

**NISSAN MURANO**

A shift can change a person,  
a life,  
the world.  
Or, it can simply change  
the way you move through it.

THE CITY

## THE SEEKER.

AND WHEN THE SEEKER MOVES, THE JUNGLE STIRS. WHO IS THIS RULER OF ASPHALT AND ALL THINGS URBAN? THIS SUV WITH AN INSTINCT FOR FINDING THE UNUSUAL AND EXTRAORDINARY. INTRODUCING THE NISSAN MURANO. SLEEK. POWERFUL. WITH A CORNER TABLE ALWAYS IN SIGHT NO MATTER WHAT CORNER OF THE WORLD IT INHABITS.

## THE PLAN.

SEARCH AND ENJOY. Dinner for two at Union and Buchanan. After that, the night is wide open. A perfect time to tap into Murano's other high-tech side. Starting with an award-winning\* 245-hp V6 aluminum engine. Matched with one of the most advanced and smoothest-shifting transmissions you'll ever experience. An available digital Bose® audio system with seven speakers. An Information Center that's a guide to everything you could want in your SUV. And something no connoisseur of on-boarding should be without: A DVD-based Nissan Navigation System.\*\* Capability and comfort. It's all part of the good life. Next stop: Secret hilltop location for a city view.

\*Ward's Auto World and Ward's Engine And Vehicle Technology Update, January 2002.

\*\*Factory-installed option. Never program while driving. Requires accurate GPS service to be available and operating for features to function properly. Mapping may not be detailed in all areas. Some Nissan dealers may not appear on the current mapping areas. Periodic updates to the DVD-ROM will be available for an additional cost. See your Nissan dealer for details.

2 MILES TO INSPIRATION

46 SQUARE MILES.  
10,000 RESTAURANTS.

TWO FOR DINNER.

Murano SE shown in  
Sheer Silver.

You notice how easy it is to get in and out of Murano. Your passengers notice how easy it is to get in and out of Murano. The valet?

### SHARE THE SPOILS.

Well, now that he's recovered from Murano's forward-looking exterior, he's fixated on the stylish interior. No doubt, he'll soon notice the generous use of real aluminum throughout the cabin. And perhaps miss some of the more subtle touches that, in the end, can mean the most. Like available heated front seats with two settings. And a memory system that not only includes the driver's seat and sideview mirrors (that in itself is quite considerate), but also power-adjustable foot pedals. The seats are contoured and form-fitting, while the doors are designed to completely cover the sill, so your clothes won't get muddy in the rain. Differences anyone can feel and see. On their way in. Or out.

Murano SL shown in Cabernet Leather with optional equipment.

**IT AIMS FOR  
YOUR MIND.  
AND CAPTURES  
YOUR SOUL.**

CONTROL. INDEPENDENCE. AND THE LATEST IN TECHNOLOGY. POWERFUL MOTIVATORS FOR ONE POWERFUL IDEA. THE INFORMATION CENTER. A VIRTUAL NERVE CENTER FOR RAW DATA. HERE YOU CAN CHECK THE AIR CONDITIONING SETTINGS, OUTSIDE TEMPERATURE, AUDIO SYSTEM, AND TIME, AS WELL AS MONITOR THE STATUS OF MURANO'S MOST ADVANCED SYSTEMS, INCLUDING A DRIVE COMPUTER, AVAILABLE DVD-BASED NISSAN NAVIGATION SYSTEM,\* AND IN THE PROCESS, YOUR OWN SENSES WILL SHARPEN. YOU MAY NEVER MISTAKE CHOCOLATE MOUSSE FOR PUDDING AGAIN.

OK, take a bite out of a biscotto and turn your attention to the right. Dual refers to standard Dual Zone Automatic Temperature Control. The ultimate in personalized luxury. Now instead of continually compromising on the temperature, the two of you can enjoy your own individualized comfort zone. And thanks to the higher positioning of the rear air conditioning vents, your rear passengers won't miss out either.

When it comes to music, there's nothing like the incredible richness of an available digital Bose® audio system with an in-dash 6-CD changer. 225 watts of precision engineering. Six channels of customized equalization and signal processing. All of which delivers a quality sound to rival many home systems. RDS (Radio Data System) – a feature that displays the name of the band or artist – rounds out the moment. Giving you an experience you monitor on the Information Center, but feel through your soul.

But let's suppose you really are tooling down Sunset Blvd. The sun is shining. Your favorite station is playing. And you want to see stars. You could pick up a star map and spend your afternoon searching for your favorite thespians. Or you could pull over, hop in back, slip in a DVD and get a lot closer. That's because Murano offers an available Nissan Mobile Entertainment System\* you can play through the digital Bose® audio system. And an easy-viewing 6.5" color monitor conveniently placed in the center console.

NISSAN MOBILE ENTERTAINMENT SYSTEM\*

Just follow the lead of the available DVD-based Nissan Navigation System\*\* with patented 3-D mapping. Pinpoint a destination by address, intersection, even the closest ATM. Sometimes though, you might want to turn the system off and see where your curiosity takes you.

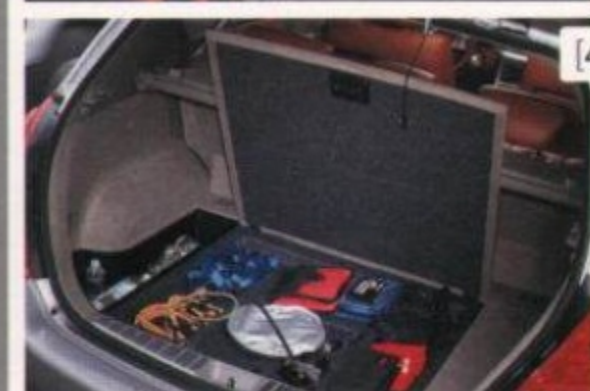

INFORMATION CENTER

\* Late availability.  
\*\* Factory-installed option. Never program while driving. Requires accurate GPS service to be available and operating for features to function properly. Mapping may not be detailed in all areas. Some Nissan dealers may not appear on the current mapping areas. Periodic updates to the DVD-ROM will be available for an additional cost. See your Nissan dealer for details.

SUNDAY, 4 PM. You're about to call it quits when the sign catches your eye. Designer plant sale. Could this be the end of your quest for a miniature red banana plant? You deftly maneuver into the space. Immediately, you see it. It's perfect. What's more, there's a special on those oversize planters. You pay up quickly. And just as quickly, you're opening the lightweight hatch, pulling the side handles and marvelling yet again as the rear seats effortlessly flip down. Now for the hard part. Deciding if the plants look better on the front porch or rear patio.

[3]

[4]

[1]

[2]

It's all about more. More room for your rear passengers. More room for cargo. [1] Reclining rear seats that know the meaning of reclining. Add the absence of a "rear floor hump" so there's more room to stretch out. [2] 60/40 rear folding seats fold flat for more cargo capacity. [3] And it happens with just a flick of the wrist. No cushions to mess with or headrests to remove. Simply pull the handles, and the seats fall flat. Plus [4] under-floor storage with additional deep side pockets.

You can lose track of time. Even lose your to-do list. Just don't lose your cell phone. Or your change – you never know when you might need some for the meter. Luckily, in Murano, they're right next to each other in the shifter console. A compartment keeps your cell phone in a civilized upright position, while a contoured coin holder actually helps you retrieve your money. And your laptop? We have special plans for that too. Like a lockable, out-of-sight storage area inside the center console. Simply remove the inner liner and it's all yours. Naturally, you can store what you'd like inside. We've even included a strap to hold your sunglasses case. And a standard power outlet that'll put the juice back in your cell phone.

Murano SL shown in Cabernet Leather with optional equipment.

Cargo shown for display purposes only. Nissan recommends that all loose items be secured when transported.

81.6 CUBIC FEET.  
1,526 CHOICES.

2 HAND-CARVED SPANISH  
TREASURES.

FROM A MEANDERING  
CLIMB UP A MOUNTAIN TRAIL  
TO A JAM-PACKED DAY IN  
THE CITY, MURANO IS THE  
SUV DESIGNED, ENGINEERED  
AND BUILT FOR YOUR ON-  
ROAD ADVENTURES.

**SMOOTH AND  
AGILE LIKE A  
CAR. CAPABLE  
LIKE AN SUV.  
PICK ANY TWO.**

And that meant starting with an amazingly smooth and quiet ride. To keep Murano's measured composure intact, a 4-wheel independent suspension soaks up the bumps admirably. While the generous use of lightweight aluminum in the rear gives Murano quick reflexes to respond to your commands. Engaging, never isolating, the suspension lets you communicate with the road, via a responsive rear multi-link design. Factor in a 245-hp V6 with world-class smoothness and Nissan's advanced Xtronic CVT™ (Continuously Variable Transmission), which eliminates gear hunting and shift shock, and you've got a vehicle with poise under pressure, combined with the ability to remain above it all.

Because, of course, Murano's car-like ride shares top billing with its capable SUV stance. From your elevated ride height, you survey the fray of traffic below. Sitting atop oversize 18-inch wheels and tires – standard on every Murano – you'll feel undeniably confident. But it's the surefootedness of the All-Wheel Drive model that positions Murano as a true, ready-for-anything SUV. Something you can only appreciate by getting out there. Where the sky is blue, the hills are steep and the call of the wild is impossible to resist.

Murano SL shown in Polished Pewter.

V6 3.5

NISSAN

"...THEIR NEW 3.5L VQ V-6 AGAIN REWRITES THE DEFINITION FOR 'WORLD-CLASS.'"

That's great news from *Ward's Auto World*. Even though Murano just officially hit pavement, it's powered by an award-winning engine, and closing in on legendary status. Take horsepower. At 245 hp, you have more power than some V8s.\* Then there's an easy-breathing 24-valve double overhead cam design. Strong, but lightweight, aluminum components. And torque. Loads of it. Like 246 lb-ft at 4,400 rpm.

Just what you need to get up the hills of San Francisco or over the bridge to all points north. Still, a Nissan wouldn't be a Nissan without some very advanced technologies. Like friction-reducing measures that help your engine do more with less effort. And a variable intake system and valve timing system, which translate into instant power at any speed, from taking off at a stoplight to merging effortlessly into freeway traffic. Things you may now enjoy on your way to a weekend in the mountains.

\* *Ward's Auto World* and *Ward's Engine And Vehicle Technology Update*, January 2002.

XTRONIC CVT\*\* (CONTINUOUSLY VARIABLE TRANSMISSION): OUR NEW HEADLINER IS SOMETHING EQUALLY NEWSWORTHY.

Introducing an automatic transmission so ahead of its time, it doesn't even operate on the typical four or five fixed-gear ratios. Instead, Xtronic CVT™ shifts through a near-infinite number of ratios, keeping your engine in its most efficient range. The result is better fuel economy. But what you feel is optimal power. Along with the incredibly smooth ride, acceleration is constant, linear. You feel the rush. Not shift shock. When climbing hills, Xtronic CVT tailors the output to suit the incline, rather than jumping from gear to gear. Of course, to truly understand how unique this "shiftless" system is, you have to drive a Murano for yourself. Once you do, you'll want to relive the experience again and again. Well into the future.

XTRONIC CVT

\*\* See owner's manual for operating and towing conditions.

THERE MAY BE NO BETTER BATTLE CRY. SAFETY HAS LONG BEEN A CAUSE WORTH COMMITTING EVERY FIBER OF OUR BEING. JUST ASK OUR ENGINEERS AND DESIGNERS. EVERY DAY, THEY GIVE 110% TO HELP YOU AVOID AN ACCIDENT. FROM HOW WELL YOU CAN ASSESS WHAT'S AROUND YOU, TO HOW QUICKLY THE ENGINE RESPONDS, NISSAN INCORPORATES SYSTEMS THAT REACT INSTANTLY AND PREDICTABLY. THAT'S WHY SUSPENSION AND STEERING ARE CRISP AND RESPONSIVE. BRAKING AND CONTROL FEEL INTUITIVE AND TECHNOLOGICALLY ADVANCED. A FULL BATTERY OF SAFETY-MINDED MEASURES THAT'LL INSPIRE CONFIDENCE IN ANYONE. WITHOUT SURRENDERING A SHRED OF EXHILARATION.

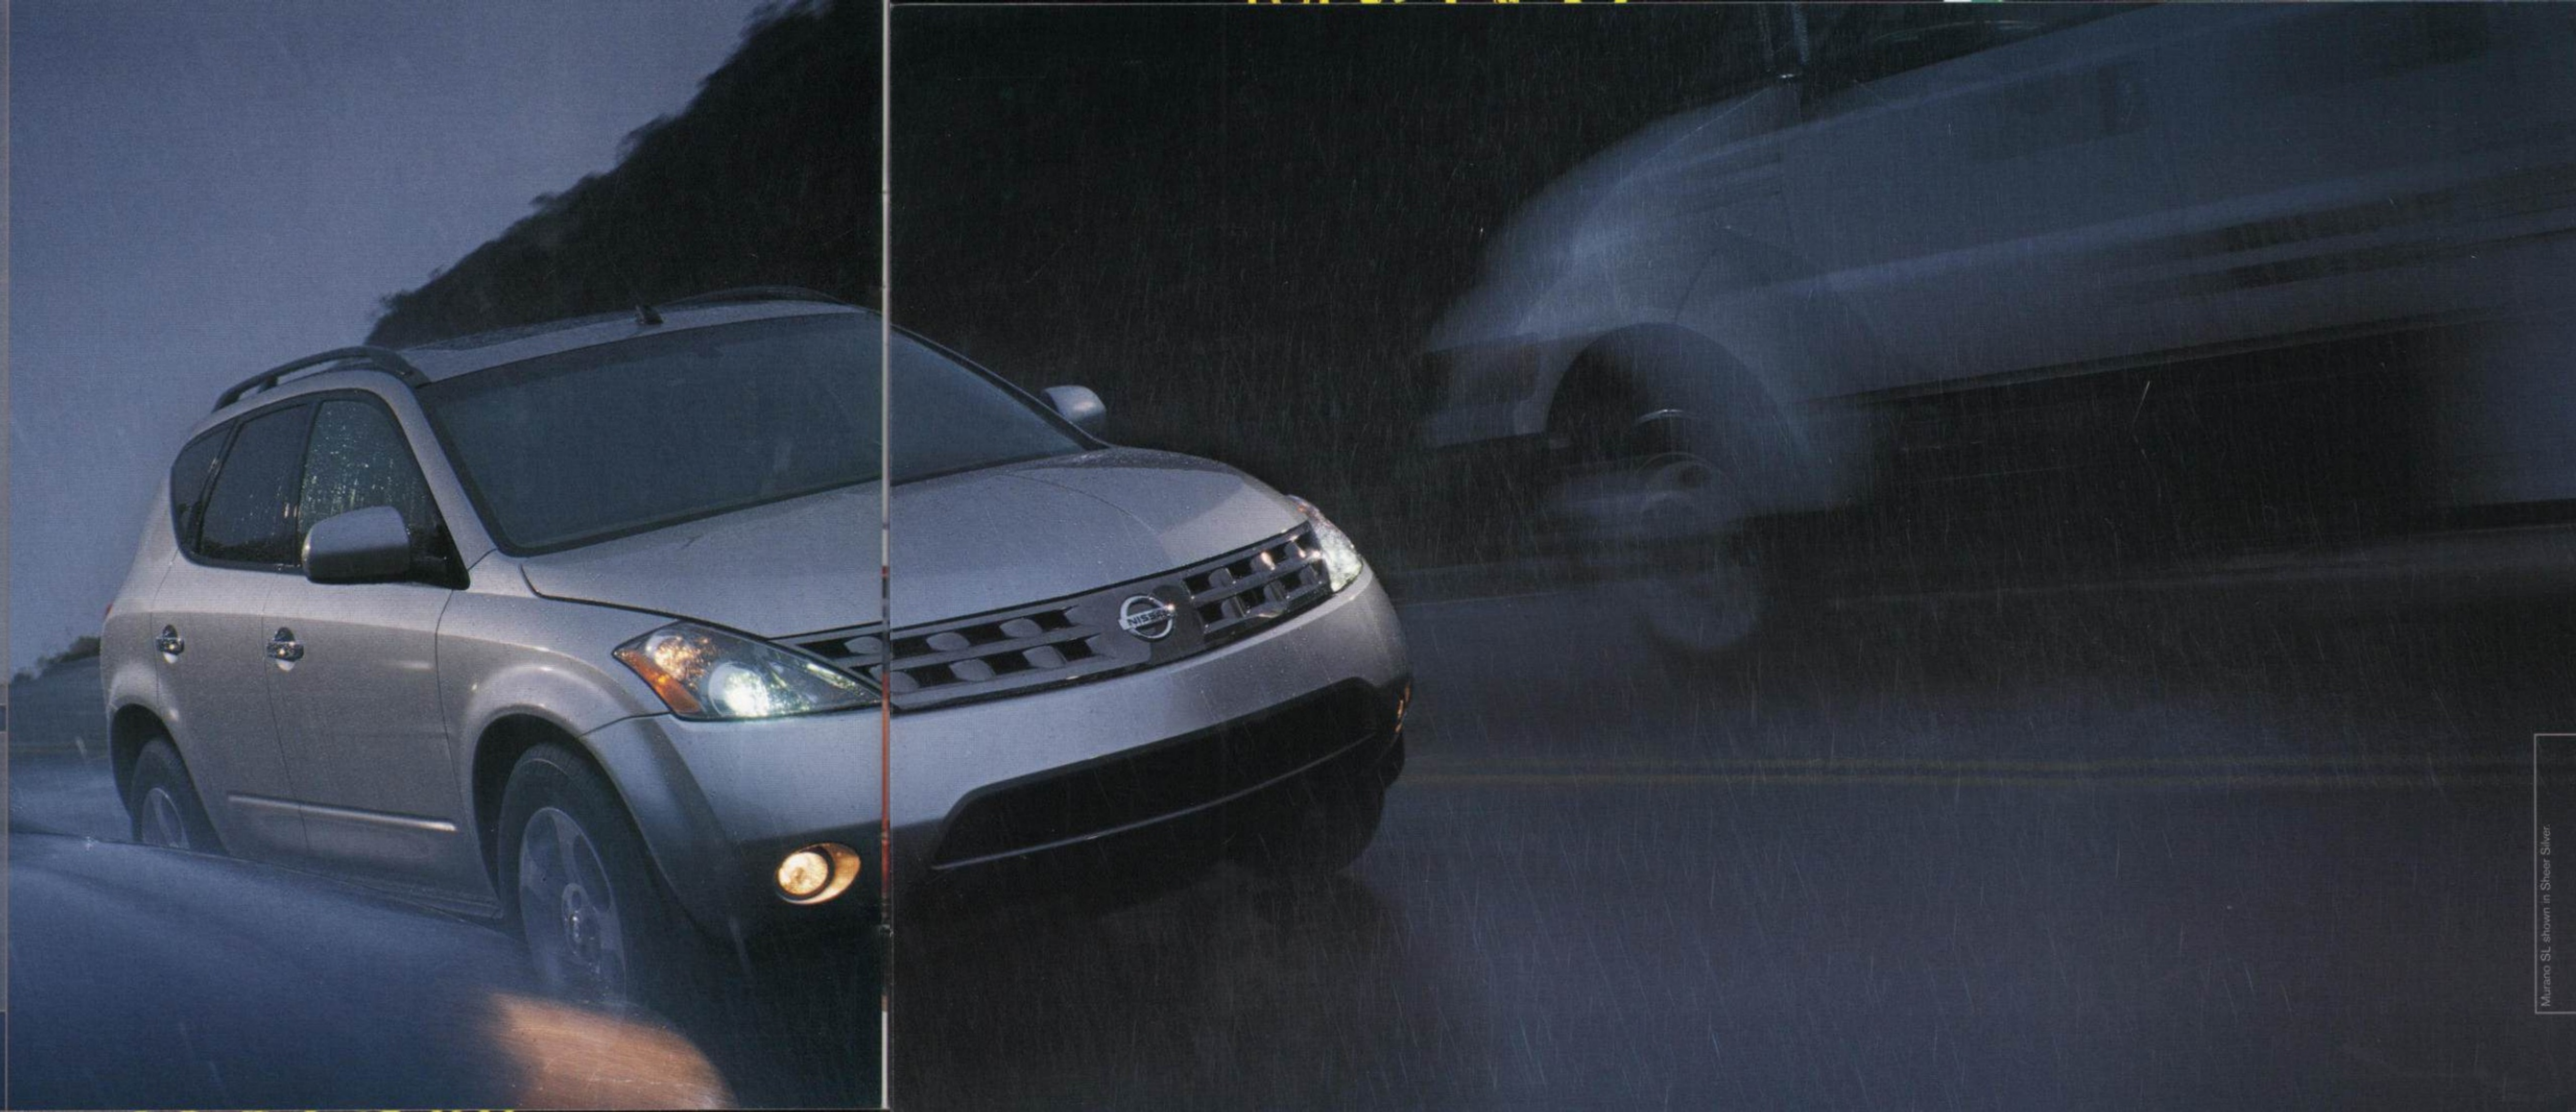

**HOW TO CORNER  
CONFIDENCE:  
TAKE NO SHORTCUTS.**

It might be raining, even icy, but you're prepared. The All-Wheel Drive (AWD) model, with its superior traction and handling, can help negotiate even the most challenging road conditions. And because it's an automatic system, Murano switches seamlessly between AWD and two-wheel drive, giving you either optimal control or optimal fuel economy. And should you want to lock in AWD, a definite advantage at lower speeds, simply press the AWD lock button.

Add Murano's Dynamic Control Package and you'll get Vehicle Dynamic Control (VDC)\* that manages engine power and brake pressure to help you keep a grip in slippery conditions. You'll also have the advantage of Traction Control System (or TCS) to help limit wheel spin during acceleration. And a Tire Pressure Monitor System (TPMS) that functions like an extra pair of eyes, keeping watch on proper inflation.

Sometimes, of course, it's best not to be moving at all. That's where standard four-wheel vented disc brakes and Anti-lock Braking System (ABS) come in. Not to mention standard Brake Assist (BA) and Electronic Brake force Distribution (EBD). BA – as its name implies – increases braking force, most notably in panic stops. EBD is a sensory system that helps compensate for times when there's more weight in the rear by sending extra force to the rear brakes. Just what you need when your cargo area is weighted down with Spanish treasures.

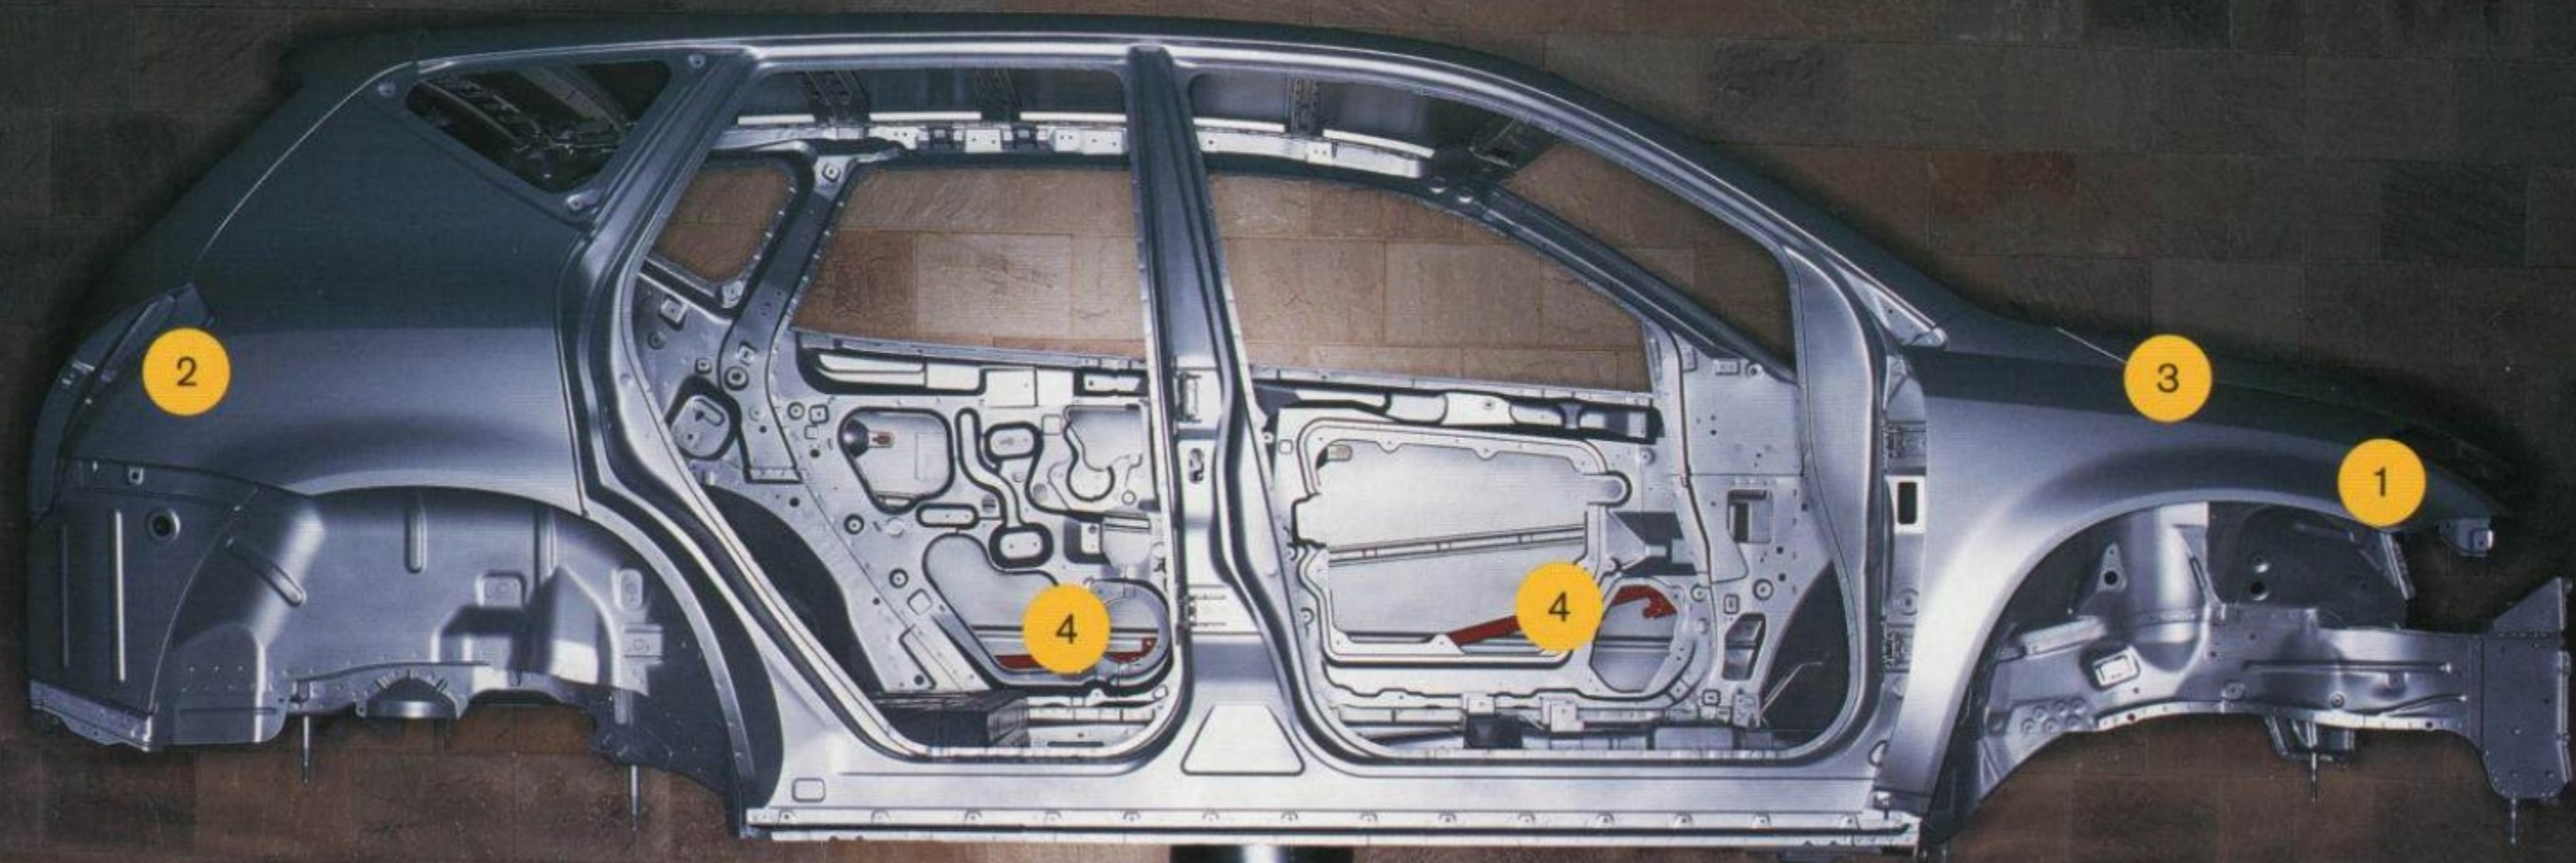

\* VDC is designed to help improve driving stability, but does not prevent accidents due to abrupt steering or by carelessness or dangerous driving techniques. Always drive safely.

Murano SL shown in Sheer Silver.

**CHANNEL ENERGY FOUR WAYS.** The focus is Zone Body construction – a high-intensity cabin structure built with crossmembers and reinforcements – surrounding you, while at the front and rear are energy-absorbing side structures. To get the details, read on. The more attentive we are, the better you'll feel.

[1, 2] Front and rear crumple zones help to absorb impact energy, reducing the amount of crash energy absorbed by the passenger compartment. [3] Hood buckling creases allow the hood to buckle at predetermined points, to help prevent it from intruding into the passenger compartment in certain frontal impacts. [4] And finally, pipe-style steel side-door guard beams help provide protection in the event of side impacts. Constructed like a thick-walled hollow pipe, these beams are welded into every door and offer added strength.

**CRASH TESTING AND REAL-WORLD SAFETY.** NATURALLY, WE WANT NISSANS TO SCORE HIGH ON GOVERNMENT COLLISION TESTS (WHICH THEY CONSISTENTLY DO), BUT WE'RE MORE CONCERNED WITH ALL THE VARIOUS WAYS ACCIDENTS HAPPEN IN THE "REAL-WORLD." USING COMPUTER-SIMULATED CRASHES FROM THE EARLIEST STAGES OF DEVELOPMENT, WE FIRST MAKE SURE THAT SAFETY GUIDES THE ACTUAL DESIGN OF THE VEHICLE. THEN WE MOVE ON TO PROTOTYPES, WHERE A CYCLE OF "CRASH, ANALYZE, IMPROVE" CONTINUES UNTIL WE'VE MET OUR OWN STANDARDS. EACH YEAR, IN FACT, NISSAN CONDUCTS OVER 1,600 VIRTUAL CRASH SIMULATIONS AND OVER 800 ACTUAL CRASH TESTS TO DEVELOP THE SAFETY PERFORMANCE OF ITS VEHICLES. AND THE KNOWLEDGE WE GAIN THROUGH THIS PROCESS HELPS MAKE THE NISSAN YOU DRIVE A SAFER VEHICLE FOR YOU AND YOUR PASSENGERS.

**AIR BAGS. SEAT BELTS. SIDE CURTAINS. SELF-DEFENSE.** Prepare yourself. There's Murano's standard dual-stage front supplemental air bags with seat belt sensors\* that have two different inflation levels, depending on seat-belt usage and the severity of the impact. Standard driver and front-passenger side-impact supplemental air bags\* built into the seats, not the door panels, so they move with you even when you adjust your seat. Even roof-mounted curtain side-impact supplemental air bags for front- and rear-seat occupant head protection.\* But with all these advanced technologies standard, you can never let down your guard. That's why seat belts are still your primary restraint system. Specifically, Murano's type of front seat belts which feature pretensioners [1] that automatically help tighten the belts when the front air bags deploy, as well as load limiters that "give" a little if your body puts too much force on the belt. Active head restraints [2] also play an important defensive role by actually moving forward in the event of a rear-end collision, helping to reduce whiplash injuries to you and your front passenger.

**SNUG KIDS.™** The first ever in the automotive industry, our Snug Kids Child Safety Seat Fit Guide provides a list of car seats that best fit the rear seats of Nissan vehicles and, most important, gives tips on correct installation. A child restraint that's properly installed is one of the most effective ways to help keep a child riding in your vehicle safe. We hope our guide makes this critical task an easier one, so please look for it on [NissanUSA.com/SnugKids](http://NissanUSA.com/SnugKids).

\*Please keep in mind that air bags are a supplemental restraint system and must always be used in conjunction with a seat belt. Also, a rear-facing child restraint must never be placed in the front-passenger's seat. In fact, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Keep in mind, driver and front-passenger side-impact supplemental air bags and roof-mounted curtain side-impact supplemental air bags for front- and rear-seat occupant head protection are designed to inflate in higher severity side collisions on the side of the vehicle impacted. Please see your owner's manual for more details. Inflated air bags shown for illustration purposes only. Actual air bags deflate after deployment.

ON THE SEARCH AGAIN.

## MURANO SELECTIONS

COLOR + FABRIC  
TRIM LEVELS  
SPECIFICATIONS  
ACCESSORIES

**SNOOP AROUND NISSAN'S COLOR AND MATERIAL DESIGN STUDIO IN CALIFORNIA** and you'll unearth some pretty curious things – all chosen to help make sure that everything about your Nissan is easy on the eyes, pleasing to the touch, and feels like part of one organic whole. The items seem random, at first glance. A clear suitcase with a waffle glued inside. A red hammer labeled "Little Rock." Running shoes cut in half. Plastic flamingoes painted blue. Yet designers use these diverse items as visual metaphors to help establish a consistent theme for your vehicle. Then all the colors, fabrics and textures are custom-designed to express that theme. No one in the lab opens a catalog and picks what "just seems to work." We'd rather create something that reminds you, perhaps, of the advanced versatility of a Gore-Tex® jacket or the sensual indulgence of a resort spa.

Nissan has taken care to ensure that the color swatches presented here are the closest possible representations of actual vehicle colors. Swatches may vary slightly due to the printing process and whether viewed in daylight, fluorescent or incandescent light. Please see the actual colors at your local Nissan dealer.

## THE START OF SOMETHING LONG-TERM.

WHO KNOWS WHAT FIRST CATCHES YOUR EYE OR MAKES YOUR HEART SKIP A BEAT. AN AMAZING LOOKING TAIL-LIGHT? A TORQUE-HAPPY REV? THE INEXPLICABLE WAY THIS NISSAN FEELS UNIQUELY YOURS? WHAT IS CERTAIN, HOWEVER, IS THAT WITH EVERY NISSAN COMES AN OWNERSHIP EXPERIENCE THAT'S A LONG, SATISFYING JOURNEY. IN WHICH SOME OF THE MOST REWARDING – AND UNEXPECTED – BENEFITS COME MANY MILES DOWN THE ROAD.

**LASTING QUALITY** It's in everything we do. Whether it's manufacturing precision-built engines in some of the most advanced, fully automated plants in the world, or testing critical welds on a car by blasting them apart with a pneumatic chisel. Of course, it helps to start with superior steel. By insisting on a higher carbon content and a special heating and cooling process, the steel we use is almost twice as strong as ordinary steel. **TESTING** To ensure both durability and reliability, we submit vehicles to a relentless course of repetition and adverse-tolerance tests. For example, opening and slamming shut the doors 24 hours a day, for seven days. 100,000 times in all. Driving vehicles on replications of the most brutal road surfaces in the world – from European cobblestone to truck-scarred American asphalt – inflicting ten years of wear and tear in less than three months. We test heaters and cold-start capability in the sub-arctic blasts of Northern Ontario, bake cars in the Arizona desert to challenge air conditioning systems, and measure paint resiliency with a barrage of salt spray. In other words, we anticipate the worst, so you can experience nothing but the best.

**LOW MAINTENANCE** Nissan's performance edge doesn't come at the expense of practicality. Or convenience. Consider platinum-tipped spark plugs designed to go for 100,000 miles without a tuneup.\* Or the case of our steel timing chains. When no supplier could provide a rubber timing belt that met our standards, we installed a metal chain instead.

**WARRANTIES** Every Nissan is backed by a 36-month/36,000-mile basic bumper-to-bumper coverage and a 5-year/60,000-mile limited power-train coverage. (For complete information, see your Nissan retailer and read the actual limited warranty.) For extra protection, you can also add Security+Plus,<sup>®</sup> the only extended service agreement approved by Nissan.

**SIGNATURE FINANCING** When you're ready to buy or lease a Nissan, attractive rates, fast response and flexible terms make it easy.

**GENUINE NISSAN SERVICE AND PARTS** Every part we make is manufactured to the same exacting standards as the original. And they're the only parts to carry Nissan's factory-backed warranty. Our factory-trained, certified service technicians are just as precision-oriented. And with Maintenance+Plus<sup>®</sup> coverage, your vehicle will receive up to 17 different services and over 33 different inspection items at each visit, using the most up-to-date diagnostic equipment available. (For complete information, read actual plan.)

**WEB SITE/CUSTOMER SERVICE** Keep in touch and stay up to date. Log on to NissanUSA.com or call 1-800-Nissan-1 for the scoop on our current cars and trucks, as well as a sneak peek into the future. Or perhaps you just have a question. And don't forget to check out the latest ways to keep your vehicle in peak performance. It's part of our commitment to getting it right – whatever your needs, wherever you are.

\* Under normal driving conditions with routine fluid and filter changes. See your owner's manual for details. All illustrations, photographs and specifications in this publication are based on the latest product information available at the time of printing. Some vehicles shown with optional equipment.
