COLT E: ECONOMY AND EFFICIENCY

Plymouth Colt E 5-Door Hatchback

Colt E places strong emphasis on providing transportation with a minimum of expense and a maximum of efficiency. To this end the 3-door and 5-door hatchback models exhibit certain common high mileage traits. Both are powered by a gas-stingy yet peppy 1.4-litre, 4-cylinder engine. Both may be operated on less-expensive gasoline and both combine the economy virtues of front-wheel-drive with a sense of driving purpose that rack-and-pinion steering teamed with fully independent suspension delivers.

Standard on the Colt E 3-door is a 4-speed manual overdrive transaxle that squeezes the most out of each drop of fuel. On the 5-door E, Mitsubishi's unique 4 x 2 Twin-Stick shifter allows you to take advantage of in-town or highway gear ratios for optimum performance or economy.

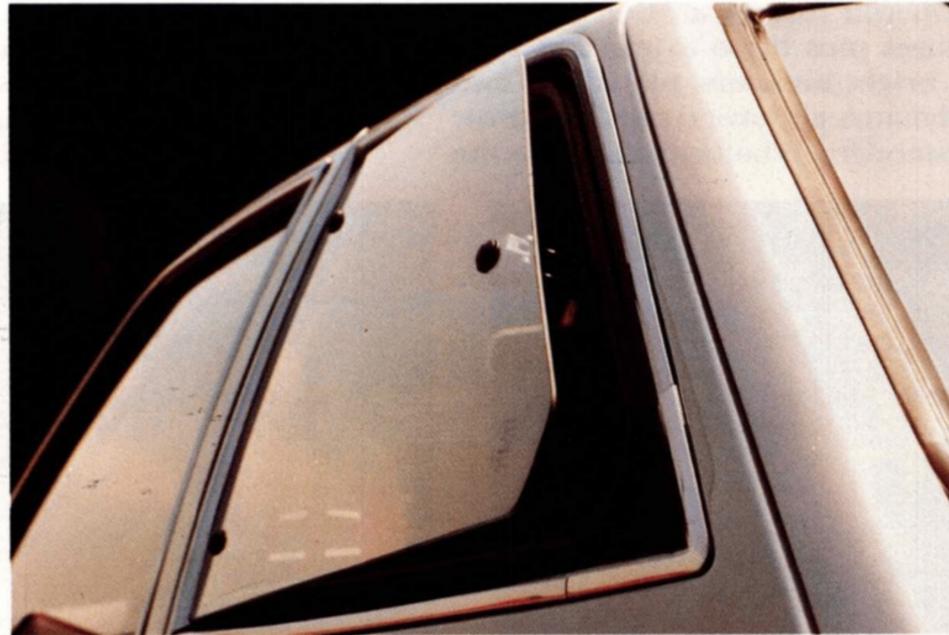

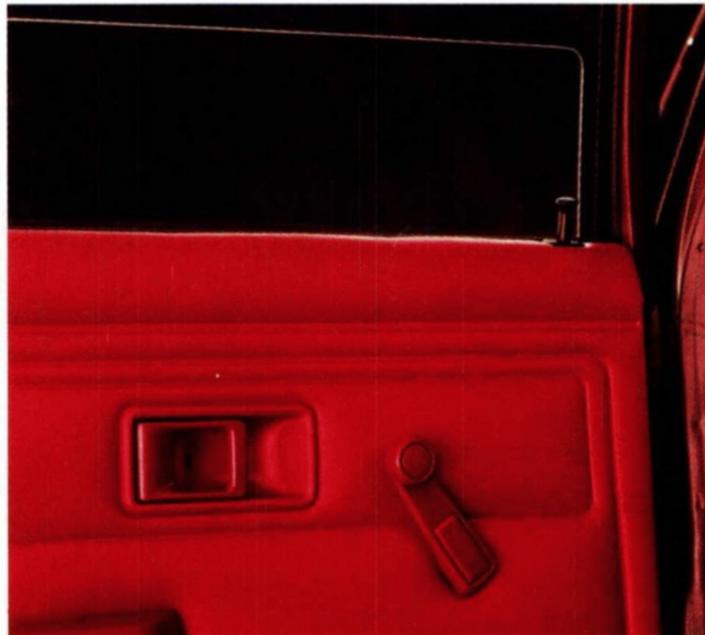

But Colt E is more than just mere spartan transportation. Consider that its pile carpeting, reclining bucket seats, electrically-heated rear window and power brakes are all standard equipment. So... whether you choose the 3-door for its clean sporty lines or the 5-door for its rear seat entry convenience, rest assured that Colt E will get where you're going with stylish relaxed efficiency!

Colt . . . built by Mitsubishi Motors for Plymouth!

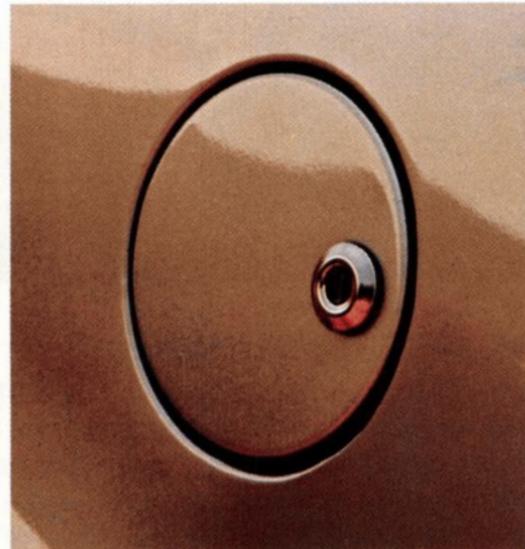

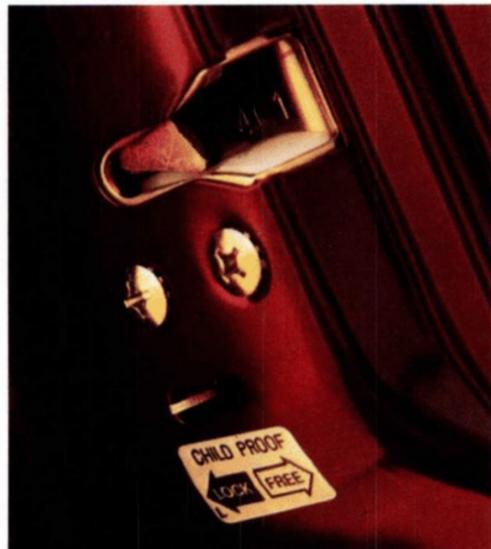

INTERIOR ATTRACTIONS

On the inside the Colt is a marvel of space-efficient packaging. Front bucket seats and a fold-down rear bench seats are designed to carry five passengers. All-vinyl trim is standard on Colt E models and is offered with a selection of eight eye-appealing exterior colours. Add to this impressive choice, color-keyed door trim panels, standard pile carpeting, plus full instrumentation and you'll agree Colt is generous on convenience and comfort.

CONVENIENCE FEATURES

- 1. Roll-Down Rear Windows**
 All 5-door Colt models feature the added convenience of roll-down rear windows. This provides rear seat passengers a maximum of flexibility in ventilation.
- 2. Flip-Out Quarter Windows**
 Colt 3-door models include flip-out rear quarter windows specifically designed to promote optimal air circulation throughout the interior.
- 3. Child-Proof, Non-Override Rear Door Locks**
 Keep your most precious cargo safe and protected from the possibility of an accidental door opening.
- 4. Locking Gas Cap**
 Colt's theft-resistant fuel filler door allows you and not others to control what goes into your fuel tank. Peace of mind that's standard.
- 5. Rear Security Shelf Panel**
 When Colt's rear seat-back is raised the shelf panel doubles as a security screen to conceal the cargo area contents from prying eyes. Standard on all models except Colt E 3-door.

COLT DL: ADDED FLAIR IN 3- OR 5-DOORS

If your preference is for Colt DL you receive all Colt's regular economy and convenience features plus those extras that spell deluxe treatment. Tinted glass, bright bumpers, mouldings and wheel treatments, plus an aerodynamically-styled outside mirror and rear security shelf panel are standard. Whether you choose the

3-door or 5-door hatchback model, the Twin-Stick manual transmission is also standard. That's a money-saving bonus, because the economy range allows Colt's 1.4-litre engine to operate at lower speed, thereby reducing engine wear, noise and fuel consumption, yet it doesn't rob you of the option of performance.

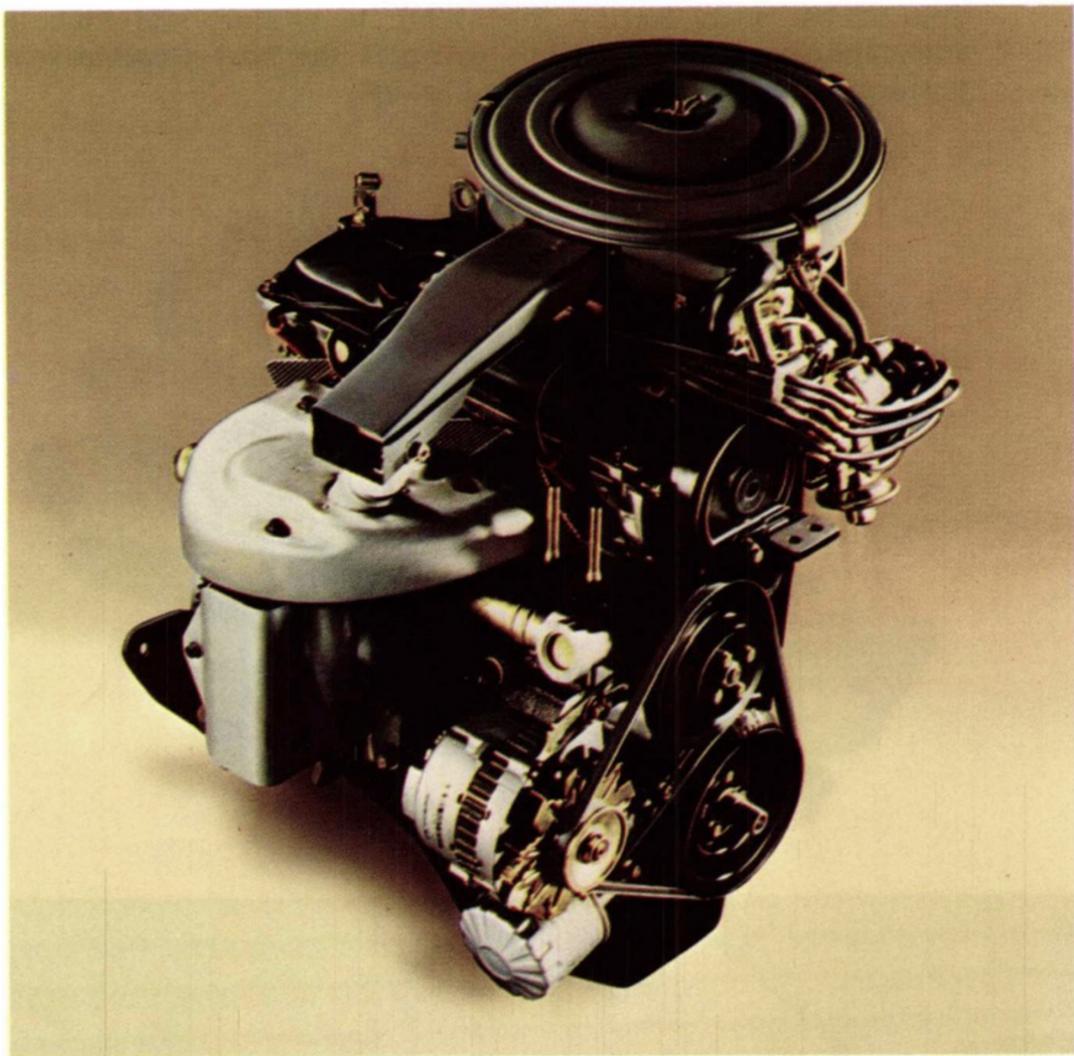

COLT DL 3-DOOR INTERIORS

For 1984, 3-door Colt DL's feature new cord velour cloth door and seat inserts. Available in four colours, including two 2-tone combinations (black-and-grey or brown-and-beige), these new trims add a youthful sparkle to the Colt DL's interior.

COLT DL 5-DOOR INTERIORS

The 5-door Colt DL also has velour, but with the luxury of full-facings for the cloth-and-vinyl bucket seats, offered in four fashionable colours including two 2-tone combinations (black-and-grey or brown-and-beige). It's a pleasing comfort you'll really appreciate in all kinds of weather.

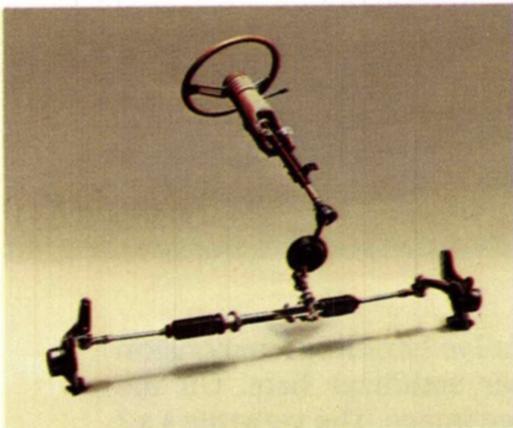

1.4-LITRE ENGINE

This naturally-aspirated, single overhead cam engine provides the perfect power-to-weight match for Colt's efficiency size. Electronic ignition insures smooth-running operation, and power and torque outputs are meticulously calibrated to deliver lively yet economical performance. The fact that the 1.4-litre engine can also run on less-expensive regular gas makes Colt an even greater economy value.

RACK-AND-PINION STEERING

Colt's manual rack-and-pinion steering combines with front-wheel-drive to produce precise, responsive handling characteristics that are neither too stiff nor too sloppy. Standard all models.

BRAKING — BALANCED POWER

Power front disc brakes and self-adjusting rear drums are standard equipment on all Colt models. Diagonally-balanced, they're a combination that guarantees sure-footed stopping response regardless of the driving conditions.

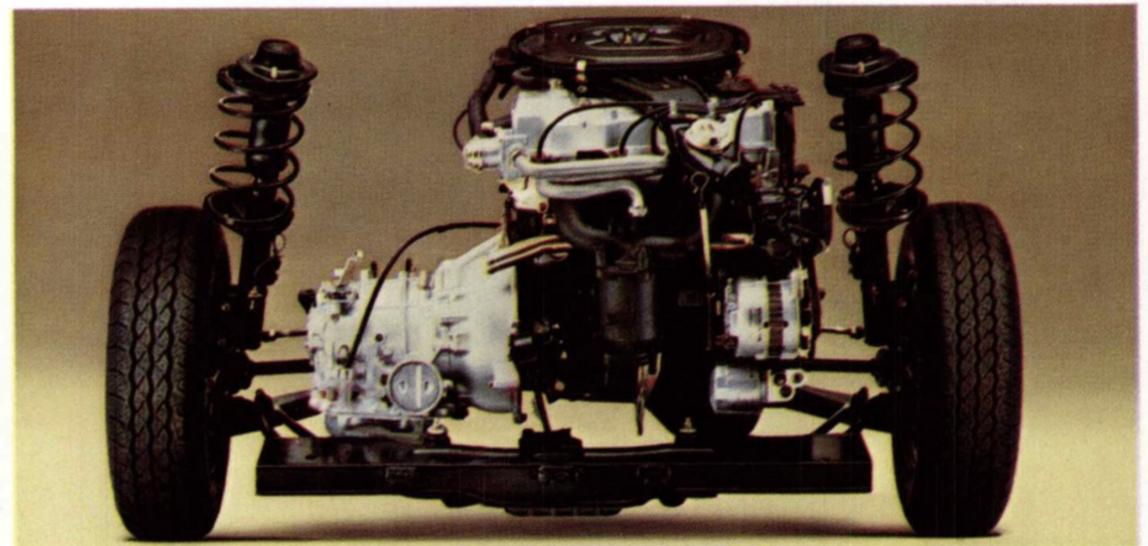

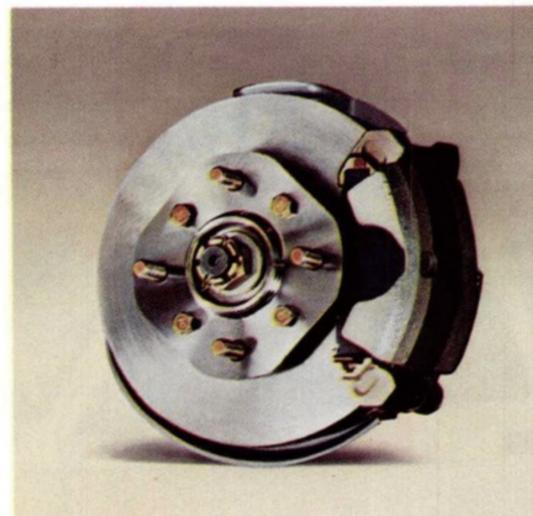

SUPER SHIFT TRANSMISSION

Mitsubishi's 4 x 2 Twin-Stick manual transaxle offers the versatile performance of either four low gear ratios (power range) designed for quick acceleration and stop-and-go city driving, or four high gear ratios (economy range) for highway cruising. Standard Colt E 5-door and Colt DL 3- and 5-door models.

COIL SPRING SUSPENSION

Macpherson-type strut front suspension and fully independent trailing arm coil spring rear suspension smooth out even the roughest roads that Colt may encounter. On 3-door Colt DL models equipped with the GTS Package, a sport suspension system with special gas-filled front shock absorbers further enhance the performance suspension characteristics of the sporty Colt GTS.

FRONT-DRIVE EFFICIENCY

Colt's front-wheel-drive design cleverly positions the car's engine weight directly over the front driving wheels. The result is dependable straight-line tracking, especially in snow or loose gravel conditions and the added benefits of reduced vehicle weight plus increased passenger compartment roominess.

Not only does Colt's hatchback design make access to the rear cargo area a snap, but the angle of the liftgate glass area translates into excellent rear vision. With the rear seat up to accommodate passengers, 5-door models handle 198 dm³ (7 cu. ft.) of space for stowables . . . 184 dm³ (6.5 cu. ft.) on 3-door models.

BUCKET SEATS FOR YOUR ADDED COMFORT

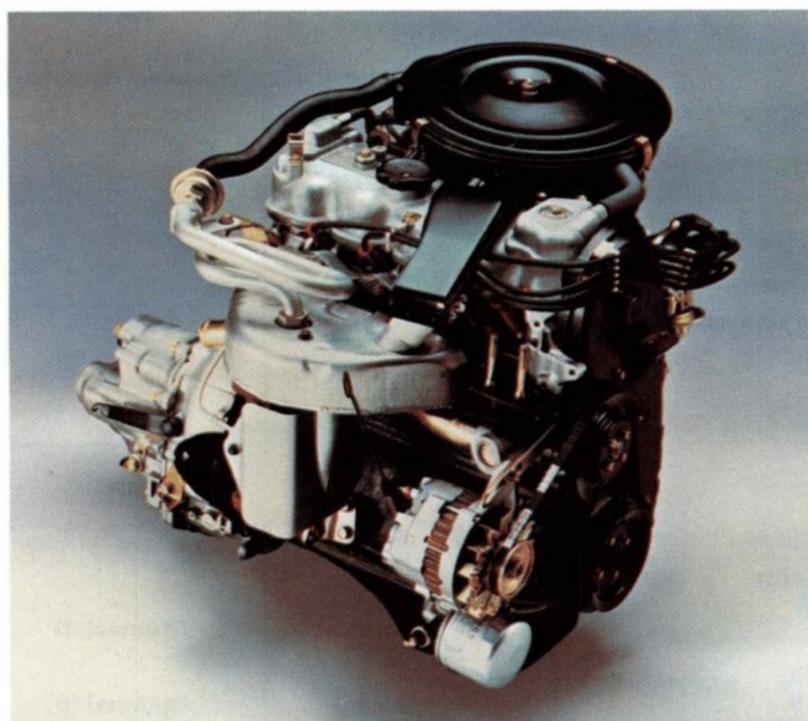

In addition to their lumbar body-supporting, contoured design, all Colt bucket seats feature the ability to recline, and include adjustable headrests. Colt lets you pick the best possible seat position for personal comfort and safety.

COLT GTS

If you prefer the Colt DL 3-door hatchback with optional GTS Package, you enter the world of Colt's sporty nature. Extra wide steel-belted radial tires, unique blackout bumper and moulding treatment, black styled steel road wheels with bright trim rings, and dual aero-styled power-adjustable mirrors give this Colt an aggressive appearance.

Beneath what meets the eye, there's Rallye-handling suspension complete with heavy-duty front and rear stabilizer bars. On the outside, Colt GTS lives up to its performance image. The versatile 4 x 2 Twin-Stick shift lever is complemented by an instrument cluster that features a tachometer. No matter how you look at it, the sport in Colt GTS means driving fun.
