

Volvo EX30

MODEL YEAR 2026

FULLY ELECTRIC

V O L V O

The Volvo EX30

The EX30 is our small fully electric SUV which takes Volvo Cars' unique approach to electric mobility to a new audience. The Volvo EX30 is a cornerstone of Volvo Cars' electrification strategy and key in delivering to the company's growth ambitions. Everything that has made our SUVs so appreciated and even loved over the years—the distinctive design, the generous interior, the inspiring drive, the advanced safety, the legendary comfort, smart connectivity and liberating versatility—you will also find in our new, small SUV EX30. In a more compact format, of course, but just as well a full-grown Volvo that gives everything people can expect from a fully electric Volvo SUV.

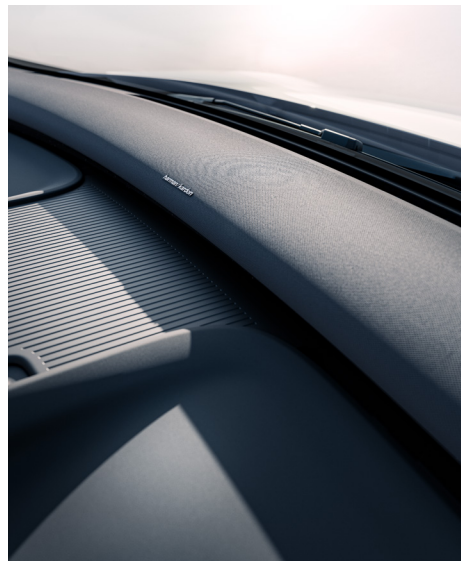

For Model Year 2026, the EX30 is offered in additional variants to broaden its appeal even further. A Single Motor powertrain offers rear-wheel-drive performance, while the new EX30 Cross Country comes equipped with a more rugged and capable appearance.

KEY FEATURES

12.3" Combined Driver/Center Display

The driver display integrated on top of the center display gives clear, instant driving critical information. Its high position means that it is always conveniently located in the driver's field of vision. The display features one mode with standard functions such as speed, battery level, range, actual road signs, gear lever position (PRND), and a real-time surround view with driver support functions such as Pilot Assist. The surround view is a car-centric view that displays your car and surrounding cars and trucks.

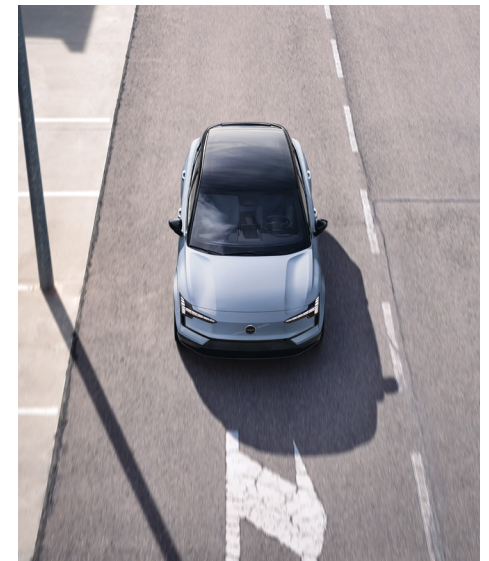

Luxury, High-quality Interiors

With the Volvo EX30, we introduce the soundbar speaker concept as standard. The soundbar elegantly integrates tweeters, mid-range speakers, and the woofer outlet in a stylish audio unit covering the full width of the dashboard in front of the occupants. Bringing home audio design into the car, the soundbar makes sound more driver-focused than ever and is an important part of the car's modern interior design impression. This speaker concept also frees up valuable space in the doors while reducing weight and material resources.

Scandinavian Design

Inspired by nature, it embodies Scandinavian design principles and provides a sophisticated, relaxing interior experience. An array of recycled and natural materials helps to reduce waste and optimize material utilization.

Safety

The safety expected from a Volvo in a smaller package, aiming for top safety rating with state-of-the-art collision avoidance technology and new safety innovations such as door opening alert and rear low-speed autobrake.

The Volvo EX30 Cross Country Twin Ultra

The EX30 Cross Country has its own unique design enforcing the capability and robustness of the car. It comes exclusively in the Ultra trim and includes heated front seats and steering wheel standard. Unique content includes:

1. Cross Country front shield, matte black with topography pattern
2. Front skid plate in low-gloss Vapour Grey
3. Front lower bumper in matte black
4. Increased ground clearance by 19 mm (12 mm by chassis, 7 mm by wheel)
5. Specially-tuned Cross Country chassis
6. Cross Country nameplate in C-pillar
7. Wheel arch extensions in matte black
8. 19" 5-spoke matte graphite/matte black Cross Country alloy wheels with larger tires 720 mm (235/50/19)
9. Rear skid plate in low-gloss Vapour Grey
10. Rear lower bumper in matte black with embossed Cross Country logo
11. Rear shield in low-gloss design (foil)
