passengers... just in case. So every Oldsmobile has four-wheel anti-lock brakes, power rack-and-pinion steering, responsive engine power, exceptional visibility and more—what you need when reacting to unforeseen hazards. But in the event of the unavoidable, every Oldsmobile also has been designed to help

Eight and Ninety Eight models feature a passenger-side air bag. The body structure forms a steel safety cage. And the interior includes flame-retardant fabrics and padded, rounded surfaces. Safety is engineered into every vehicle we build. Knowing that, you can just enjoy your Oldsmobile.

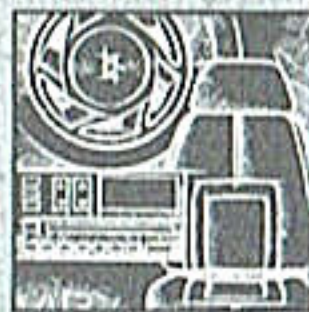

Oldsmobile's standard computerized four-wheel anti-lock brakes (ABS) help you maintain control by minimizing the chance of wheel lockup and skidding during hard braking.

The body structure forms a protective steel cocoon. Front and rear crush zones help absorb and guide crash energy away from the passenger compartment.

SPECIAL EDITIONS.

Buying a new car should be an enjoyable experience. But comparing models and options and figuring out the costs of the various combinations can be somewhat confusing. So we developed a way to make your shopping experience simpler, more pleasant and more rewarding. We've taken popular Oldsmobile models and equipped them with the features you've told us you want. Then we gave them a special price to give you the best value possible. We call these our Special Editions.

- #### IMPORTANT WORDS ABOUT THIS CATALOG:
- We have tried to make this catalog as comprehensive and factual as possible. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Since some information may have been updated since the time of printing, please check with your Oldsmobile dealer for complete details.
- **A WORD ABOUT ENGINES:** Oldsmobiles are equipped with engines produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide.
 - **A WORD ABOUT ASSEMBLY:** Oldsmobiles are assembled by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. Oldsmobiles incorporate thousands of components produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Oldsmobiles with different or differently sourced components than originally scheduled. All such components have been approved for use in Oldsmobiles and will provide the quality performance associated with the Oldsmobile name. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered or, if there are changes, that they are acceptable to you.
 - **A WORD ABOUT UPDATED SERVICE INFORMATION:** Oldsmobile regularly sends its dealers useful service bulletins about Oldsmobile products. Oldsmobile monitors product performance in the

field. We then prepare bulletins for servicing our products better. Now you can get these bulletins, too. Ask your dealer. To get ordering information, call toll-free 1-800-551-4123.

- **A WORD ABOUT CORROSION PROTECTION:** Oldsmobiles are designed and built to resist corrosion. All body sheet metal components are warranted against rust-through from corrosion for six years/100,000 miles. There is also no deductible for rust-through repairs. Application of additional rust-inhibiting materials is not required under the corrosion coverage.
- **A WORD ABOUT WARRANTY:** The GM 3-year/36,000-mile Bumper-to-Bumper Warranty covers repairs for any new Oldsmobile, including labor and parts, to correct any defects in material or workmanship occurring during the warranty period. The complete vehicle (except tires, which are covered by their manufacturer) will be covered for three years or 36,000 miles, whichever comes first, with no deductible charges. See your Oldsmobile dealer for terms of these limited warranties.
