GALANT

GALANT

The Galant LS is shown in Modena Silver Metallic and comes standard with dual air bags*, 141-hp 16-valve engine, automatic transmission, alloy wheels, integrated fog lamps, power glass sunroof, and available anti-lock braking system (ABS).

"The new thinking in automobiles" creates a sedan that will hold your family, your friends — and your interest.

When an engineering leader like Mitsubishi Motors applies over 75 years of automotive experience to the design of a midsize sedan, the results are remarkable.

Enter the 1994 Mitsubishi Galant, a contemporary five-passenger automobile that beautifully reflects Mitsubishi's strong engineering history, while meeting the needs of today's drivers. An automobile whose heritage provides a vast spectrum of confidence-inspiring qualities. Like the quality of advanced safety features. The quality of strong, reliable performance. And the

quality of spacious, thoughtfully conceived accommodations. These are valuable attributes in a car that's filled with them.

Mitsubishi design and engineering has also produced some bright new thinking in automobiles. A philosophy that brings unexpected qualities to the midsize sedan; qualities like character and personality. You find this in the outstanding performance. The striking styling. And the countless unique details that make this car both pleasing and practical. Galant is clearly a sedan for people who enjoy

driving more distinctive automobiles. You should expect nothing less from Mitsubishi, the company that created the thrilling 3000GT grand touring sports car and the sophisticated Diamante luxury performance sedan.

For more than 75 years, Mitsubishi's three diamonds have signified the company's commitment to automotive innovation through the implementation of thoughtful technology — technology to benefit both mankind and the environment. Mitsubishi. The new thinking in automobiles.

*Designed to supplement the three-point shoulder/lap safety belts.

GALANT

The Galant LS interior is shown with standard dual air bags, CFC-free air conditioning, AM/FM stereo cassette with six speakers, power and diversity antenna, and available compact disc player.

Thoughtful technology makes you the most important new feature in the Galant interior.

The term ergonomics is often used to describe the efficient interaction between a person and a machine. Mitsubishi calls it "thoughtful technology". In the new Mitsubishi Galant, this relationship between car, driver and passengers was the focus of intense study. A study that resulted in a completely new approach to our interior design. Which explains why every control, every button and every switch in the new Galant falls so readily to hand. And why every Galant has a height-adjustable steering column. An orthopedically contoured and height-adjustable driver's seat.

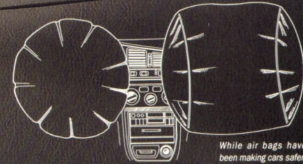

And an instrument panel that is refreshingly clean and uncluttered.

Thoughtful technology is the reason every Galant has a center console that's angled towards the driver, making the audio and ventilation systems effortless to use. Reach for the climate control, and you'll find large, clearly marked rotary dials. Turn on the radio without taking your eyes from the road. Set the cruise control or switch on the windshield wipers without taking your hands from the steering wheel.

Or simply sit back in the scientifically crafted, multi-

adjustable seat and relax... knowing that both a driver and front passenger-side air bag are standard. That the doors are reinforced with side-impact beams. And visibility in all directions is open and unobstructed. Even the front shoulder belts are height-adjustable to give a more comfortable and secure fit. No wonder the Galant feels so protective, so easy to drive and so rewarding to travel in.

With its unusually wide range of adjustments, the Galant's orthopedically designed driver's seat can be tailored to provide outstanding comfort and support, along with a commanding view of the road.

While air bags have been making cars safer, Mitsubishi has been working to make air bags safer. That's why our standard driver and front passenger air bags are made of a new, softer material. And when air bags are used to supplement the safety belts, they provide unparalleled protection in a frontal collision.

GALANT

The Galant LS interior is shown in gray luxury cloth fabric and comes standard with power windows, door locks and sideview mirrors, cruise control, six-way adjustable driver's seat, height-adjustable steering column and folding rear seat with valet lockout and center armrest.

Our new interior has the room you need, the quality you hoped for and comfort you may have never expected.

Inside the 1994 Mitsubishi Galant, you find generous leg room, surprising shoulder room, and a new, wide-body layout. The cabin is finished in soft, luxurious fabrics. And meticulous attention is given to stitching, upholstery, trim and components. This is an

interior where thoughtful details and quality materials are carefully sewn and sculpted into a spacious and accommodating design. A design with an emphasis on comfort, room and hospitality.

Seatbelt system has been altered to clearly depict interior. This system should be used properly at all times while driving.

MITSUBISHI GALANT

The Galant ES is shown in Almaden Red Pearl and comes standard with dual air bags, 141-hp 16-valve engine, automatic transmission, CFC-free air conditioning, power windows, door locks and sideview mirrors, cruise control, five-way adjustable driver's seat, folding rear seat with valet lockout and center armrest, AM/FM stereo cassette with six speakers, power and diversity antenna, and available anti-lock braking system (ABS).

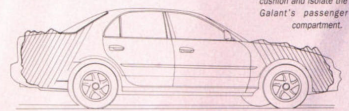

The 1994 Mitsubishi Galant — A beautiful new design that protects you, your passengers and your investment.

When you look at the exterior of a 1994 Galant, you see more than striking styling. More than leading-edge aerodynamic design. And more than one of the finest, most protective automotive finishes in the industry. Because the same bold styling that makes the new Galant a contemporary classic also contributes to this sedan's immense strength and integrity. Strength that will protect you and your passengers.

Structural integrity that will preserve your investment. Mitsubishi's unit body construction technique actually blends the vehicle's body and frame together into one solid, sculptured and integrated form. The result is a vehicle that feels as if it were carved from a single piece of steel. A vehicle that is rigid, flex-free, and secure. It's a feeling of safety and solidity you can expect to enjoy for years to come.

Yet the Galant's body is designed for more than sheer strength and visual beauty. With its state-of-the-art aerodynamic shape, the Galant is also styled to slip quietly

through the wind, as headlights, bumpers, door handles and glass are all fitted flush to the exterior. At cruising speed, the hushed interior serves as a quiet reminder of the Galant's liquid shape.

Four hundred hours of super-computer development time was devoted to improving the crashworthiness of the Galant's body structure. As a result, front and rear crumple zones are engineered to gradually absorb impact and help cushion and isolate the Galant's passenger compartment.

Further security is provided by high tensile tubular steel door beams that already meet 1997 federal safety requirements. A feature designed to protect occupants in the event of a side impact.

Extensive testing in the wind tunnel and hundreds of hours of super-computer development time enabled Mitsubishi engineers to perfect the Galant's form, resulting in a shape so clean and elegant that it slips through the air effortlessly. Class leading aerodynamics are just one reason why the Galant moves so smoothly, quietly and efficiently.

S GALANT

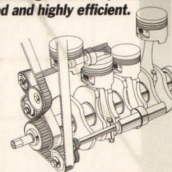

The Galant S is shown in Northstar White and comes standard with dual air bags, 141-hp 16-valve engine, five-speed manual transmission, five-way adjustable driver's seat, height-adjustable front shoulder belts, height-adjustable steering column, dual remote side-view mirrors and power-assist steering.

As the years pass and the miles accumulate, the Mitsubishi Galant continues to build your confidence.

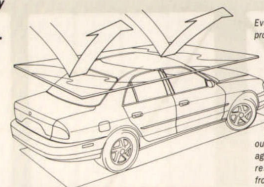

Any new car will look impressive under the bright lights of a showroom floor. But the real test of a well engineered automobile comes miles down the road. That's why every 1994 Galant is carefully assembled at our state-of-the-art facility in Normal, Illinois; and filled with details designed to make this car durable, reliable and trouble-free for the long run. Technology like long-life engine coolant. Reinforced main drivetrain components. Extensive use of galvanized steel body panels. Maintenance-free power steering. Maintenance-free wheel bearings. And a wider, more durable timing belt. These are features you may

never think about in the showroom, but they are another example of Mitsubishi's new thinking in automobiles. A thinking that says our new sedan should provide everything you want in a new car, along with some things you may have never expected. Galant and the Environment Mitsubishi has also taken great care to ensure that the new Galant employs the latest in environmentally-sensitive technologies. That's why every Galant with air conditioning uses no ozone-damaging refrigerant. Major molded plastic components are coded for easy recycling. And gaskets and brake linings are free of

asbestos. Even the Galant's fuel injection system is mindful of the environment, ensuring that the engine is always well tuned and highly efficient.

Every major component in Galant's new engine has been extensively tested, thoroughly scrutinized and painstakingly improved to provide lasting reliability. From the stronger timing belt to the reinforced crankshaft and cast iron block, each Galant is loaded with durable performance. Performance made smoother and more refined by Mitsubishi's patented Dual Engine Stabilizers™.

Every 1994 Galant is protected by DIAMOND COAT™, one of the most advanced automotive finishes in the industry. A finish that not only looks deep and lustrous, but one that provides outstanding protection against the elements, resisting everything from harsh sunlight to acid rain.

* DIAMOND COAT is a trademark of PPG Industries, Inc.

GALANT

The Galant GS is shown in Kalapana Black and comes standard with dual air bags, 160-hp DOHC high performance 16-valve engine, five-speed manual transmission, sport-tuned suspension, EPS-II™ vehicle-speed-sensitive power steering, alloy wheels, integrated fog lamps, rear spoiler, CFC-free air conditioning, six-way adjustable driver's seat, folding rear seat with valet lockout and center armrest, AM/FM stereo cassette with CD player and six speakers, power glass sunroof, and available anti-lock braking system (ABS).

Achieving an uncommon balance of performance, pleasure and practicality.

At Mitsubishi, the term "performance" has become synonymous with balance. Like the balance between crisp, athletic handling and a calm, relaxed ride. Or the balance between robust acceleration and responsible fuel economy. Even the opposing interests of safety and sportiness have been integrated into the performance character of Mitsubishi's newest sedan. It's all a matter of balance, and it's all part of the Galant's personality.

Take the Galant's powerful 16-valve engine, for instance. Its generous size of 2.4 liters ensures quick response from a stoplight, substantial horsepower for hills and passing, and the kind of effortless highway performance you would expect from a sports sedan. Yet this engine is surprisingly smooth and subtle,

thanks to Mitsubishi's patented Dual Engine Stabilizers™ and a new engine mounting technique that work together to reduce noise and vibration. The engine is refined even further by an advanced and highly reliable electronic fuel injection system that makes clean and efficient use of unleaded gasoline.

To complement the performance of its strong and quiet engine, the Galant uses an equally talented suspension. Moving well beyond conventional design, Mitsubishi created a completely new suspension system for the Galant, using independent multi-link technology at all four corners of the car. A technology that raises the standards of ride quality and handling response. As the name implies, multi-link suspension provides a network

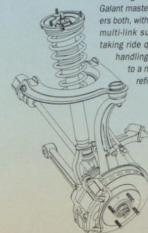

of steel arms that precisely hold and discipline each of the Galant's wheels, ensuring bright, natural handling; while at the same time allowing the tires great freedom to absorb even the roughest pavement. The benefit is a very smooth and limber ride coupled with excellent control.

Together, the Galant's new engine and suspension have created a perfect relationship between soothing refinement and quick reflexes. Performance you may have never expected from a mid-size sedan.

A new and extensively tested technology called Fuzzy Logic shift control enables the Galant's automatic transmission to perform like a professional driver. This new transmission control system can judge if you are driving up hill, down hill or on a twisty road, and then smoothly chooses the right gear, at the right time.

Some sedans provide a smooth, comfortable ride. Others generate responsive, reassuring handling. The 1994 Galant masterfully delivers both, with its all-new multi-link suspension taking ride quality and handling precision to a new level of refinement.

GALANT

The Mitsubishi Warranty
Mitsubishi's confidence in the quality of the 1994 Galant is reflected by the following warranties:

- Three-year/36,000-mile Bumper-To-Bumper Limited Warranty
- Five-year/60,000-mile Powertrain Limited Warranty
- Seven-year/100,000-mile Anti-Corrosion/Perforation Limited Warranty

Diamond Care™ Service
Diamond Care ensures that your new Galant is thoroughly prepared, inspected and explained prior to delivery. After delivery, a toll-free number brings 24-hour road service. For the first 36 months or 36,000 miles, free towing will be provided to the nearest Mitsubishi Motors Dealer for a warrantable repair. And after the first 1,000 miles of ownership, you are invited back for a free vehicle inspection.

Mitsubishi Triple Diamond Protection Portfolio™
Choose from three Mitsubishi extended service contracts to extend your comprehensive service coverage for up to six years or 100,000 miles. Ask your Mitsubishi Motors Dealer for details.

BUCKLE-UP FOR SAFETY.
