

Volvo XC40

MODEL YEAR 2026

MILD HYBRID

V O L V O

The Volvo XC40

The Volvo XC40 is the first Volvo to be built on our Compact Modular Architecture (CMA). The XC40 is the vehicle for active, urban individualists who are not afraid to be themselves. It is perfect for the drivers who want the attributes expected of a larger SUV but in a smaller, more space efficient exterior footprint. Its proud upright stance, high in-command seating position and big wheels means the XC40 stands out, but still without shouting about its presence. The XC40 meets these expectations and does so with an expressive exterior design that is authentic to an SUV. Because it is a real SUV.

KEY FEATURES

Mild Hybrid Technology

The mild hybrid utilizes an integrated starter/generator and a 48-volt battery to provide additional power to the drive wheels when accelerating from a stop. This additional power comes from energy recaptured during braking and stored in the 48-volt battery. By using energy that would have been wasted, the mild-hybrid technology improves fuel efficiency and provides a smoother, more comfortable driving experience.

Regenerative Braking

Whenever the accelerator is released to reduce the speed using engine braking, or when the mechanical brakes are applied via the brake pedal, the car uses its integrated starter/generator. In so doing, it recaptures kinetic energy from the brake discs that would have been lost and converts it back to electricity, sending the energy to the 48V battery. When accelerating from a stop, the same starter/generator provides electric assistance which reduces the load on the engine and results in reduced fuel consumption and emissions.

Storage for Everything

Practicality and storage compartments have been a high priority when designing the interior of the XC40. Many useful storage solutions are available, including a large center console with an integrated, removable waste bin, large door bins, a folding load hook on the glove box door for small bags, and under-floor cargo storage. These XC40 features make daily routines and errands a little bit easier.

A Place for Everything

The cargo cover can be easily removed to expand the cargo area and seamlessly stowed under the rear cargo load floor. The folding load floor provides hooks to hang grocery bags and also divides the cargo area to keep items from shifting and sliding.

Some colors and features shown above may not be available on all trims or European model shown.
