6000 & STE

PONTIAC
1985

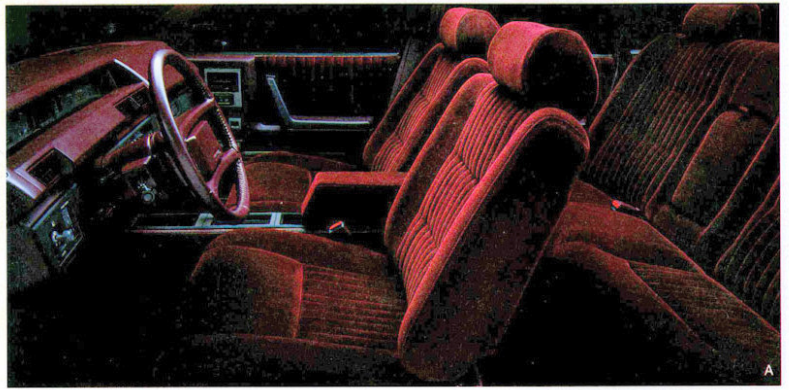

Pontiac knows that serious drivers judge an automobile by their own individual standards. So it's rare when one car receives virtually unanimous acclaim.

Since its debut in 1983, the Special Touring Edition of the Pontiac 6000 has earned the title "North America's best performance sedan."

For 1985, Pontiac 6000 STE strengthens its position with the addition of multi-port fuel injection to its 2.8 litre V-6 engine. This exceptionally smooth and responsive powerplant is mated to a specially developed STE suspension that includes firmer effort power rack and pinion steering, front and rear stabilizer bars, and P195/70R14 Goodyear Eagle GT tires. You also get a 3-speed automatic transmission, front-wheel drive, power 4-wheel disc brakes and advanced Electronic Ride Control (E.R.C.). It all combines to deliver outstanding power, roadability and response.

6000 STE displays a sophisticated yet aggressive appearance. New front and rear fascias grace an exterior that also features striking tone-on-tone paint, blacked-out trim, ventilated cast aluminum wheels with wheel locks, stainless steel dual outlet exhausts, the distinctive four halogen headlamps with two inboard driving lamps, front air dam and full-width neutral density tail lamps.

North America's best performance sedan gets even better.

A

B

Instruments in Canada are metric where required.

C

D

The interior of the 6000 STE (A) is an exacting blend of form and function. The fully reclining 45/45 front seats are available with eight-way power adjustment. They're contoured specifically to provide firm support yet remain quite comfortable. The leather-wrapped four-spoke tilt steering wheel and shift knob provide a comfortable, sure grip.

The STE's electronic instrumentation features a digital speedometer and analog tachometer (B). The Driver Information Centre provides detailed readings of the inner workings of the car; mechanical functions, fluid levels and maintenance intervals are all graphically monitored.

The 6000 STE's new 2.8 litre V-6 engine with multi-port fuel injection is designed for quick response. New for the STE in 1985 are the full-width, neutral density tail lamps (D).

The STE's standard accessory kit (C) includes a 12v spotlight, light sticks, first aid kit, raincoat and inflator hose.

The very latest thinking from Pontiac's interior design staff.

The Pontiac 6000 and 6000 LE take dramatic advantage of aerodynamic research to reduce wind noise and drag while increasing stability. And for 1985, the sweeping angles and smooth, rounded edges that mark every Pontiac 6000 are complemented by sleek new front and rear fascias and a purposeful new grille.

Yet Pontiac 6000 places an emphasis on road worthiness that goes far beyond cosmetics. It features a responsive combination of standard front-wheel drive, power rack and pinion steering, MacPherson strut front suspension, power front disc brakes, and front and rear stabilizer bars. Matched with its standard 2.5 litre 4-cylinder engine with roller valve lifters, swirl-port combustion chambers and electronic fuel injection, Pontiac 6000 can offer you outstanding over-the-road performance.

Or if you choose, you can increase the handling performance and roadability of your Pontiac 6000 by ordering the available Y99 Rally Tuned suspension which includes a special ride and handling package, front stabilizer bar, and firmer effort power steering (P195/70R14 tires required).

Two newly available options for '85 include a 4-speed automatic transmission with overdrive feature for quieter highway operation, and a highly responsive 2.8 litre V-6 engine with multi-port fuel injection.

Its capacity for carrying is only exceeded by its capability for excitement.

Pontiac extends its commitment to driving excitement in 1985 to the beautiful new 6000 LE Wagon (above). It boasts the same capable engineering as our other 6000's yet has room for up to eight adults with its available rear facing seat or over 2106 litres (74 cubic feet) of cargo space. You can order an available 2.8 litre V-6 engine or 4.3 litre V-6 diesel. Or, you can get an available 2.8 litre V-6 engine with multi-port fuel injection.

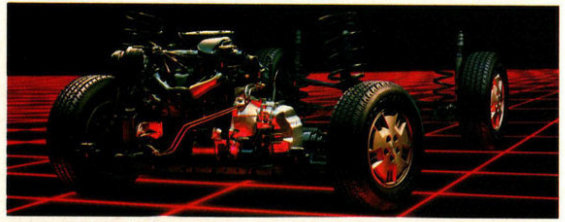

A driving environment with true world-class sophistication.

Instruments in Canada are metric where required.

The 6000 LE interior is designed for comfort and function. The available 45/45 front seats with fold-down centre armrest are body-contoured for firm support.

And when you order an available V-6 engine, you can also get the newly available electronic instrument panel that includes a tachometer, odometer and full set of gauges.

The available Y99 Rally Tuned suspension gives your 6000 the ability to handle curves and straightaways with equal agility.

1985 PONTIAC 6000 FACTS & FIGURES

Select the combination of "extras" that make your Pontiac uniquely yours from the long list of standard and available features, some of which are given below. Ask your dealer about group packages and the many other features not indicated below. Your dealer will also advise you of the availability of the various items on the model of your choice.

A word about engines

These Pontiacs are equipped with GM-built engines produced by various divisions and affiliations of General Motors Corporation and GM of Canada.

Order Code	Displacement	Carb. bbl.	Cyl.	†V.I.N.	*Source	Transmission
LR8	2.5 litre (151 CID)	EFI	4	R	(1)	Automatic
LE2	2.8 litre (173 CID)	2	V6	X	(2)	Automatic O.D. Automatic
LB6	2.8 litre (173 CID)	MFI	V6	W	(2)	Automatic O.D. Automatic
LT7	4.3 litre (260 CID)	Diesel	V6	T	(3)	Automatic

*Produced by GM (1) Pontiac Division USA (2) Chevrolet Division USA (3) Oldsmobile Division USA

†The V.I.N. (Vehicle Identification Number) Engine Code is the eighth entry (letter or numeral) from the left on the vehicle serial number plate. The vehicle serial number plate is located on the top portion of the driver's side of the instrument panel and can be viewed from the exterior of the car by looking through the windshield.

STANDARD FEATURES ON ALL PONTIACS

SAFETY FEATURES

OCCUPANT PROTECTION • Manual lap/shoulder belts for driver and right front passenger (driver side includes visual and audible warning system). • Manual lap belts at each rear seat position, (and centre front, when applicable) • Energy absorbing steering column • Energy absorbing instrument panel • Energy absorbing tops, front seats • Laminated safety windshield glass and tempered safety side and rear window glass, (except plastic rear window, Sunbird convertible) • Safety interlocking door latches • Passenger-guard inside door lock handles • Inertia-locking, folding front seat backs, (manual release, Firefly) • Safety armrests • Safety strength seat attachments • Head restraints, driver and right front pass. (adjustable/integral) • Dual sun visors • Smooth contoured door and window regulator handles • Pressure lock radiator cap.

ACCIDENT AVOIDANCE • Side marker lights and reflectors • Parking lamps that illuminate with headlamps • Four-way hazard warning flasher • Back-up lights • Directional signal control (and lane change feature–except Firefly) • Windshield defroster, washer and dual speed wipers • Inside rearview mirror with vinyl-bonded glass • Outside left rearview mirror • Brake system with dual master cylinder and warning light • Starter safety switch • Dual action hood latch system (except rear opening Fiero) • Low glare finish on instrument panel top, inside windshield mouldings, wiper arms/blades, metallic steering wheel surfaces • Illuminated heater and defroster controls • Illuminated windshield wiper and washer controls (if on I/P) • Tires with built-in tread-wear indicators • Safety road wheel rims • Audible brake lining wear indicators, all disc brakes • Self-adjusting brake feature • Pressure relief fuel cap (pressure relief fuel system, Firebird).

ANTI-THEFT • Audible reminder for ignition key removal • Anti-theft steering column lock • Visible vehicle identification number • Remote inside hood release • Anti-theft key system (separate key for ignition). Except Firefly.

A word about assembly, components, and optional equipment in these vehicles.

The vehicles described in this brochure are assembled at various Divisions of General Motors Corporation. These vehicles incorporate thousands of different components produced by General Motors of Canada Limited and related companies and their suppliers. From time to time during the manufacturing process, it may be necessary, in order to meet public demand for particular vehicles or equipment, or to meet federally mandated emission and safety requirements or fuel economy guidelines, or for other reasons, to produce vehicles with different components or differently sourced components than initially scheduled. All such components have been approved for use in our products by General Motors of Canada Limited or related companies and will provide the quality performance associated with our name.

Please note that certain optional equipment can be ordered only in conjunction with other optional equipment.

Also, upgrading from specified standard equipment may be necessary when certain optional equipment is ordered. Ask your sales representatives for details.

With respect to extra cost optional equipment, make certain you specify the type of equipment you desire on your vehicle when ordering it from your dealer. Some options may be unavailable when your car is built. Your dealer receives advice regarding current availability of options. You may ask the dealer for this information. GM also requests the dealer to advise you if an option you ordered is unavailable. We suggest you verify that your car includes the optional equipment you ordered or, if there are changes, that they are acceptable to you.

All illustrations and specifications contained in this catalogue are based on the latest product information available at time of publication approval. The right is reserved to make changes at any time, without notice, in prices, colours, materials, equipment, specifications and models, and to discontinue models. Some of the equipment shown or described throughout this catalogue is available at extra cost. Check with your dealer for complete information.

The Pontiac Philosophy... road cars with a purpose

For the past 25 years, Pontiac has been responsible for some of North America's greatest road cars. And this proud heritage is what drives us today.

Over the years, we've learned one important lesson: Great road cars don't materialize overnight. It takes years of dedicated development work. It means a suspension development engineer spending week after week in search of that perfectly balanced combination of ride and handling. It means designers trying endless combinations of subtle but detailed refinements on the shape of a future Pontiac, working hour after hour in the wind tunnel to achieve aerodynamic performance and the ultimate Pontiac look. It means interior designers reviewing thousands of variations on instrumentation, lighting, controls, seating, steering wheels, pedal placement, environmental systems, color and texture, all in the quest for the optimum driving environment. It means engine development specialists working with cylinder head designs, fuel-injection systems, turbo and supercharging, and computer electronics, all toward the goal of optimum performance *and* operating efficiency. And it means advanced technicians probing the outer limits of automotive thinking, contemplating future transportation designs beyond our imagination, ones that will uphold the proud Pontiac tradition 25 years from now.

Our goal is to build the finest road cars that we possibly can. To some car companies, that challenge is too heavy a burden to bear. At Pontiac, we know no other way.

COMMITMENT TO

Excellence

At General Motors, a lot of new thinking has gone into our products. New thinking aimed at completely satisfying you, the customer. Our designers and engineers are making history in aerodynamic design, computer aided technology, fuel efficiency and safety.

As further proof of our goal of totally satisfying you, at GM dealerships we are implementing a "Commitment to Excellence" Delivery Procedure.

The program includes: a thorough new-vehicle inspection by both the service technician and the salesperson; a full tank of fuel; plus a follow-up survey based on your impression of the delivery process.

With a commitment like that, you've got a lot of excellent reasons to "Look at GM Today". See your dealer for complete details.

FOR YOUR PROTECTION

New Vehicle Limited Warranty–This warranty covers any repairs needed during the basic coverage period due to defects in material or workmanship. Any required adjustments will also be made during the basic coverage period of 12 months or 20,000 kilometres, whichever comes first. The complete vehicle, except tires, is covered during this period.

Powertrain Coverage–This powertrain warranty covers gasoline engines and other powertrain components up to a total of 24 months or 40,000 kilometres, whichever comes first. This powertrain warranty also covers specific diesel engine components to 36 months or 80,000 kilometres, whichever comes first. All powertrain warranty repairs are subject to a $100 deductible for each repair visit.

Corrosion (Rust-Through) Coverage–General Motors warrants for 1985 passenger cars, light duty trucks and vans that your General Motors dealer will repair or replace at no charge any body sheet metal panel found to have developed perforation (rust-through) due to corrosion. This warranty begins on the date the vehicle is first delivered or put in use and extends for 36 months, regardless of distance travelled by the vehicle.

Battery Coverage–If your battery should fail under normal service due to a defect in material or workmanship after the basic coverage period expires, but before the vehicle has been in use 36 months, it can be replaced on a pro rata adjustment basis for a new Delco battery. The pro rata adjustment price of the new battery will be based on the number of months the original battery was in use since the start of the new vehicle warranty. Contact a dealer handling your vehicle for further details on such adjustments.

Tires are warranted by the tire manufacturer.

Owner Assistance–The satisfaction and goodwill of owners are of primary concern to GM dealers and General Motors of Canada Limited. In the event a warranty or some other matter is not handled to your satisfaction, the following steps should be taken:

1. Discuss the problem with your dealership management.
2. Contact the General Motors Zone Office closest to you as listed in the Owner Assistance Section of your Warranty and Owner Assistance Booklet.
3. Contact the Customer Service Representative, General Motors of Canada Limited, Oshawa, Ontario.

Special Policy Adjustment Program Beyond the Warranty Period–General Motors is proud of the protection afforded by its warranty coverages. In order to achieve maximum customer satisfaction, there may be times when General Motors will establish a Special Policy Adjustment program to pay all or part of the cost of certain repairs beyond the terms of the warranty. Check with your General Motors dealer or the nearest G.M. Zone Office to determine whether any special policy adjustment program is applicable to your vehicle.

GM **Protection Plan**

Protection Plan–While there are many service contracts available on the market today, *there is only one which gives you an agreement directly with General Motors.* It is the one with the Protection Plan logo shown. This logo on all Plan material assures you that the service contract you are buying is the GM Plan, the finest such program available to GM owners.

The GM Protection Plan provides optional added mechanical and electrical repair protection during and after the new vehicle limited warranties. Ask your General Motors dealer for details and information about the *genuine GM Protection Plan.*
