SATELLITE

If a mid-size car fits your purse and pleasure it will pay you to look at Plymouth Satellite for 1974.

Satellite is a family car with flair. Whether you choose a coupe, hardtop, sedan or wagon each model has the style that compliments your good taste and sound judgment for value.

All Satellites have a Torsion-Quiet ride. A combination of unibody construction, torsion bar suspension and sound deadening components that add up to solid, stable comfort. A "Super-Quiet" sound package is standard on the Satellite Sebring Plus.

A Chrysler-engineered Electronic Ignition System is standard on all Satellites. It's a solid state system that eliminates distributor points and condenser and is practically maintenance-free. Saves you money at tune-up time and provides for faster starts in any kind of weather due to its consistently high voltage.

Satellite meets or exceeds all of the latest safety standards. There's a new front and rear impact-absorption bumper system. A new collapsible steering column. A new passenger restraint system. All Satellites have front disc brakes. And the Cleaner Air System has been improved to further reduce the level of automotive emissions.

So if you are looking for a car that's just a little smaller than the big ones and a whole lot bigger than the small ones, consider Satellite.
