INTRODUCING THE TOTALLY NEW NISSAN ALTIMA.

Altima 3.5 SE shown in Sheer Silver.

The cure for the common car.

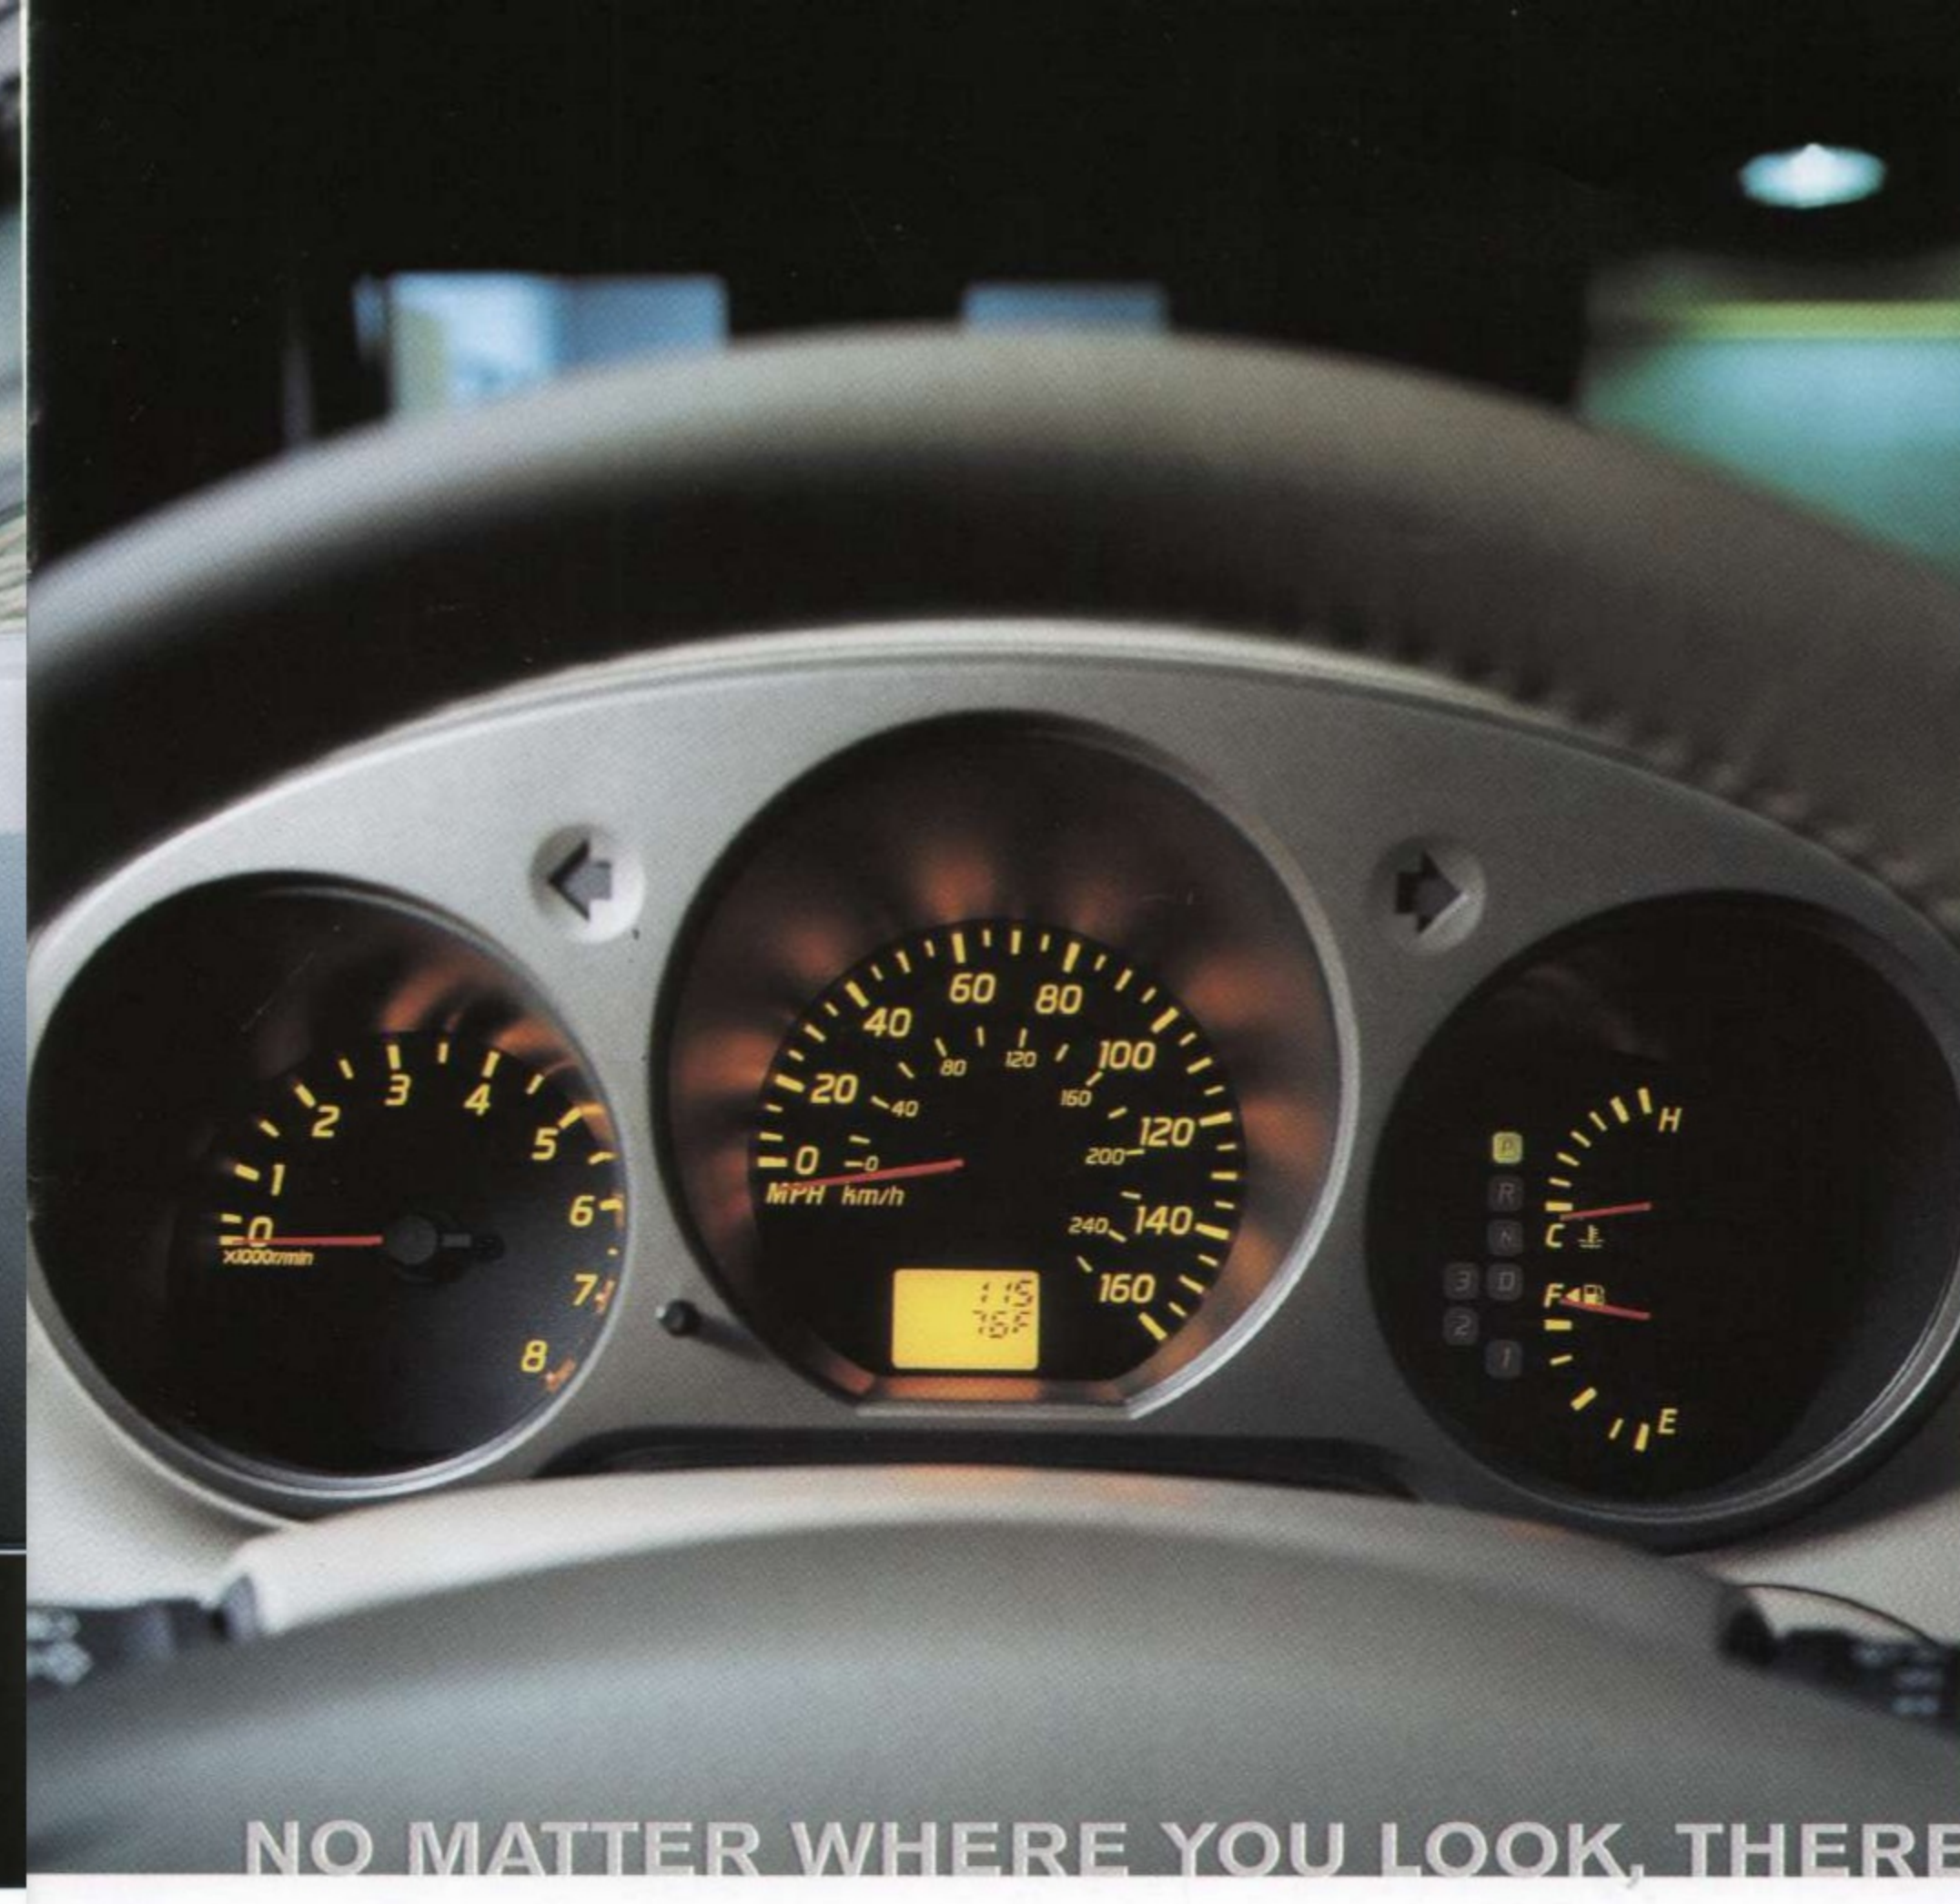

HERE

HERE

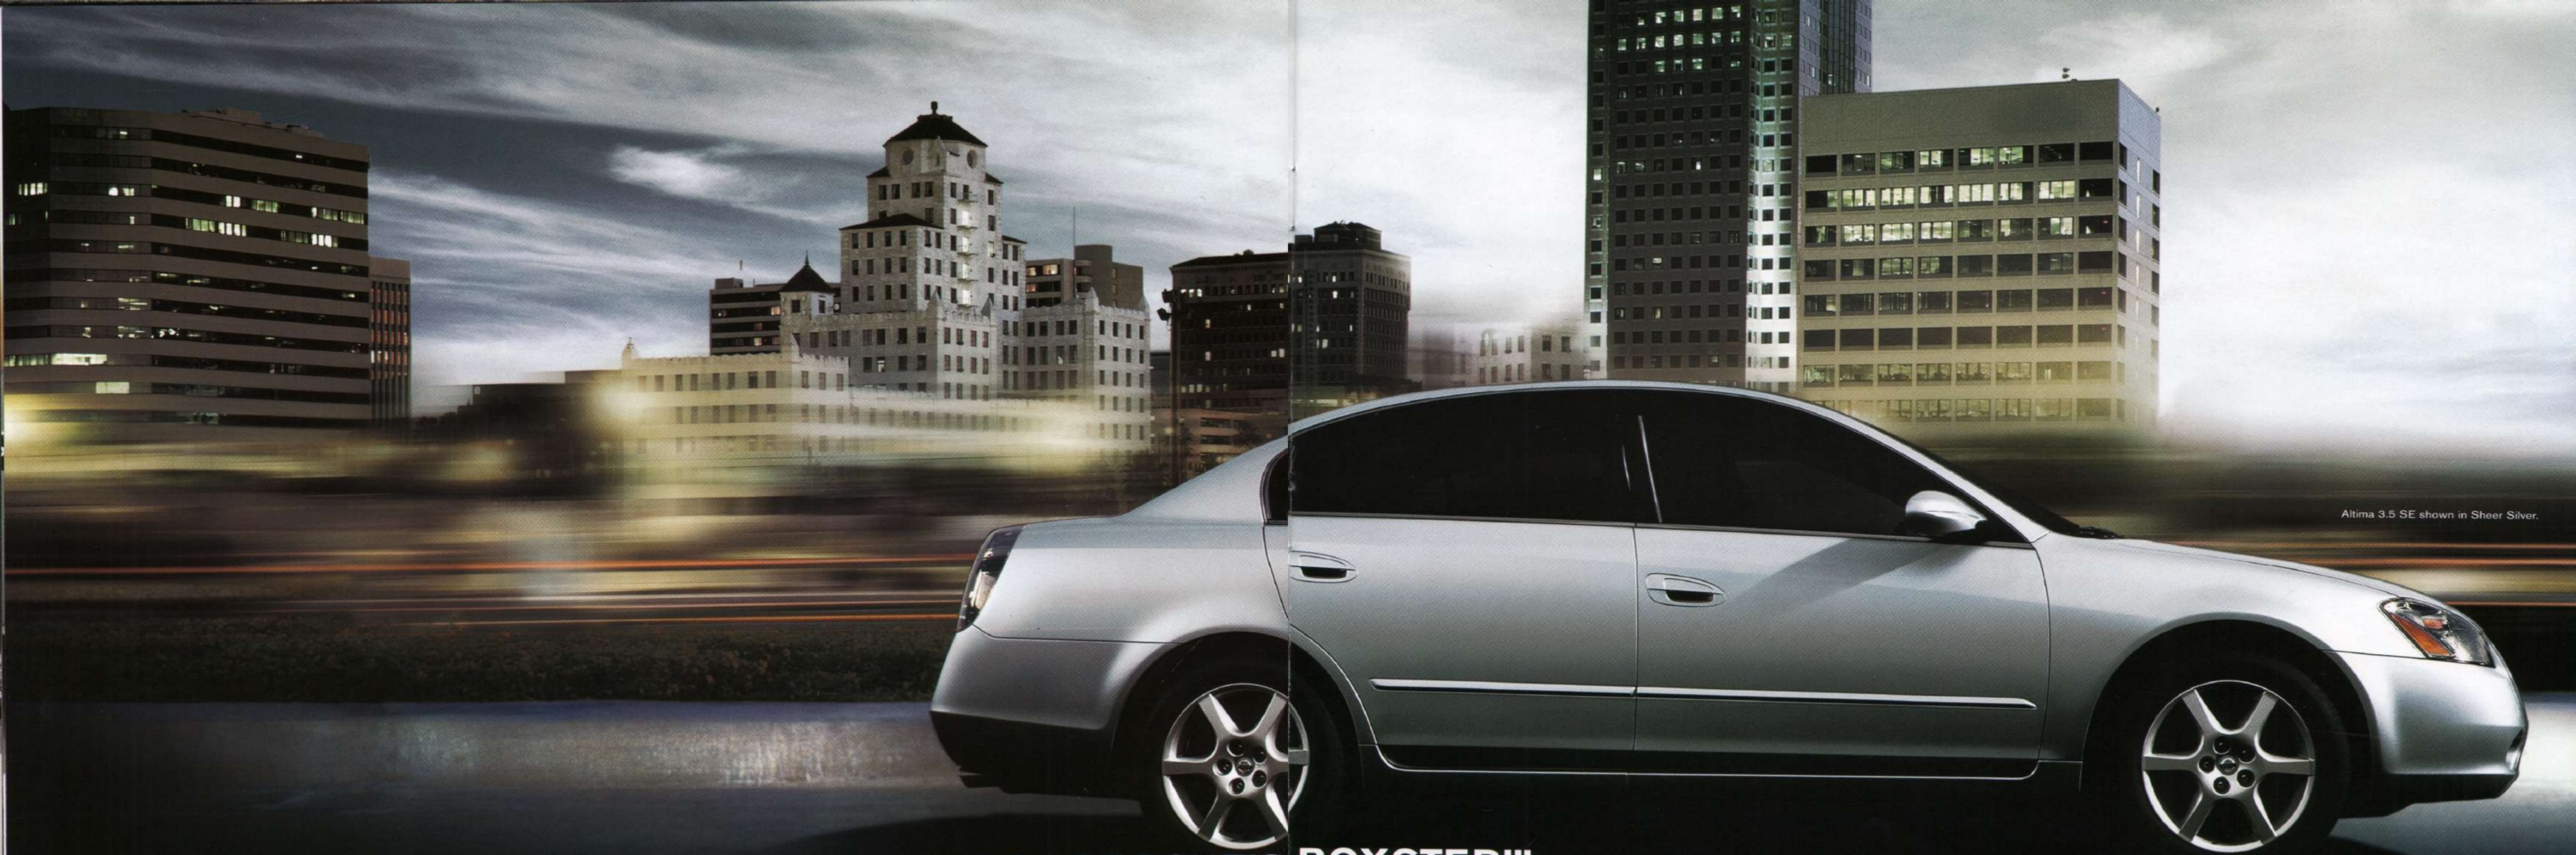

AND HERE

NO MATTER WHERE YOU LOOK, THERE'S NOTHING ELSE LIKE IT.

In the totally new 2002 Altima, raw energy flows from every surface. From High Intensity Discharge xenon headlights to unique jeweled taillights, from a performance-enhancing gated automatic transmission shifter to motorcycle-inspired gauges, Altima doesn't just stand out as special, it vaults over everything else cluttering the highway.

Altima 3.5 SE shown in Sheer Silver.

"0-60 IN 6.28 SECONDS... LETS YOU PICK ON PORSCHE'S BOXSTER!"

MOTOR TREND, SEPTEMBER 2001. ALTIMA 3.5 SE WITH MANUAL TRANSMISSION.

Looks like Altima's biggest challenge is just standing still. Deep within its psyche lies a driving force of pure aluminum – in the guise of an available 240-hp, 3.5-L V6 powerhouse. And an all-out, high-performance suspension front and rear. Once you drive the new Altima, the symptoms become apparent. Sweaty palms, dry mouth, an itch that only one thing can scratch: taking to the road for another dose of performance.

BOOM BOOM BOOM BOOM BOOM BOOM

240

BEATS PER MINUTE

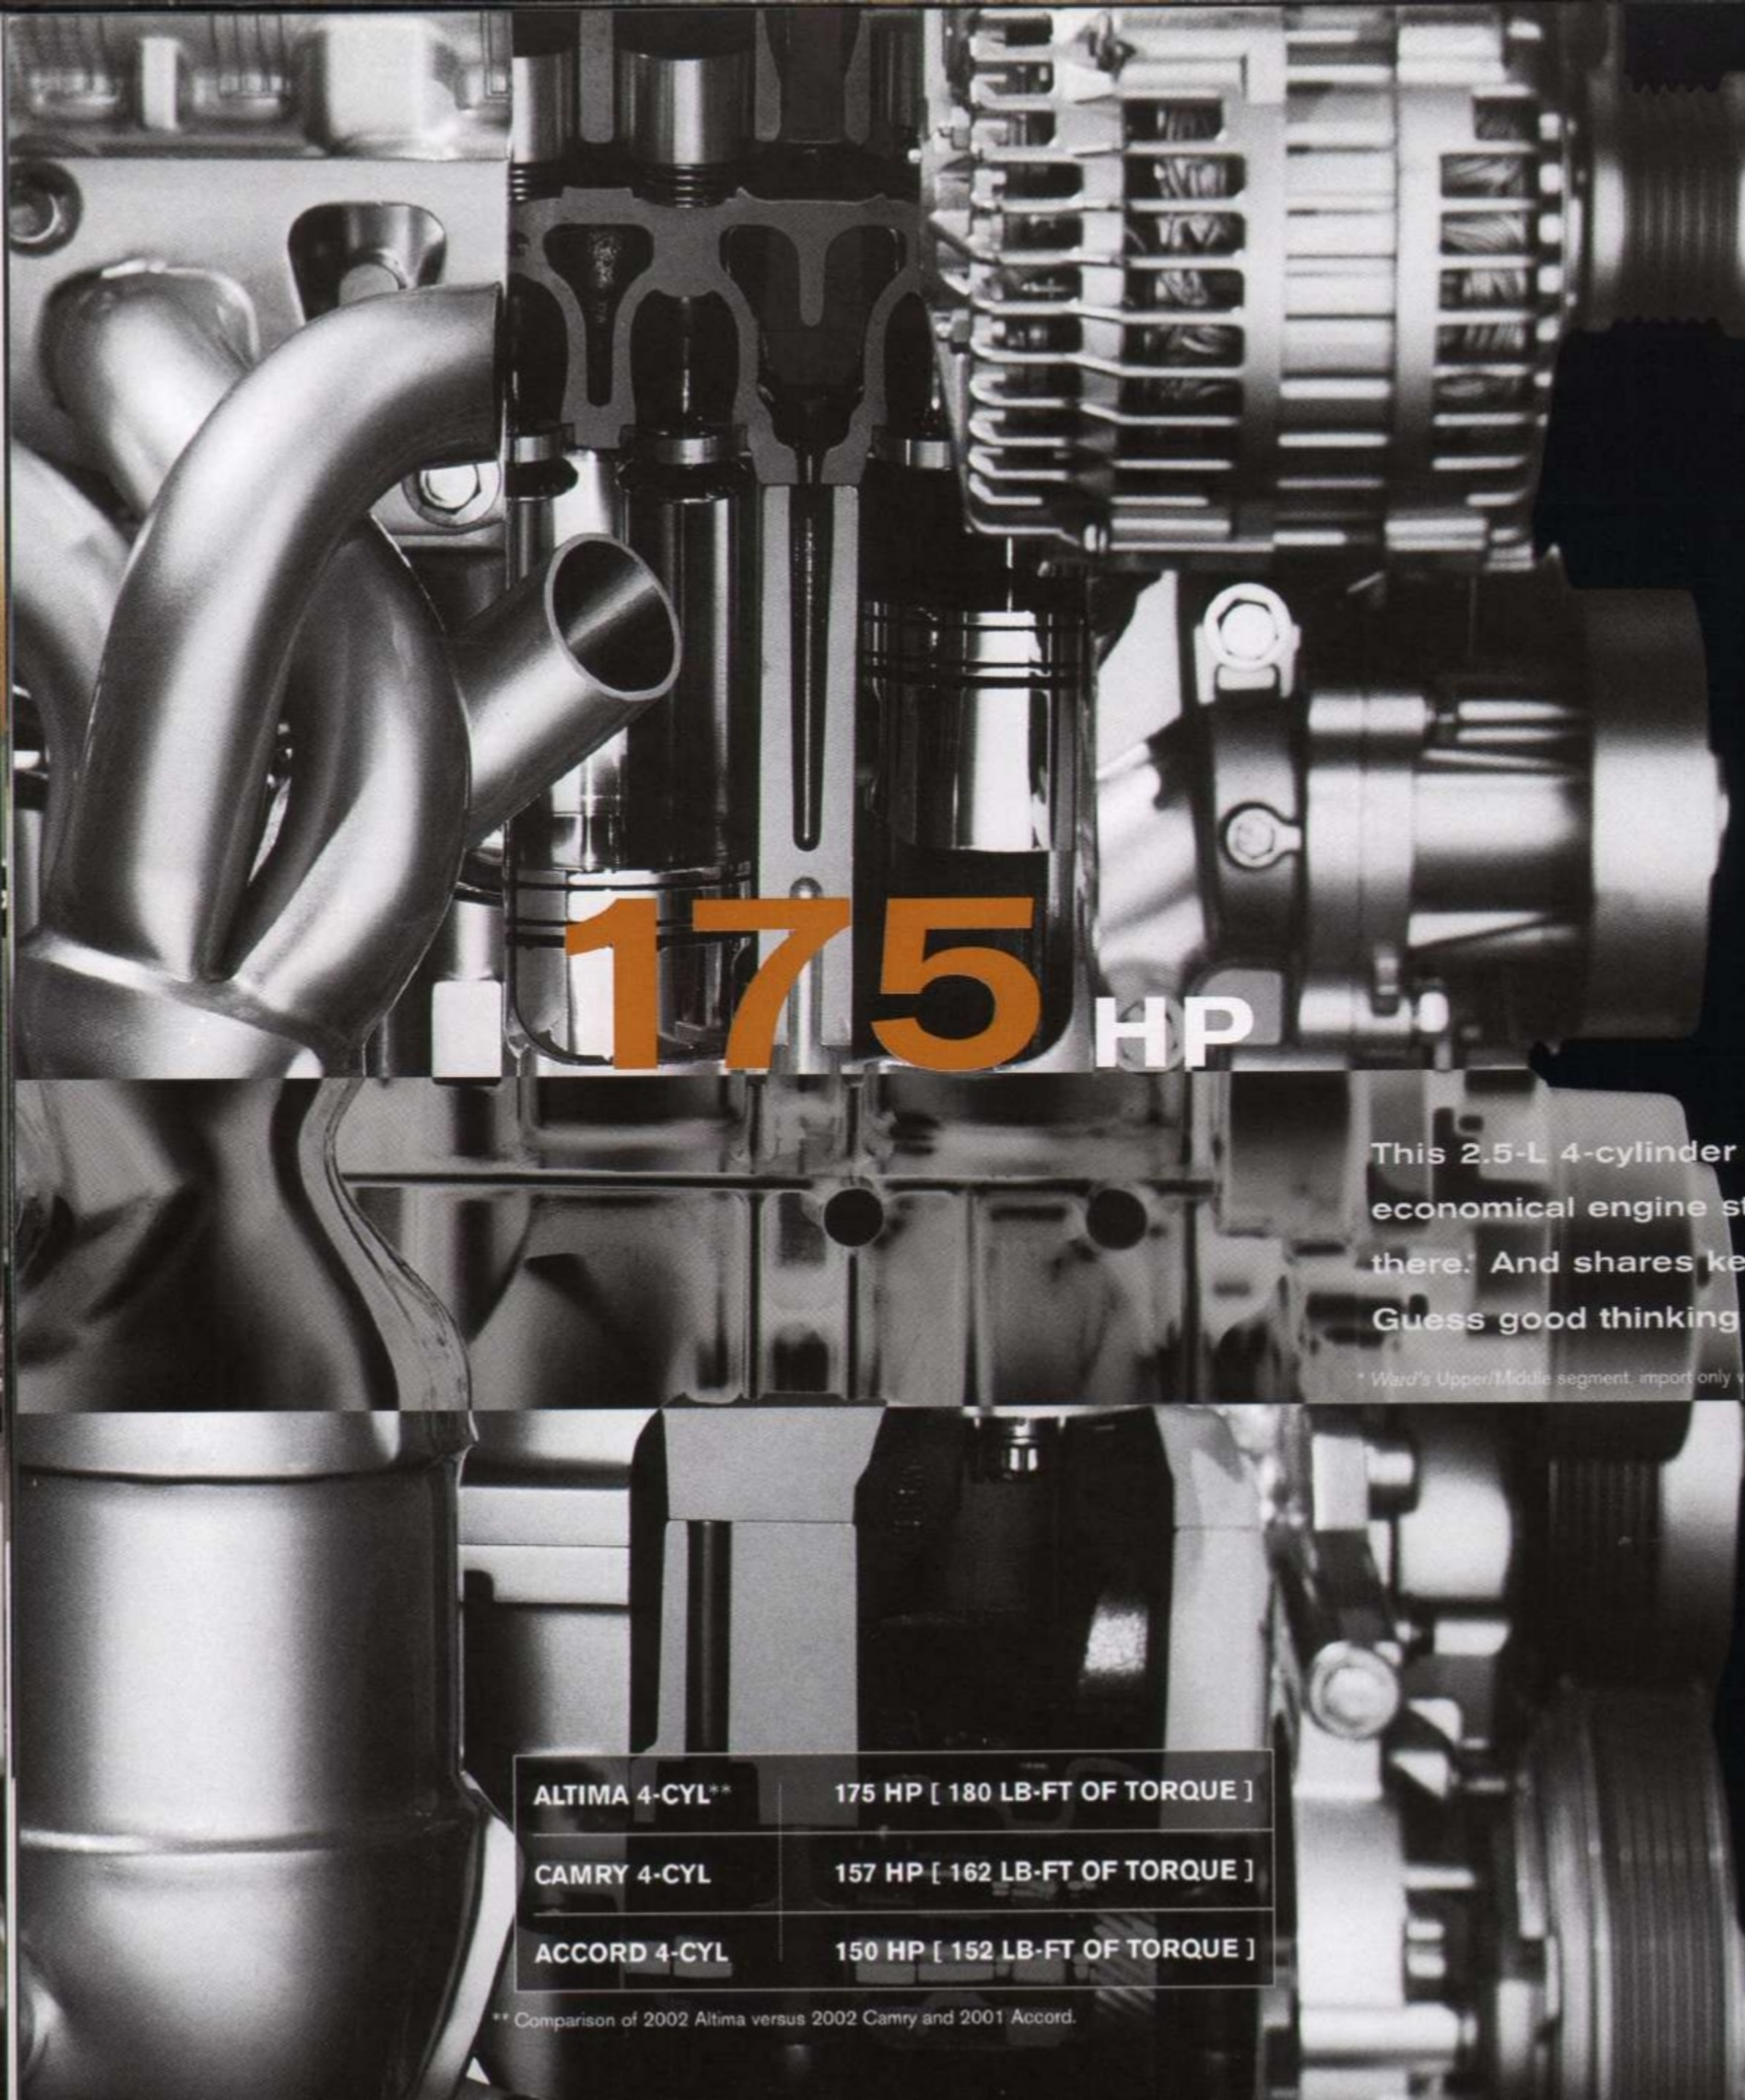

HP V6

Pulse-quickening power spurs this 3.5-L V6 to the top of the class.** Not to mention 0-60 in a blazing 6.28 seconds†. And for the technological know-how behind this engine's 240-hp thump, check out the next few pages.

** Ward's Upper/Middle segment, import only versus MY01 competitors.
† Motor Trend, September 2001. Altima 3.5 SE with manual transmission.

ALTIMA V6*	240 HP [246 LB-FT OF TORQUE]
ACCORD V6	200 HP [190 LB-FT OF TORQUE]
CAMRY V6	192 HP [209 LB-FT OF TORQUE]

* Comparison of 2002 Altima versus 2002 Camry and 2001 Accord.

175 HP

This 2.5-L 4-cylinder is a wonder in itself. Altima's more economical engine still blows away the other 4-cylinders out there. And shares key engineering with its V6 big brother. Guess good thinking just runs in the family.

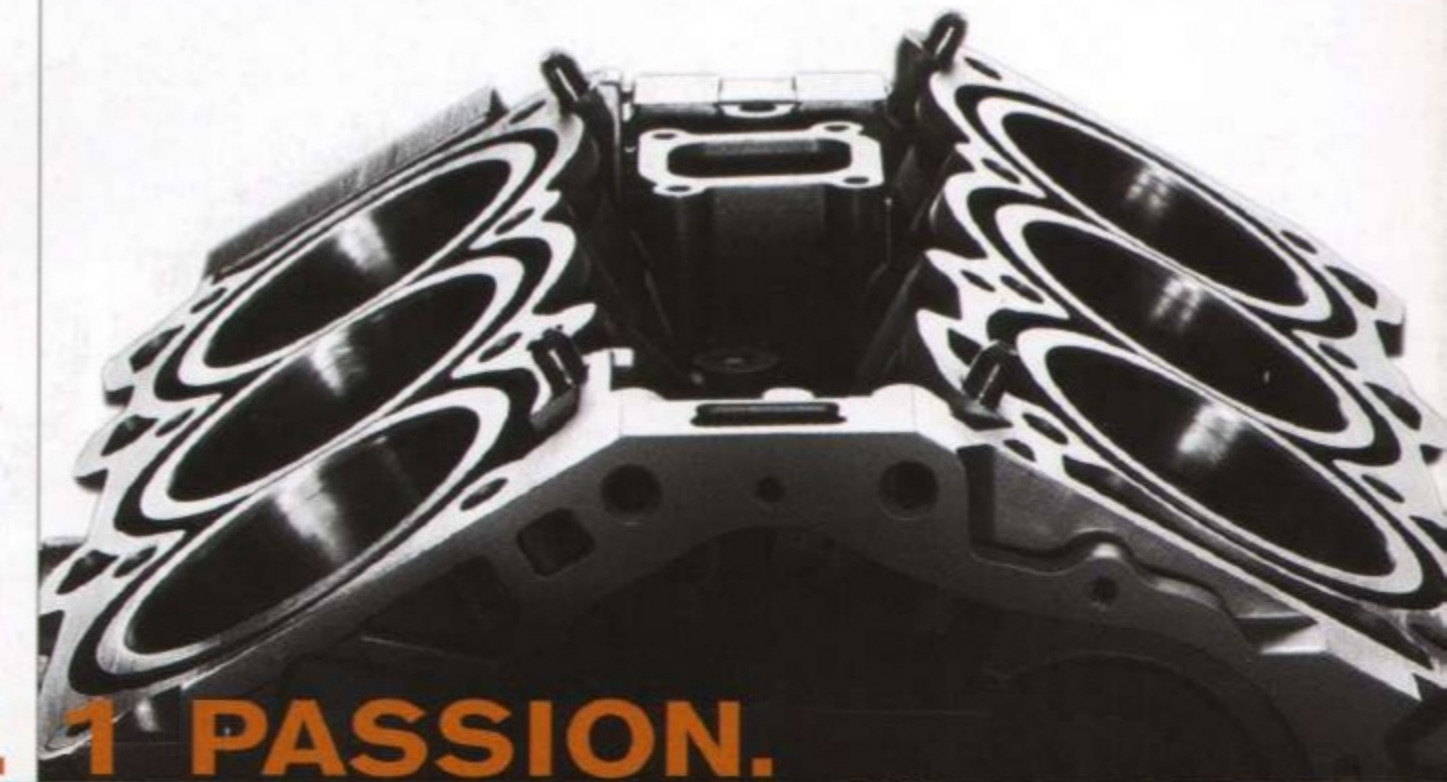

* Ward's Upper/Middle segment, import only versus MY01 competitors.

ALTIMA 4-CYL**	175 HP [180 LB-FT OF TORQUE]
CAMRY 4-CYL	157 HP [162 LB-FT OF TORQUE]
ACCORD 4-CYL	150 HP [152 LB-FT OF TORQUE]

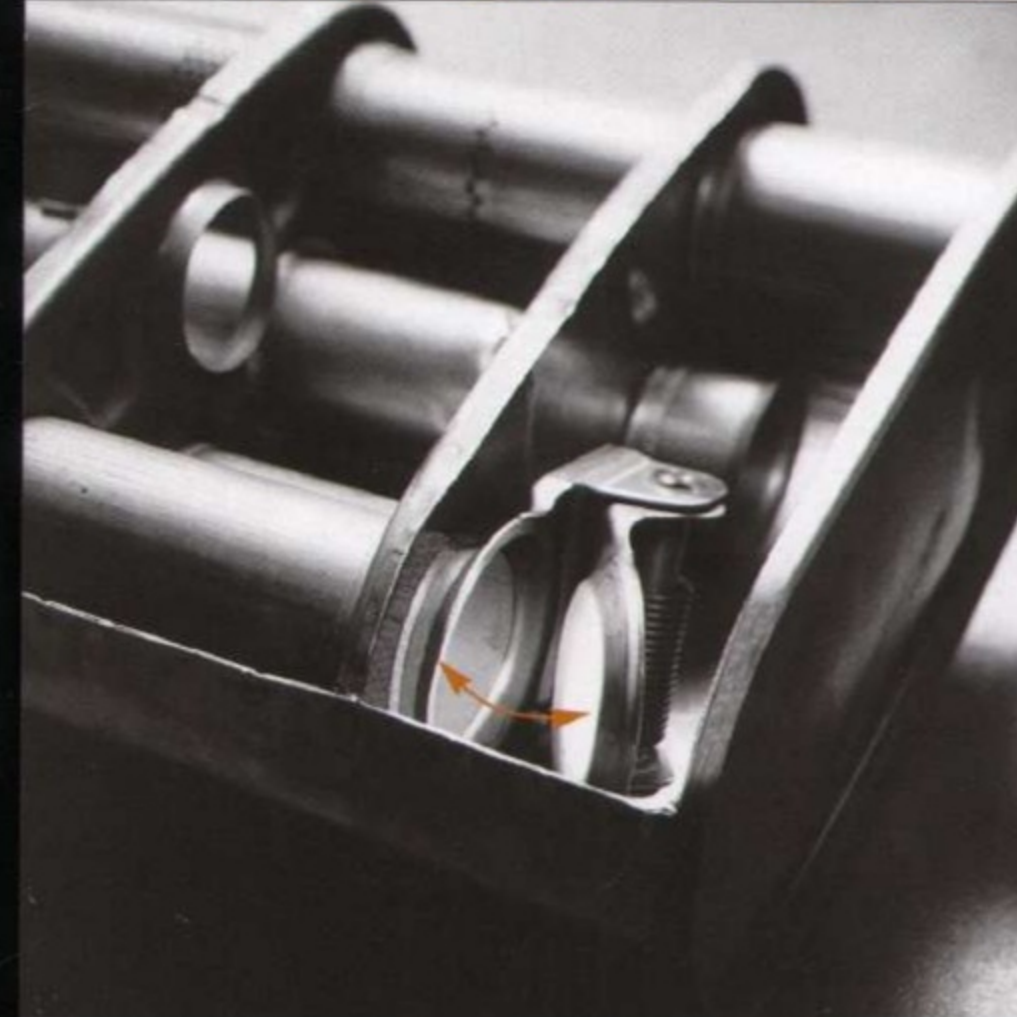

** Comparison of 2002 Altima versus 2002 Camry and 2001 Accord.

LESS FRICTION It's a basic rule of physics: Smooth surfaces slide more easily, allowing an engine to do more with less effort. So we put an ultra-slick coat of molybdenum on Altima's pistons. Then, we microfinished Altima's camshafts and crankshaft, giving them a mirror-smooth finish, which maximizes power delivery, cuts noise and optimizes fuel efficiency.

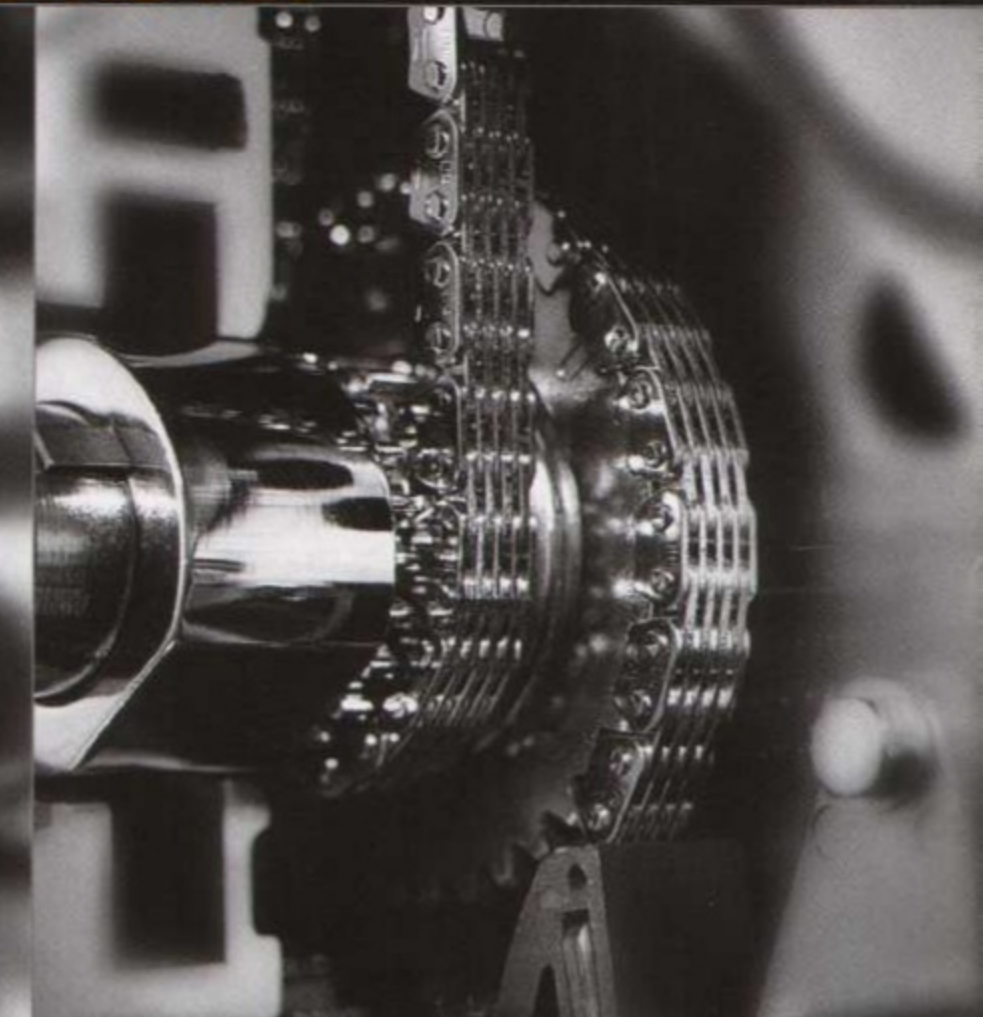

V6 OR 4-CYLINDER. 1 SPIRIT. 1 PASSION.

VARIABLE CAPACITY MUFFLER (4-CYL.) More exhaust flow means more power. More noise, too. A special muffler valve solves the problem by staying closed at low rpm (less noise) and opening as revs rise (more power). So Altima enters every scene as the strong, silent type.

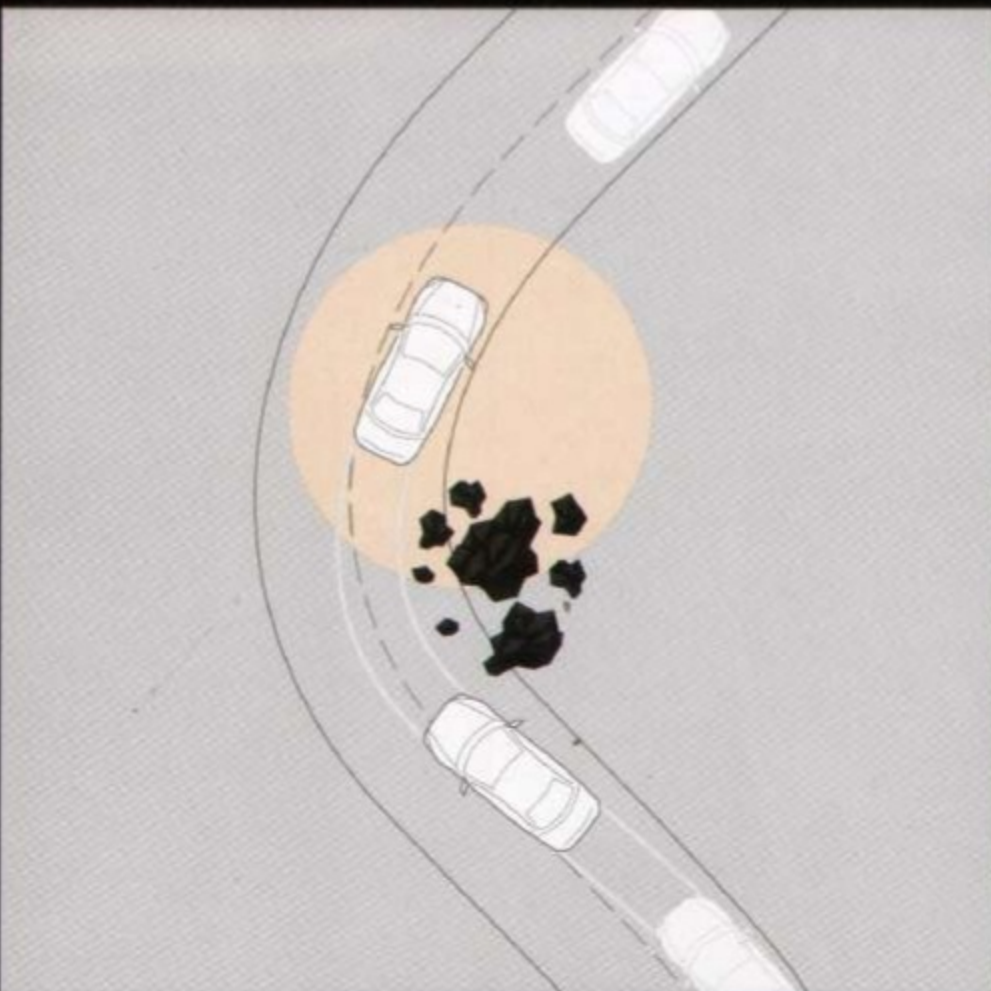

THE POWER OF AIR Altima's Variable Intake System (shown above) ensures plenty of thrust off the line; then as rpm rise, a shorter air path opens in the manifold, providing a direct pipeline to Altima's class-leading horsepower.* In much the same way, Continuously Variable Timing Control precisely modulates when engine valves open and close using factors like throttle position and engine rpm. Plenty of low-end torque, impressive power as speeds rise.

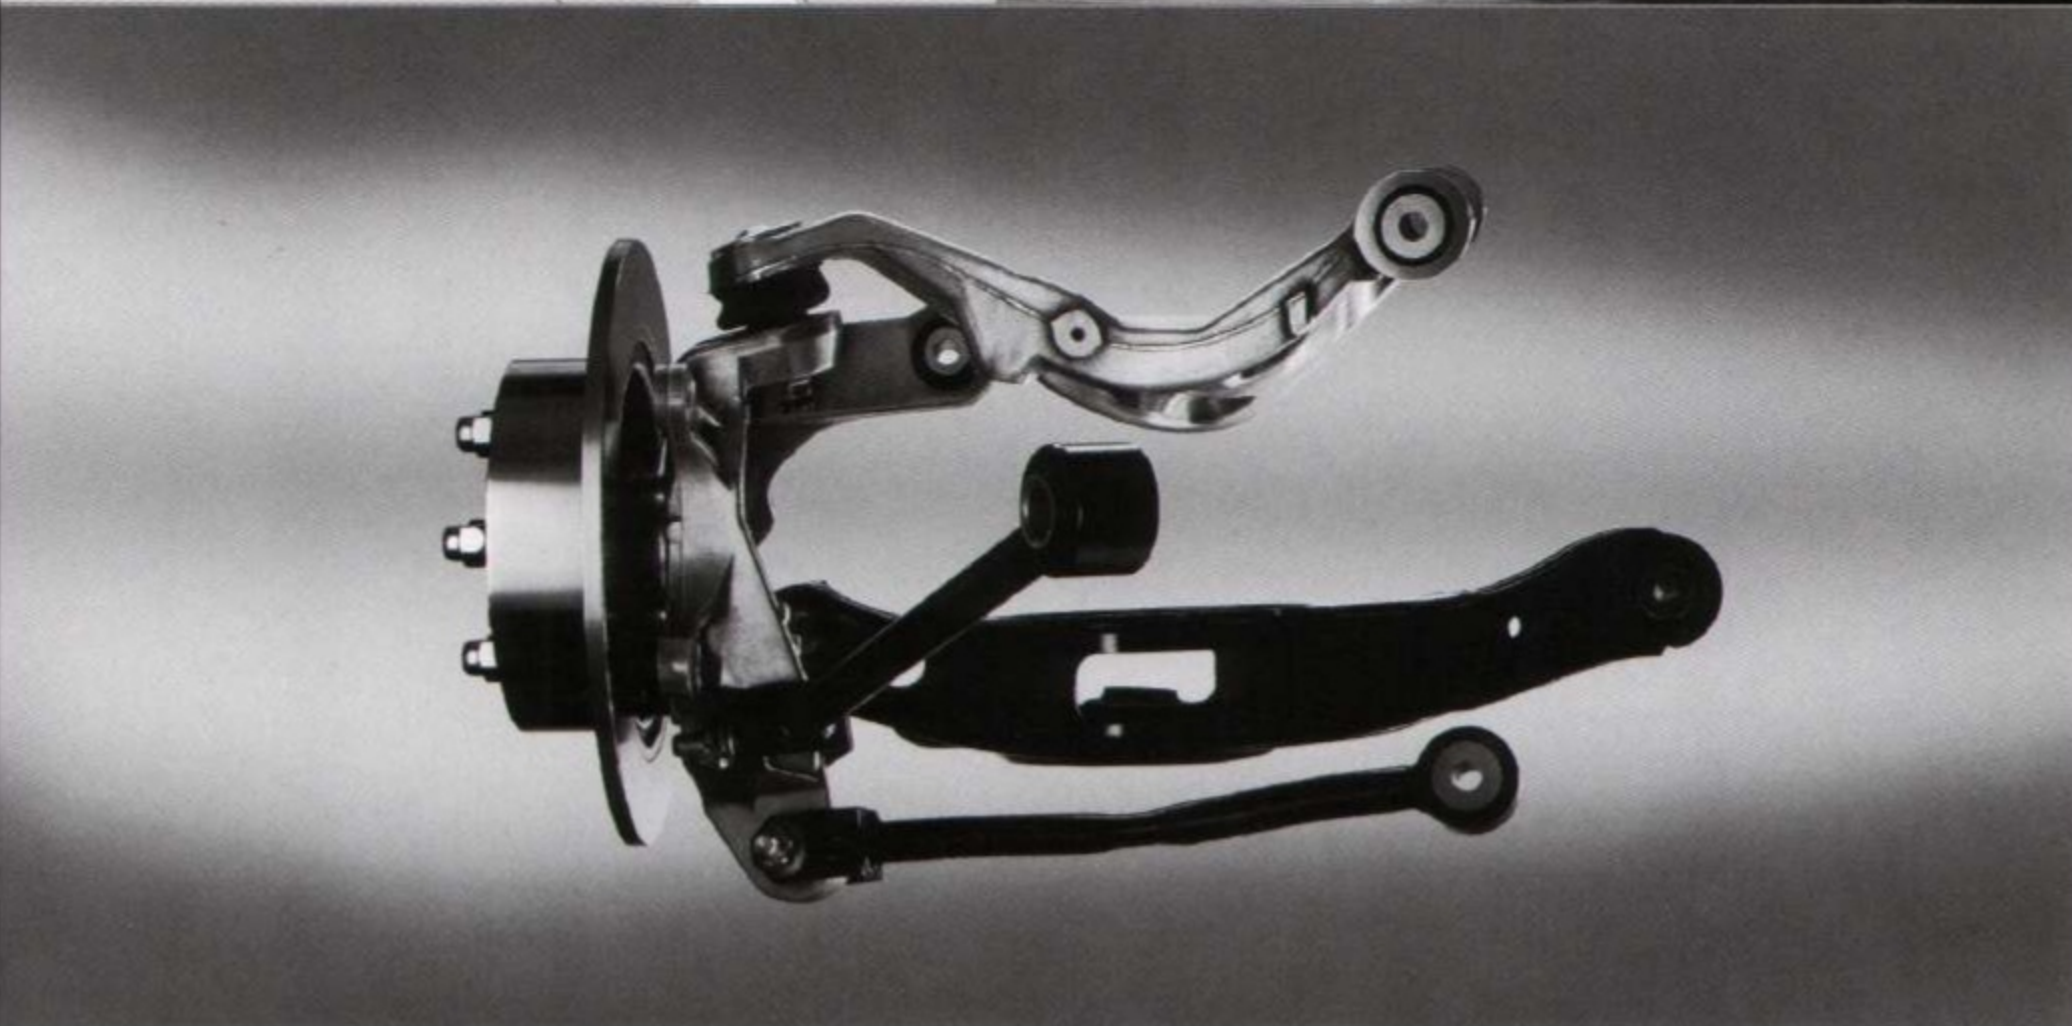

TIMING CHAIN Unlike timing belts (which need regular replacement), a timing chain has no standard maintenance. And Altima's timing chain goes a step further: it's designed to be nearly silent.

ALUMINUM Think about those old-time cast-iron skillets. Do you really want to be driving around in that? Altima's aluminum-alloy block is designed for extraordinary strength. Yet the use of lightweight aluminum – in the block, pistons and cylinder heads – ensures an agile free-revving power plant.

MORE THAN SIMPLY COMING TO A STOP Braking power is easy to take for granted. Hit the pedal and you stop, right? Well, there's a lot more to it than that. Altima has 4-wheel disc brakes standard. Discs offer shorter stopping distances, greater precision and better road-feel versus drum brakes. An available Anti-lock Braking System (ABS) helps you maintain steering control in emergency situations. Think that's enough? We're just getting started. Altima also offers Brake Assist, which helps you reach maximum stopping power easily and rapidly. Finally, Electronic Brake force Distribution (EBD) senses the weight in the rear of the car (trunk, back seat) and sends more force to the rear brakes, if necessary. Now go, and never underestimate the importance of good brakes again. (See Specs chart for availability.)

TRACTION CONTROL SYSTEM Battle the slippery, icy elements. This available TCS adjusts throttle or automatically downshifts the transmission to help keep your wheels from spinning. It operates at any speed, even in reverse, to keep you on surer footing. (3.5 SE automatic transmission only.)

WHAT'S BETWEEN YOU AND THE ROAD A suspension cushions the bumps and absorbs the punishment of the pavement. (What a thankless job.) It also makes the difference between sports-car nimble and gooey-as-molasses. So, in designing the totally new 2002 Altima, we borrowed some super car wizardry: a multi-link, fully independent rear suspension derived from the legendary Nissan Skyline. You'll find uncommon handling and responsiveness. You should not be surprised.

What sets Altima apart? Simply put, it's a matter of DNA: the passion and imagination deep inside every Nissan engine, every curve of sheet metal, every single weld. It's the way we've always built cars and trucks. And it's why Nissans feel different on your drive. Why they rev eagerly, corner with conviction, brake with assurance. We give you some of the details here; of course, taking the wheel and seeing for yourself is also highly recommended.

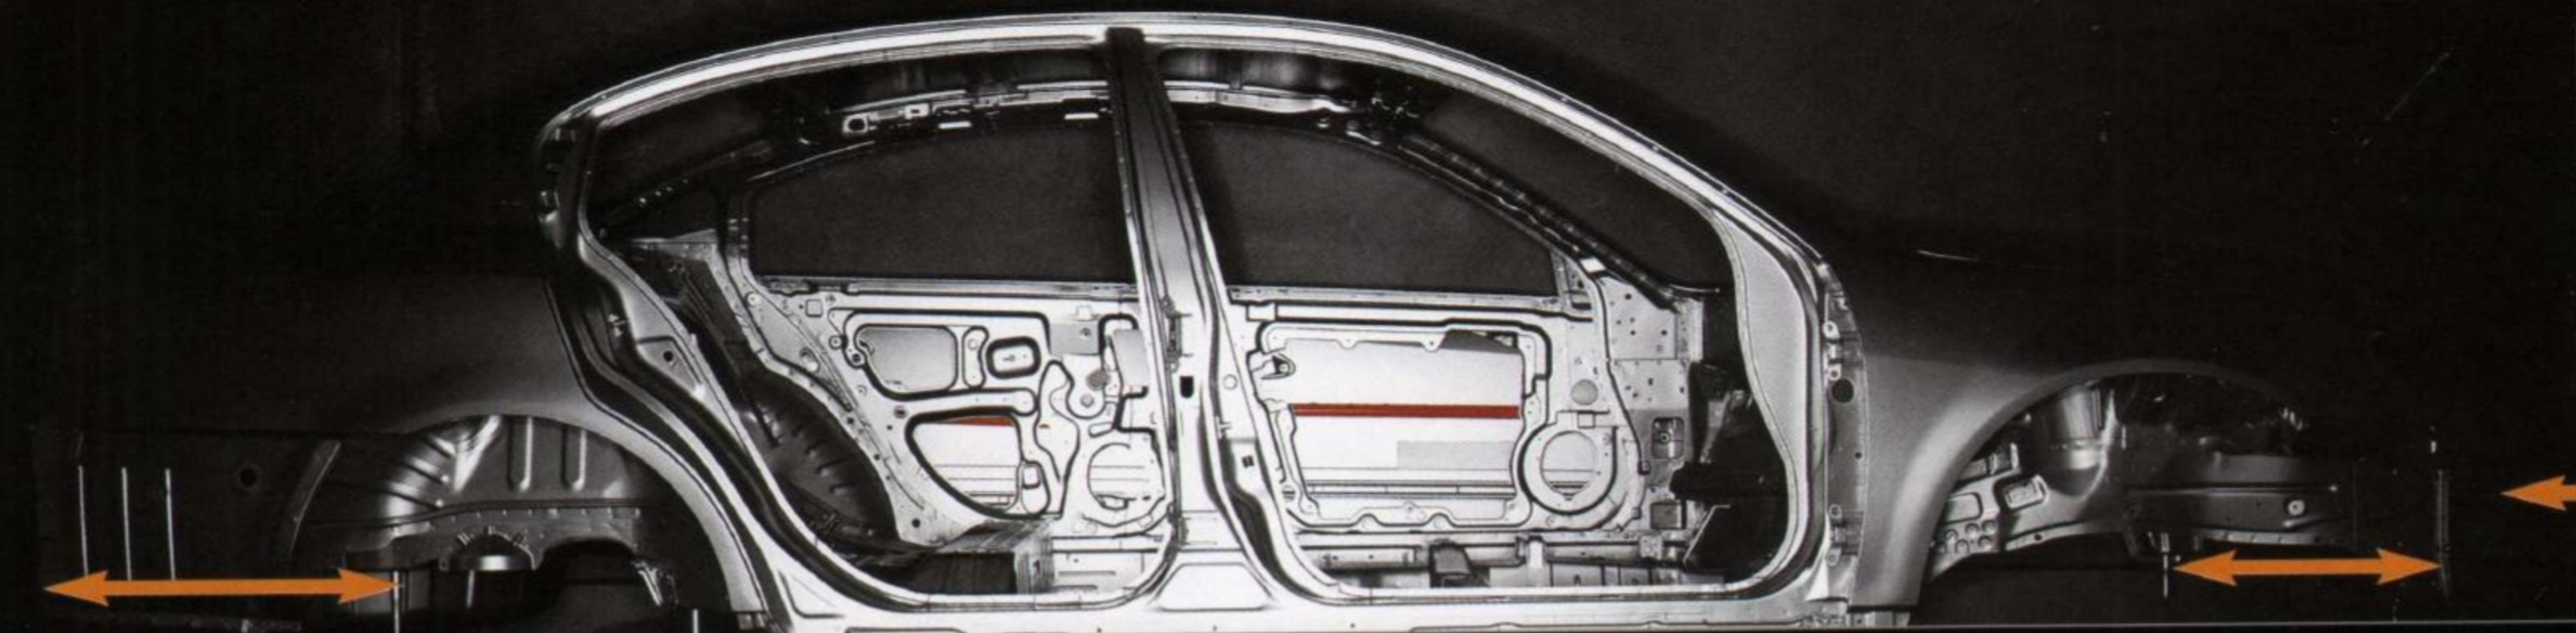

SPEED-SENSITIVE STEERING We may not have mastered mind-reading technology yet, but Altima's steering system is the next best thing. It adapts to the driving scenario, giving you more power-assist at low engine speeds. Then it gets tighter – sportier – as revs rise, for that glued-to-the-blacktop feeling.

XENON HEADLIGHTS V6 Altimas are available with cutting-edge High Intensity Discharge xenon headlights. They're 150% as bright as traditional halogen bulbs. And they emit a soft beam that's closer to natural sunlight. Another bright idea from Nissan.

HALF-MEASURES.

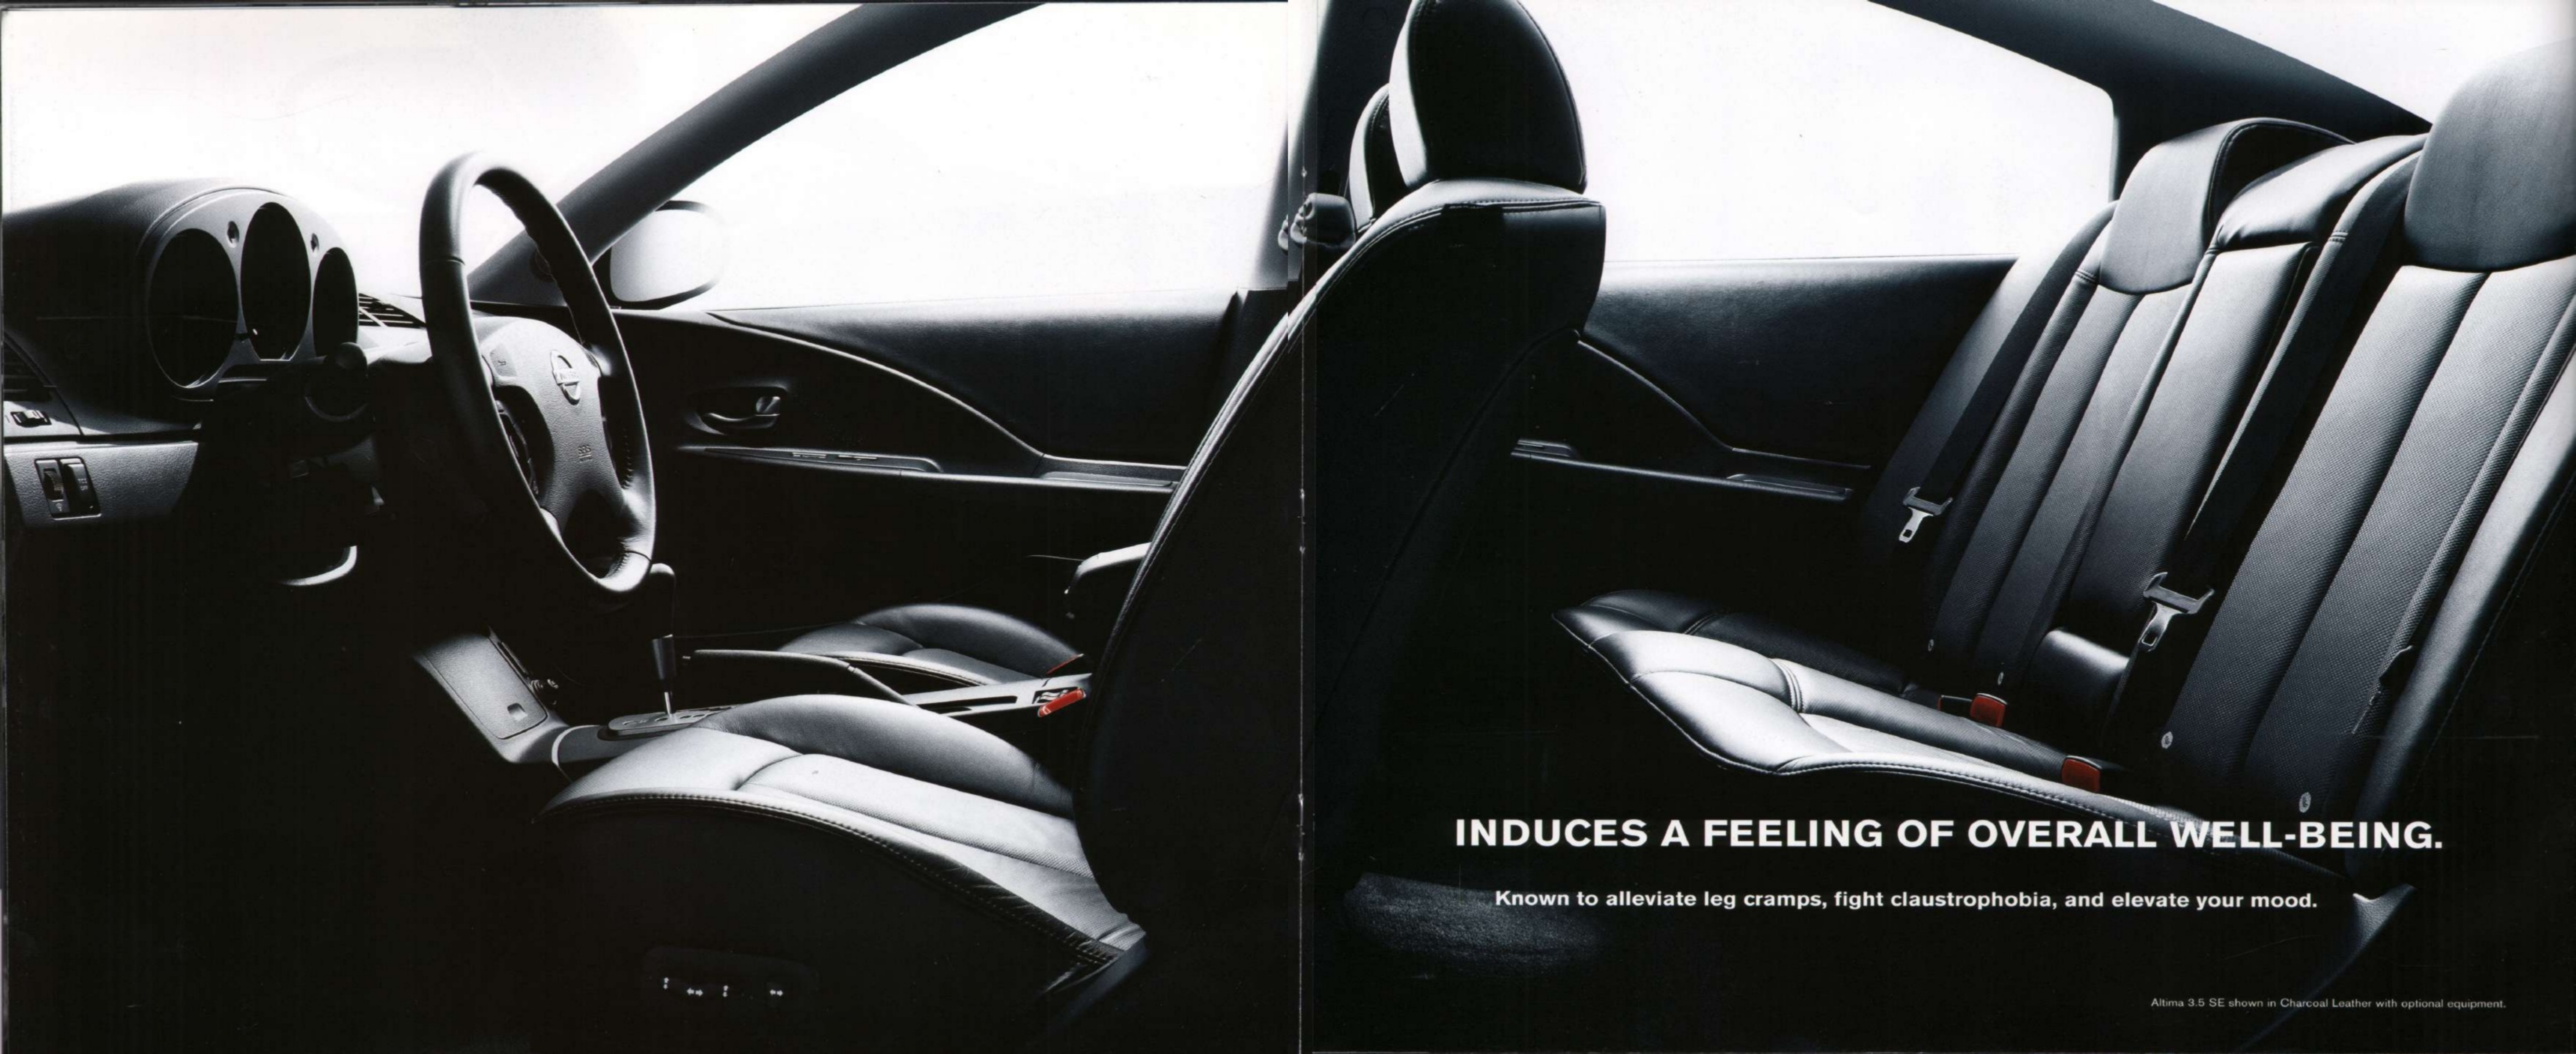

THE FLIP SIDE OF PERFORMANCE: SAFETY When you're behind the wheel, you're probably thinking curves and straightaways. We invite you to consider beams and buckling creases. Welded into all four of Altima's doors are pipe-style steel guard beams, helping to make the cabin the most protected area of the car. Crumple zones front and rear help absorb crash energy. And the hood is designed with buckling creases that help keep it from intruding into the cabin in the event of a crash. You may now return to your dreams of the open road, secure in the thought that Altima is designed to help keep you safe.

A black and white photograph of a car's interior, split vertically. The left side shows the steering wheel with the Nissan logo and 'SR20' text, and the instrument cluster with orange-lit gauges. The right side shows the center console with a Bose stereo unit and a climate control panel. The dashboard and door panels are covered in a dark, textured material.

TAKE A MOMENT TO LOOK. AT HOW IT LOOKS.

Altima 3.5 SE shown in Charcoal Leather with optional equipment.

INDUCES A FEELING OF OVERALL WELL-BEING.

Known to alleviate leg cramps, fight claustrophobia, and elevate your mood.

Altima 3.5 SE shown in Charcoal Leather with optional equipment.

WHAT IT FEELS LIKE TO ENTER AN ENVIRONMENT. NOT JUST A SEAT COLOR. CHOOSE A SEAT COLOR.

PERFORMANCE

The new concept behind Altima interiors is called "environments" — a distinct feeling, more than just a color. Take the Charcoal interior environment. It's a zone of technical precision. Sleek. Dark. A tad mysterious, like 2 a.m. It combines the modern look of fine furniture with the moody feel of a stormy day.

SERENE

Enter the Blond environment. It feels familiar, comfortable. Not only are you surrounded by warm "soft hand" fabric, you have the option of perfectly matched wood-tone trim. A fully integrated, fully realized theme.

The Frost environment is light, inviting and contemporary, with cool, metallic-gray tones and fashion-forward thinking. Perfectly matched accents on the dash and center console add to the overall ambience. Now the choice is yours: which of these three environments do you see YOURSELF in?

CHARACTER

Altima 3.5 SE shown in Charcoal Leather with optional equipment.

Altima 3.5 SE shown in Blond Leather with optional equipment.

Altima 2.5 S shown in Frost Cloth with optional equipment.

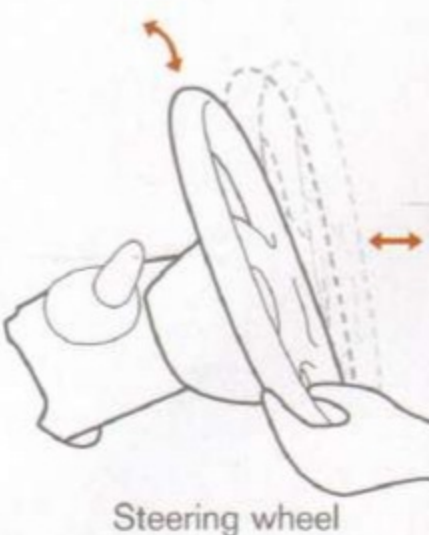

PIPELINE TO YOUR BRAIN.

Now hear this. You probably listen to music more in your car than you do in your living room.

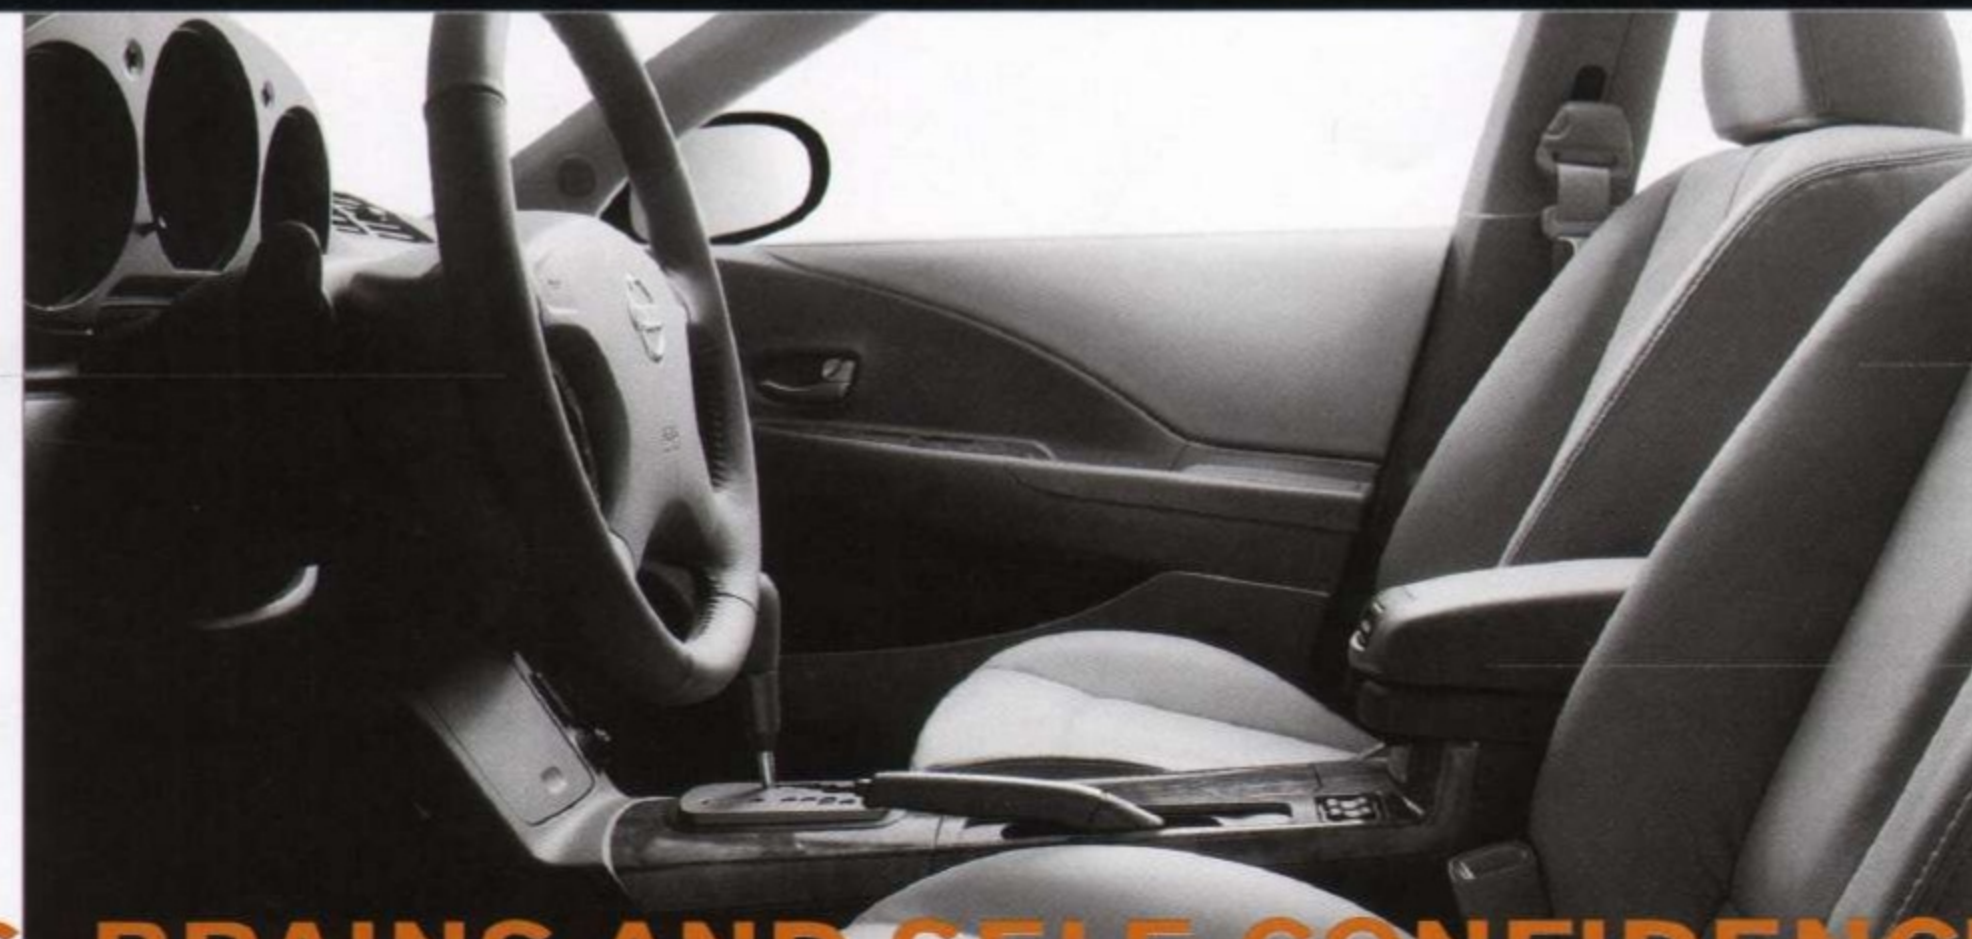

Which is why we made an acoustically tuned, Premium Bose® stereo with 6-disc in-dash autochanger available on Altima. With eight speakers and high-tech features like speed-compensating volume, you might not be getting back to your home system for quite some time.

YOUR CUSTOMIZED CORNER OF THE WIDE-OPEN WORLD Upon entering Altima's all-new cabin, you're sure to be struck by how roomy it is. Head room, leg room, shoulder room – all in vast abundance. Now comes the surprise. Measures are in place to tailor the driver's position to your exact size and shape. The seat adjusts eight ways.* The steering column doesn't just tilt, it telescopes toward you or away. And the armrest raises and lowers to your liking. A snug fit in the midst of all that space.

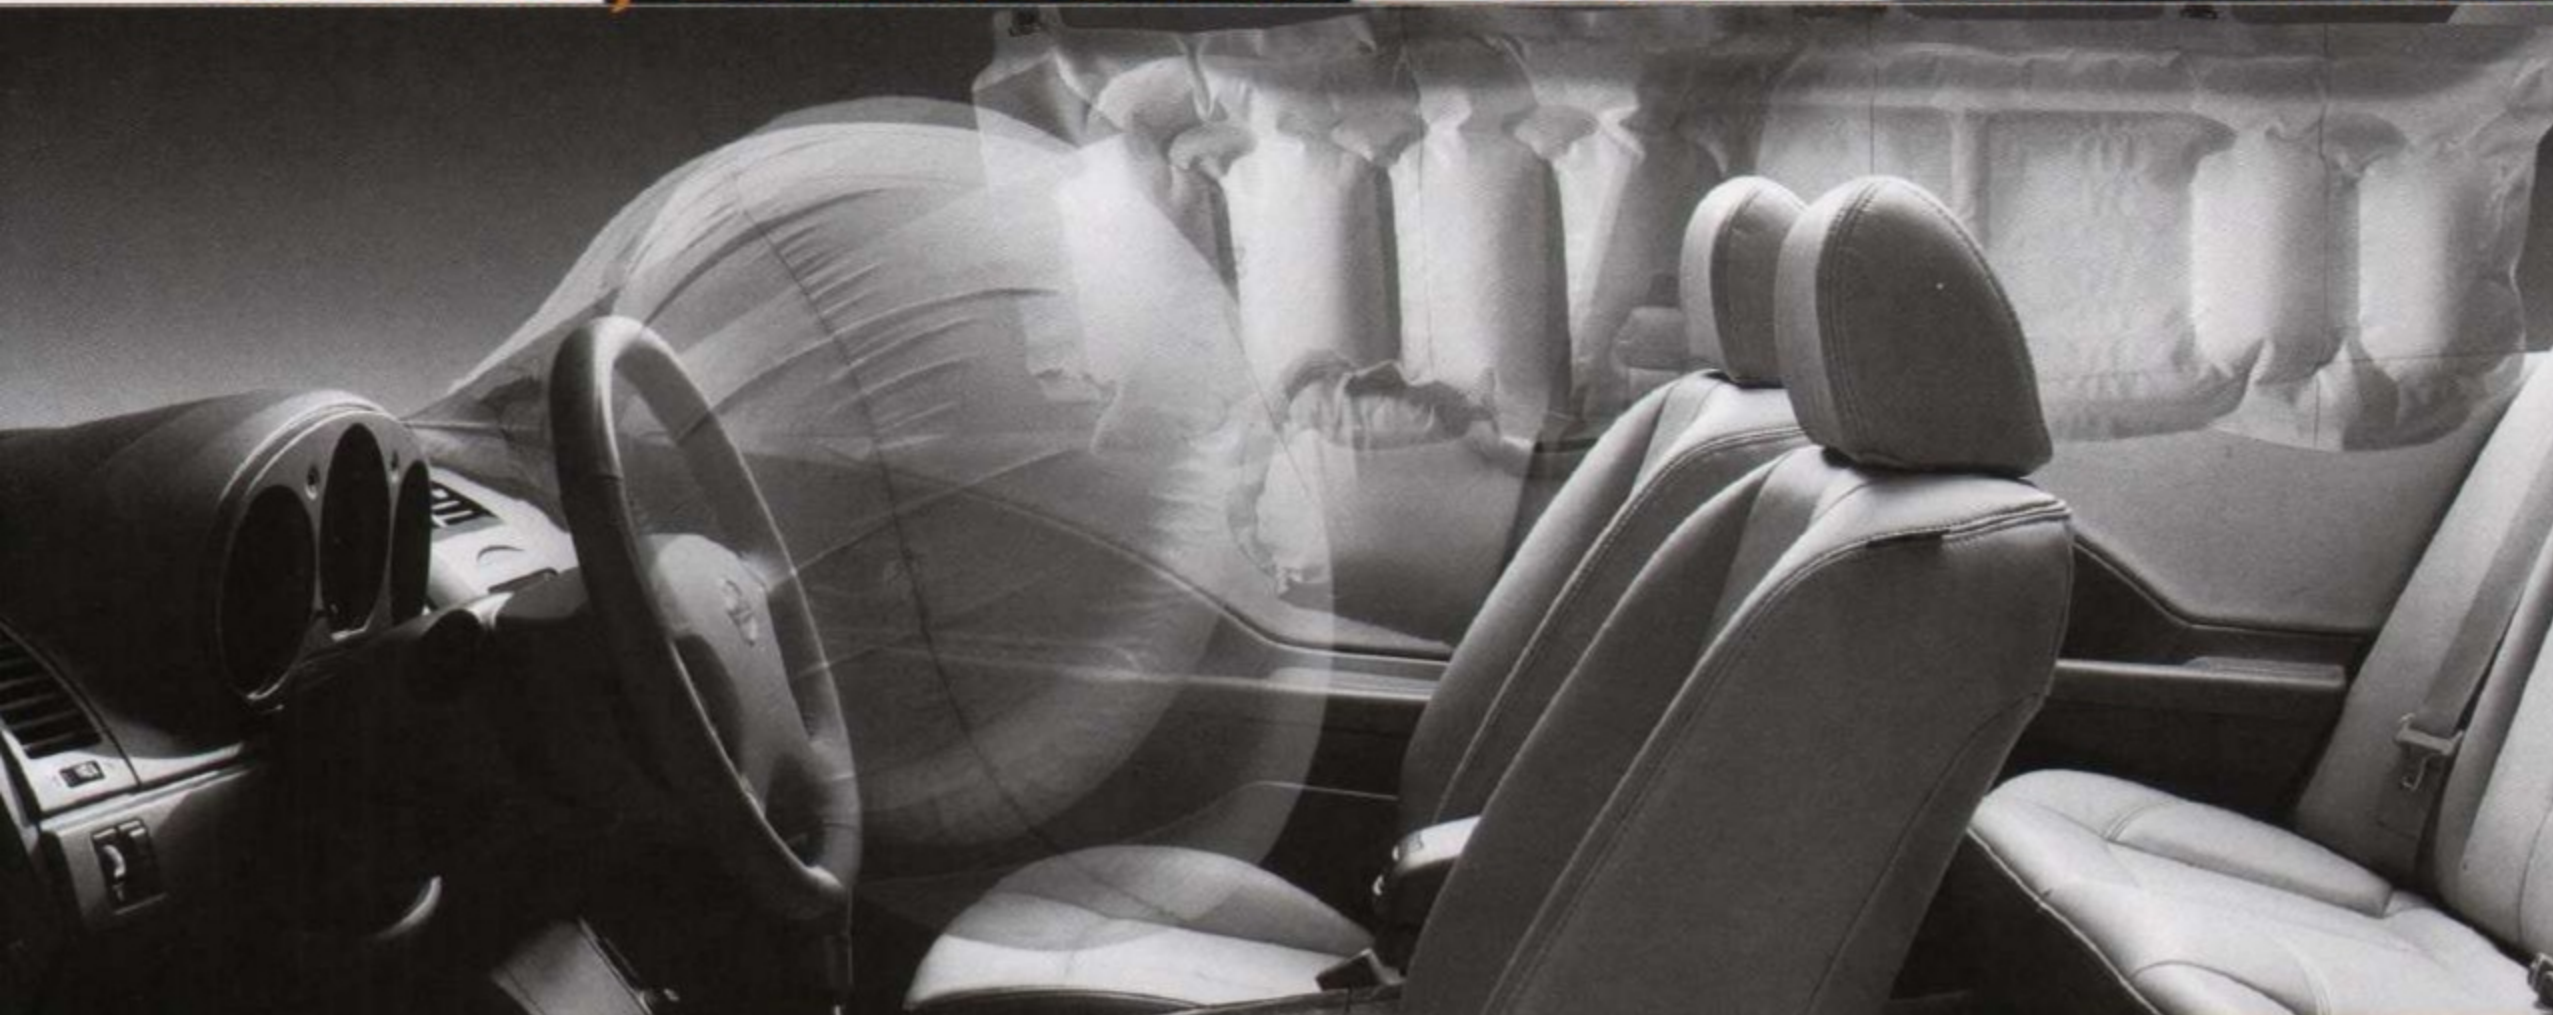

Steering wheel

Seat

Armrest

LOOKS, BRAINS AND SELF-CONFIDENCE. THE PERFECT PRESCRIPTION.

AIR BAGS ALL AROUND YOU We've put some of our most advanced safety engineering into this car. Seat belt buckle switches detect whether the seat belt is being used or not and alert the dual stage front air bags to deploy accordingly.** The optional side air bags are built into the seats, so they move when your seat does. But the big news is the optional side curtain air bags. They cover the side windows and help protect both front and rear-outboard passengers in case of a side-impact collision.

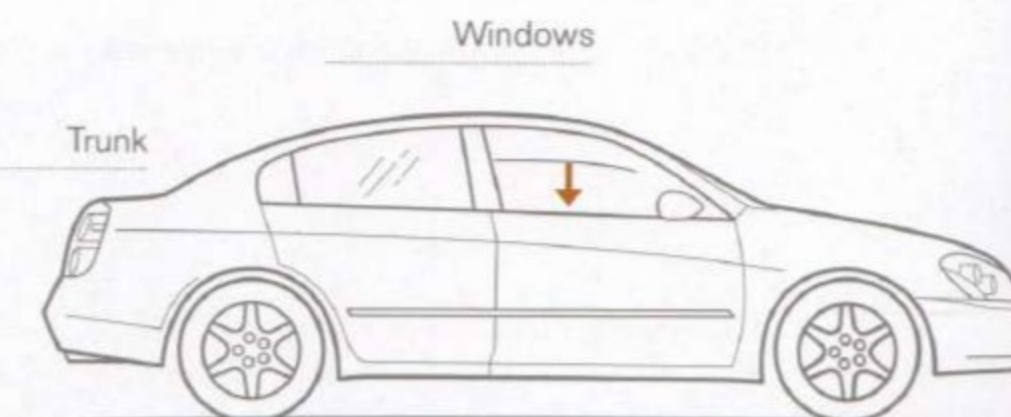

* See Specifications chart for availability. ** Please keep in mind that air bags are a supplemental restraint system and must always be used in conjunction with a seat belt. Also, a rear-facing child restraint must never be placed in the front-passenger's seat. In fact, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts, according to their size. Keep in mind, side air bags and side curtain air bags are designed to inflate in higher severity side collisions and inflate only on the side of the vehicle impacted. Primary protection is still provided by the lap and shoulder belt systems. Please see your owner's manual for more details. Inflated air bags shown for demonstration purposes only. Actual air bags deflate after deployment.

BEWARE OF GLARE There's always one. That guy bearing down on you in your rearview mirror – usually with his brights on. Reduce your annoyance (not to mention eyestrain and fatigue) with an auto-dimming mirror.* It adjusts itself automatically to different lighting conditions.

TRIP COMPUTER* One display, lots of possibilities. Want to know your average speed? This'll tell you. Outside air temperature? Covered. Miles 'til empty? Got it right here. Plus average mpg, driving time and two different trip meters.

AUTOMATIC TEMPERATURE CONTROL Notice how the word "automatic" keeps coming up when the subject is Altima? In this case, certain Altimas are equipped with Automatic Temperature Control.* Simply program your ideal temperature and the system works continuously to maintain it.

THE WIZARD IN YOUR POCKET The list keeps growing of all the things this handheld remote* can do. Yes, it still locks and unlocks the doors and operates the security system. But now, not only can you unlock the trunk at the touch of a button, you can roll down the windows, too.

USE AS DIRECTED BY THAT VOICE INSIDE YOUR HEAD.

DRIVEN. IN EVERYTHING WE DO.

With Nissan vehicles, you'll find an energizing difference out on the road.

With Nissan people, you'll find an unwavering commitment to getting it right – whatever your needs, wherever you are.

Shopping? Ready to buy? A long-term owner? We're ready to help. And when you're ready to buy or lease, **SignatureFinancing®** makes it easy with attractive rates, fast response and flexible terms. Once you drive a Nissan home, it's protected with New Vehicle Limited Warranties, including a 3-year/36,000-mile "bumper to bumper" **basic coverage** and a 5-year/60,000-mile powertrain coverage. (For complete information, see your Nissan retailer and read the actual warranty.) If you want something a little longer, add Nissan's own extended service agreement, **Security+Plus®**. And who knows more about caring for your vehicle than the company that built it? Demand **Genuine Nissan Parts** when it comes time for service. Keep in mind, too, that our website has a section reserved just for owners, where you'll find things like maintenance tips, service schedules and other information about caring for your Nissan.

SPECIFICATIONS

2.5 BASE, 2.5 S, 2.5 SL ENGINE

2.5-liter DOHC 16-valve 4-cylinder engine
Horsepower – 175 hp @ 6,000 rpm
Torque – 180 lb-ft @ 4,000 rpm
Platinum-tipped spark plugs
Valve timing – Continuously Variable Timing Control (CVTC)
Variable Intake System
Variable Capacity Muffler

3.5 SE ENGINE

3.5-liter DOHC 24-valve V6 engine
Horsepower – 240 hp @ 5,800 rpm
Torque – 246 lb-ft @ 4,400 rpm
Platinum-tipped spark plugs
Valve timing – Continuously Variable Timing Control (CVTC)
Variable Intake System

DRIVETRAIN

5-speed manual transmission
Optional: Electronically controlled 4-speed automatic overdrive transmission
Front engine/front-wheel drive
Optional: Traction Control System (3.5 SE; requires automatic transmission)

BRAKES

Power-assisted vented front disc/rear disc brakes
Optional: 4-wheel Anti-lock Braking System (ABS) with Brake Assist and Electronic Brake force Distribution (EBD) (2.5 S, 2.5 SL, 3.5 SE; requires front-seat side air bags and front and rear side curtains option)

WHEELS AND TIRES

16" Steel wheels with wheel covers (2.5 Base, 2.5 S)
16" Aluminum-alloy wheels (2.5 SL; part of Convenience Package on 2.5 S)
17" Aluminum-alloy wheels (3.5 SE)
P205/65TR16 Tires (2.5 Base, 2.5 S, 2.5 SL)
P215/55HR17 H-rated Tires (3.5 SE with automatic transmission)
P215/55VR17 V-rated Tires (3.5 SE with manual transmission)

SUSPENSION AND STEERING

Front: independent subframe-mounted strut-type
Rear: multi-link independent
Front and rear stabilizer bars
Sport-tuned suspension – firmer shocks and larger rear stabilizer bar (3.5 SE)
Power-assisted, engine-speed-sensitive, rack-and-pinion steering
Turning diameter – 37.4 ft. (2.5 Base, 2.5 S, 2.5 SL), 38.7 ft. (3.5 SE)

DIMENSIONS (INCHES)

Exterior	
Wheelbase	110.2
