Cadillac. Perhaps that's because

De Ville's full complement of perfor-

mance and safety technologies,

including anti-lock braking and avail-

able Traction Control, are matched by

the tangible advantages of the largest

interior of any front-drive sedan sold

in America.

Sedan de Ville shown in Academy Gray.

De Ville's expansive interior addresses the issue of comfort from two perspectives: mind and body. While the six-way power adjustable front seats and a large, easy-to-read instrument panel can help you stay refreshed, the available leather seating areas and generous amounts of sound baffling afford you and your passengers peace and quiet.

▲ Standards for interior elegance and comfort are set by De Ville's Estreem cloth.

▲ De Ville's advanced electronic climate control system automatically reads weather conditions, and compensates for changes to maintain your ideal comfort zone.

▲ Sedan de Ville interior shown with available Light Gray leather seating areas.

PRIMARY FEATURES

- Speed-Sensitive Steering

- Speed-Sensitive Suspension

- 4.9L V8

- Anti-Lock Brakes

- Driver-Side Air Bag

America's best-selling luxury automobile does not come from Europe or Japan. It's the Cadillac De Ville. The reason is simple: De Ville embodies the aesthetics of everything Cadillac.

Proven performance technology

CONTINUOUS IMPROVEMENT

abounds while the amenities germane

to full-size luxury are in evidence everywhere.

Additional considerations include a fuel data center that can calculate your

average mileage and then estimate your

range. Plus, De Ville's PASS Key II theft-deterrent system may entitle you

to comprehensive insurance premium discounts.

◀ New on this year's De Ville is Speed-Sensitive Steering. It allows the driver to steer with two-finger ease in tight parking situations, while providing a firmer feel at highway speeds.

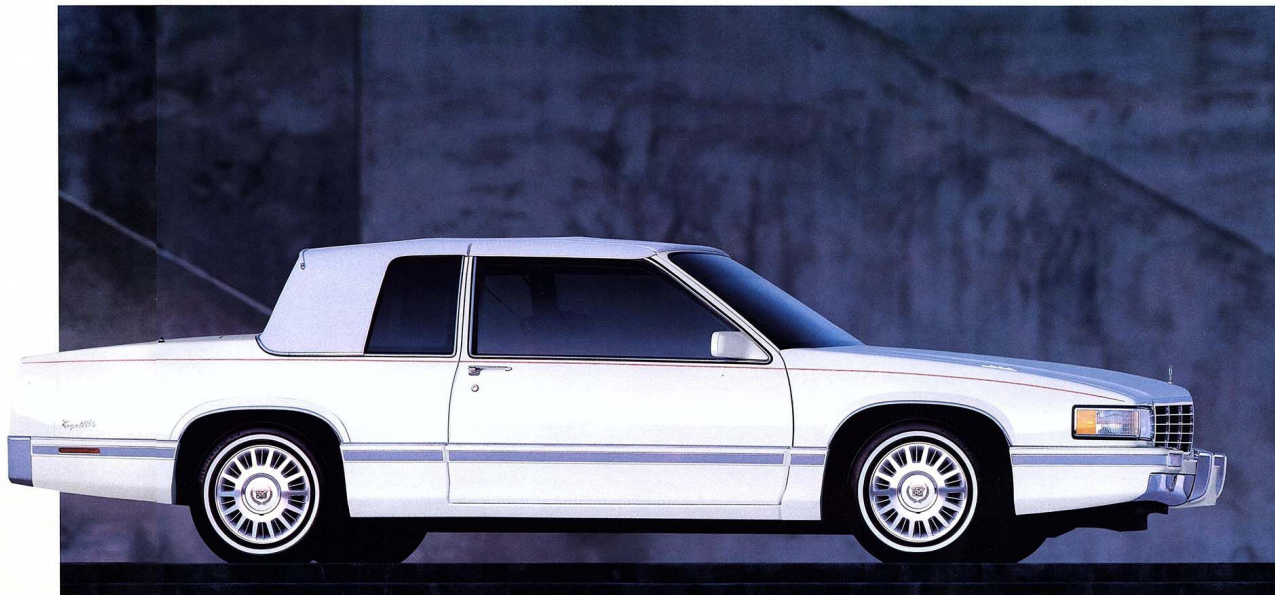

▲ Standard anti-lock brakes automatically sense wheel slip during braking on virtually any road surface and respond by modulating the brakes to allow you to maintain steering control.

◀ De Ville's cavernous trunk lets you stow over 18 cubic feet of luggage, golf clubs and more.

◀ A powerful 200-horsepower 4.9 liter V8 engine with sequential port fuel injection allows for greater ease in merging and passing maneuvers.

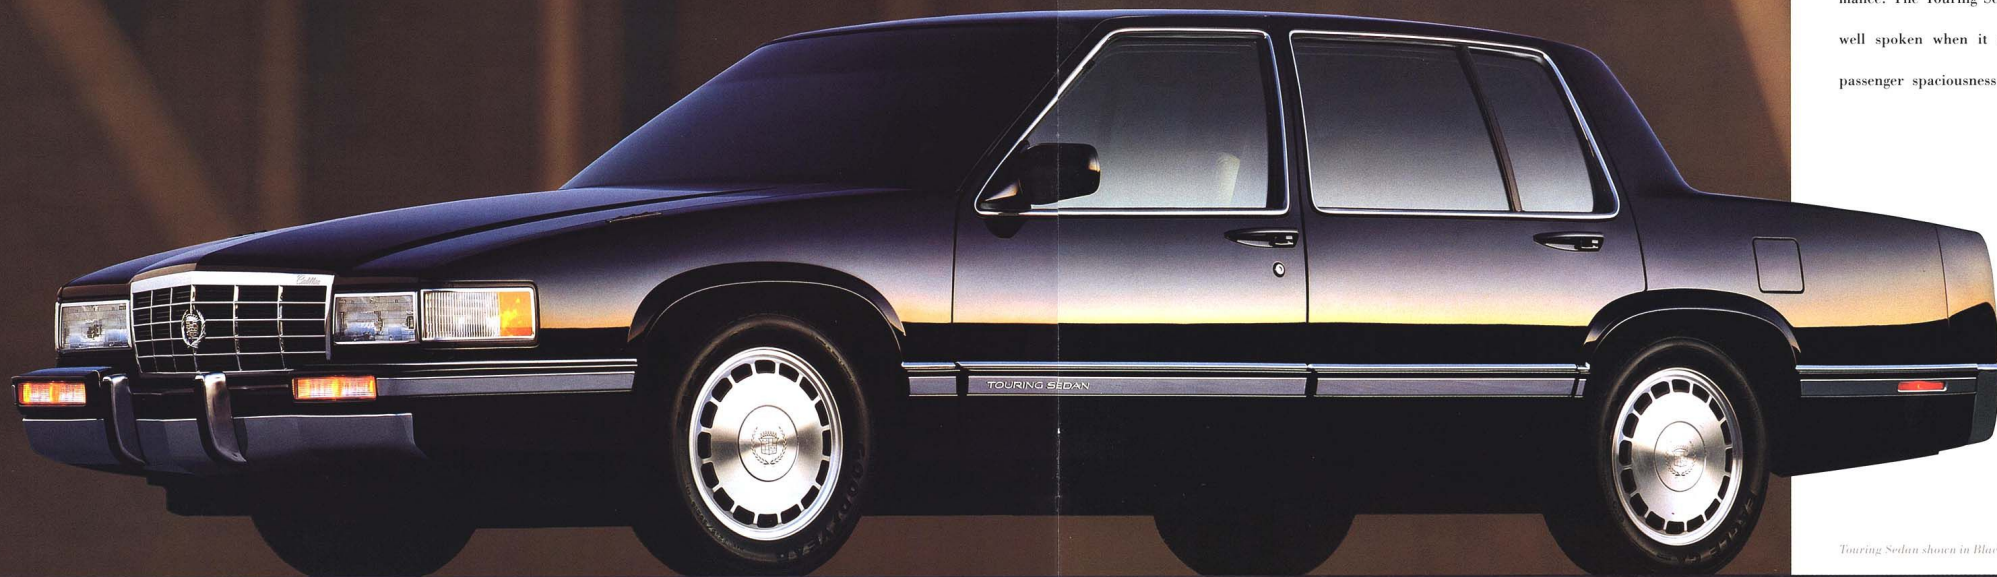

▲ De Ville further distinguishes itself with a full-size six-passenger coupe. It is shown here in Cotillion White with available full cabriolet roof.

D E V I L L E

T O U R I N G S E D A N

The Cadillac Touring Sedan eloquently speaks the language of the road.

Its sophisticated application of power is dramatically illustrated by such standard features as an electronically controlled V8 powertrain, Traction Control, Speed-Sensitive Steering, and a Speed-Sensitive Suspension that is specially tuned for touring performance. The Touring Sedan is equally well spoken when it comes to six-passenger spaciousness and comfort.

Touring Sedan shown in Black Sapphire.

PRIMARY FEATURES

• Speed-Sensitive Steering

• Speed-Sensitive Suspension

• V8 With Performance Final Drive Ratio

• Anti-Lock Brakes

• Traction Control

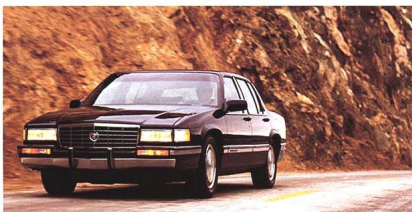

Perhaps the best way to describe the Touring Sedan's interior is to call it goal-oriented. That goal being to surround you in the luxury, total comfort, and safety you would expect in a Cadillac. However, the Touring

ACQUIRE SEATS OF P O W E R

Sedan's authority goes beyond the fit and finish of the interior.

The power really begins under the hood with a responsive 4.9 liter V8

and four-speed electronically controlled transmission. Its final drive ratio is performance-tuned to convert the smooth torque into instantaneous acceleration.

Speed-Sensitive Steering gives the driver more resistance at highway speeds for surefooted maneuverability, while offering minimal resistance for parking ease.

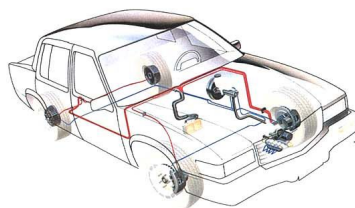

The elegant cloisonné deck lid emblem is handcrafted and crafted one at a time.

T O U R I N G S E D A N

69

The split-frame front seats are adjustable six ways for full-body comfort and include power recliners. The leather-wrapped steering wheel has hand grips, and the leather seating areas are designed and crafted for more than just a touch of sophistication. Interior shown in standard Breechwood.

Standard Traction Control automatically minimizes wheel slip during acceleration under 30 mph for extraordinary all-weather performance.

CADILLAC

O W N E R S H I P

CADILLAC OWNER PRIVILEGES

It is a portfolio of owner services as exclusive as the automobile

it comes with. For example, Cadillac, among U.S. automakers,

pioneered Roadside Service. It's on call 24 hours a day, 365 days a

year. A factory-trained service advisor answers your toll-

free call, and, if necessary, a Cadillac technician comes to

your aid when you need it the most: nights, week-

ends and holidays. Cadillac also offers 12-month/12,000-

mile emergency road service and trip-interruption protection that

pays for lodging, meals, and alternate transportation. In addition,

complimentary trip routing is available for 4 years/50,000 miles.

Cadillac no-deductible warranties are among the industry's

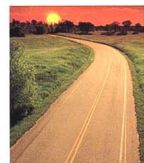

finest.¹ During warranty, if your Cadillac requires same-day repair,

your dealer will furnish shuttle service. Should your Cadillac

require overnight warranted repair, your dealer will provide you

with a loaner car if one is available, or reimburse you for rental or

transportation expense.²

*Cadillac Roadside Service:
Round the clock
peace of mind.*

*On the spot assistance from more participating dealers than any
other roadside assistance program.*

*This grille medallion,
in honor of Cadillac's
preeminent position in
owner loyalty, signifies
the number of Cadillacs
purchased by an owner—
compliments of your
participating Cadillac
dealer.*

¹Please see details on the page at right.
²Please ask dealer for complete program details.

IMPORTANT WORDS ABOUT THIS CATALOG...

We have tried to make this catalog as comprehensive and factual as possible. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment specifications, models and availability. Since some information may have been updated since the time of printing, please check with your Cadillac dealer for complete details.

... **ENGINES** Cadillacs are equipped with engines produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide.

... **ASSEMBLY** Cadillacs are assembled by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. Cadillacs incorporate thousands of components produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide.

We sometimes find it necessary to produce Cadillacs with different or differently sourced components than originally scheduled. All such components have been approved for use in Cadillacs and will provide the quality performance associated with the Cadillac name. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered, or if there are changes, that they are acceptable to you.

... **UPDATED SERVICE INFORMATION** Cadillac regularly sends its dealers useful service bulletins about Cadillac products. Cadillac monitors product performance in the field. We then prepare bulletins for servicing our products better. Now you can get these bulletins, too. Ask your dealer. To get ordering information, call toll-free 1-800-551-4123.

... **FINANCING OR LEASING, IT'S AS EASY AS GMAC** Financing is done right in the showroom. Terms are tailored to suit your personal needs. You can choose your monthly payment date.

... **CORROSION PROTECTION** Cadillacs are designed and built to resist corrosion. All body

sheet-metal components are warranted against rust-through corrosion for 6 years/100,000 miles. Allanté is covered for 7 years/100,000 miles. There is no deductible for rust-through repairs. Application of additional rust-inhibiting materials is not required *under the corrosion coverage* and none is recommended.

... **WARRANTY** The GM 4-year/50,000-mile Gold Key Bumper to Bumper limited warranty covers repairs for any new Cadillac, including labor and parts, to correct any defects in material or workmanship occurring during the warranty period. The complete vehicle will be covered for 4 years or 50,000 miles, whichever comes first (except tires, which are covered by their manufacturer, adjustments, normal maintenance items and battery, which is covered by its own 4-year/50,000-mile prorated warranty). Plus free towing and a portfolio of other services. The Cadillac Allanté is backed by the Allanté Assurance Plan—4-year/50,000-mile bumper-to-bumper limited warranty, including free towing and a portfolio of other services, and 7 years/100,000 miles on powertrain, major assembly components and rust-through protection. There is no deductible on any Cadillac warranty. See your Cadillac dealer for terms of these limited warranties. CADILLAC, the CADILLAC emblem, ALLANTÉ, FLEETWOOD, SEVILLE, SEDAN DE VILLE, COUPE DE VILLE, ELDERADO, NORTHSTAR, CADILLAC ROADSIDE SERVICE, TWILIGHT SENTINEL, FREEDOM and the GM emblem are registered trademarks of the General Motors Corporation. BROUGHAM and TILT-WHEEL are trademarks of General Motors Corporation. PASS KEY is a registered trademark of the Delco Electronics Corporation. GMAC is a registered trademark of the General Motors Acceptance Corporation. Litho in U.S.A. 8/92 ©1992 GM CORP. All Rights Reserved. Buckle Up, America!
