Diesel Power

Advantages of Diesel Powered Vehicles

The Chrysler Group diesel engines are at the leading edge of modern diesel power train development. Thanks to advanced technologies, our diesel engines offer amazing fuel economy, increased performance, efficiency and comfort. The Chrysler Group diesel technology is powerful, clean and quiet and offers advantages over petrol engines.

→ Outstanding Performance

More torque, generated from lower engine speeds, provides better acceleration.

→ Lower Fuel Consumption (combined cycle)

Diesel fuel combusts more efficiently, so less fuel is required to generate the same level of performance.

→ Improved Durability

There are a few components associated with the 'compression ignition' process of diesel engines, which leads to increased durability and reduces maintenance requirements.

→ Reduced Emissions

Gas emissions are reduced, especially the greenhouse gas carbon dioxide, which is better for the environment.

Chrysler's Powerful 300C SRT8 Sedan and Touring

The 300C SRT8 is engineered for incredible acceleration and stopping power, with 20-inch alloy wheels, performance-tuned suspension and Brembo brakes. The heart of the 300C SRT8 is the larger capacity engine, which takes the HEMI® to the next level with 26 percent more power than the 5.7 litre version. The Chrysler 300C SRT8 suspension and chassis are tuned for outstanding ride and handling across the broadest dynamic range that consumers are likely to experience.

Fire Breathing Jeep® Grand Cherokee

When Jeep set out to create its quickest-ever model, it was the race track rather than the mud track in mind. The SRT8 is not intended to be off-road capable. Instead, with this injection of SRT DNA, the Grand Cherokee SRT8 establishes a fresh benchmark for high-performance SUVs. Jeep customers are offered a choice of three exterior colours for their Grand Cherokee SRT8 - brilliant black, bright silver or steel blue - cloth with the interior finished in medium slate grey leather.

High Performance Chrysler Crossfire

The Crossfire SRT8 defines performance for the Chrysler brand and offers driving enthusiasts an absolute dream. With its enhanced performance and styling and a 53 percent increase over the naturally aspirated engine, the Crossfire SRT8 has been designed to delight the performance enthusiast. The Crossfire SRT8 features an upgraded five-speed automatic transmission with Autodrive, race-inspired seats, as well as unique lighter, 15-spoke performance-themed SRT 18 inch front and 19 inch rear alloy wheels.
